2.Installation Reference

Note: Select either the factory-fit power harness (Y-cable) or the universal fuse box cable, depending on your vehicle's power connection method.

2.1 Pre-installation Precautions

- 2.1.1 During installation, ensure the vehicle's power is switched off to avoid triggering a malfunction.
- 2.1.2 Align the positioning pin with the matching hole on the connector before inserting. Incorrect alignment may cause damage or short circuits.

2.2 Y-Cable Installation (Plug and Play)

2.3 Fuse Box Hardwiring Installation (Universal)

Note: Installation is for reference only,professional installation is recommended.

- 2.3.1 Choose a fuse slot labeled on the cover, preferably a safety-related fuse

2.3.2 Please locate your vehicle's fuse box, usually under the steering wheel, inside the glove compartment, or in the trunk. Location varies by model, so check the owner's manual or search online.

Note:

- 1.Insert the TF card until it clicks, use Class 10+ (up to 128GB), format before use, always power off before inserting/removing; lower-class cards may errors.

2.Recommended to place the GPS module (Optional) in the sun visor area.

3.Rear camera (Optional) must be installed inside the rear windshield.

3.App Download

Scan QR code, or search "**Viidure**" in app stores to download

4.FAQ

Q: If I buy the front camera only version now, can I add a rear camera later by purchasing it separately?

A: No.The internal circuit boards are different. Upgrading requires replacing the entire main unit.

Q: Can connect two phones at the same time?

A: No.The camera only supports one phone connection at a time.

Q: Can phone be connected to CarPlay and camera wifi at the same time?

A: The phone cannot be connected to CarPlay and dash cam WiFi at the same time, but the camera records automatically when car starts, so you don't need to keep it connected to camera all the time.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- - Reorient or relocate the receiving antenna.
- - Increase the separation between the equipment and receiver.
- - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- - Consult the dealer or an experienced radio/TV technician for help.ct.

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.
