Bluetooth Frequency: 2.4GHZ-2.48GHZ
Transmission Distance: 33ft
Frequency Sound Range: 50HZ-20KHZ
Sigto Noise Radio of Whole Machine: Greater than 75db
Built-in Lithuim Battery Voltage: 3.7V
Charging Input: DV5V / 3A
Product Size: 7.1*3.94*3.54 in
Product Weight: 1.8 pounds

Operation Description of the Key Function

1.Start Up

Long press the button for 2 seconds to start up, start up the default heating light.

2.The Bluetooth Function is used for use

1) This audio supports the use of Bluetooth devices with A2DP function, booth default into the bluetooth mode, Bluetooth

indicator blue light shining, accompanied by voice prompt, when the stereo is waiting for pairing connection, only in this state, can be paired and connected with the Bluetooth audio.

2) Mobile phone connection

- The first step is open the phone Bluetooth setting switch in the phone settings and click the search device.

- The second step, when the available device displays the R168 character indicating that the phone finds the Bluetooth stereo, click R168 to enter the pairing mode. After the phone is seccessfully paired with the stereo, there will be a voice prompt and display connected.

3.TWS Pairing Function (this function is suitable for Bluetooth mode only)

When you have two R168 Bluetooth speakers, ensure both are in Bluetooth mode.

- 1) Press and hold the button to initiate TWS pairing.
- 2) The Bluetooth devices will connect, and the two speakers will automatically become the left and right channels, creating a stereo surround sound effect for true wireless stereo.

3) Press and hold the button (+ icon) again to cancel TWS pairing; the two speakers can then be used independently.

4.Light

- 1) The R168 Bluetooth speaker is equipped with 13 lighting effects.
- 2) Start the default warm lamp effect of the equipment, and Single click of the button to adjust the light.
- 3) Double-clicking the button will turn the lighting effect on or off.

5.FM Radio Mode User Guide

- 1) Switch to FM Radio Mode
 - Turn on the speaker. When using the FM function, expanding the external antenna to search for channels will have a better effect.
 - Press and hold the button to switch modes. Switch to FM Radio Mode and you see FM displayed on the screen, connect the charging cable to the product type-c interface as a radio antenna.
- 2) Search for Radio Stations
There are two ways to search for stations: Auto Search and

Manual Search.

Make sure you are in FM mode. Click the button to switch between automatic and manual search.

【Automatic Search】

The speaker will automatically scan and save all available stations.

【Manual Search】

- Press the button to go to return to the previous station.
Press the button to go to the next station.
- 3) Adjust Volume
Long press the button to decrease volume.
Long press the button to increase the volume.

4) The strength of a radio signal is significantly affected by its placement:

- Position it near a window, preferably one facing the direction of broadcast towers. Walls severely weaken FM signals.
- Keep away from obstacles: Place the radio in an open area, away from large metal objects and appliances like computers, televisions, routers, and refrigerators.
- Place it higher up: Signals are typically stronger at higher positions. Try placing the radio on a bookshelf or cabinet.

5) Exit FM Radio Mode

Long press the button to switch to other modes.

If you have any questions, please contact our customer service team.

6.TF Card/U Disk Function:

By inserting the TF card / U disk into the card slot, the corresponding voice prompt will appear. The product will automatically read the audio file in the card and play it. The user can click the button to control the music.

7.Clock Setting

Press the buttons to enter the clock / minute setting, press the button / button to adjust the hour / minute.

8.Alarm Clock Setting

Press the button to enter the clock / minute settings, press button / button to adjust the hour / minute. Press the button and then press / select your favorite alarm bells, there are 7 groups of alarm bells, and finally press the button to close the alarm.

When no one turns off, the alarm will automatically turn off for 1 minute (the alarm will ring normally in the shutdown state, please cancel the alarm clock without the need).

Cancel alarm setting: long press the button (the alarm sign disappears on the screen after successful cancellation).

9.White noise use

Press button to switch to white noise mode. Press the button / button to choose your favorite sleep music.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
