

zhongshanshijinjingkejiyouxiangongsi

Product Name: Smart Bird Feeder

Model(s): D30, Q40

Model difference

D30 and Q40 have the same technical construction including circuit diagram, PCB Layout, components and component layout, all electrical construction and mechanical.

The difference lies in the product's appearance and the installation location of the solar panel.

D30	Q40
 The solar panel is installed separately and connected to the internal circuitry through a cable routed directly through the enclosure.	 The solar panel is mounted separately on the roof-shaped cover and connected to the main unit through an external cable.

However, the difference does not affect the radio/wireless function.

Yours sincerely,

Wei Shi
