

Power Button: Short press the touch power button to turn on the device. Two white and one blue indicator lights on the panel will be on, and the color light strip will light up in accordance with the color, brightness and mode set before the last shutdown. Long press the button to turn off the light strip.

Brightness Button: When the device is on, press the button to adjust the brightness in monochrome mode; the brightness level is adjustable in a cyclic manner.

Mode Switch Button: When the device is on, short press the button to switch the lighting modes.

Installation Note

Prior to installation, the two wires at the bottom of the socket must be inserted into the socket holes first. For details, refer to the figure below.

Important No.

The USB port on the left requires a 5V(1A-4A) power supply for connection. The higher the input current, the greater the output power of the port.

The product is built-in with short-circuit protection for the color light strip: In case of a short circuit, the controller will cut off the power output to the light strip (the light strip will turn off automatically). After the fault is eliminated, reconnect the power supply to restore normal operation.

The product is built-in with short-circuit protection for USB charging: If a short circuit occurs in the charging cable, the controller will disable the charging function automatically. The function will resume normal once the short-circuit fault is resolved.

Operating Instructions

Connect the power supply, and all white indicator lights on the panel will light up. Power Button: Short press the touch power button to turn on the device. Two white and one blue indicator lights on the panel will be on, and the color light strip will light up in accordance with the color, brightness and mode set before the last shutdown. Long press the button to turn off the light strip. Brightness Button: When the device is on,

press the button to adjust the brightness in monochrome mode; the brightness level is adjustable in a cyclic manner.

Mode Switch Button: When the device is on, short press the button to switch the lighting modes.

This product is compatible with the LotusLamp APP for remote control. Scan the QRcode below with your mobile phone to download and install the APP.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
