ON/OFF

2.4G Receiver

⚠ One receiver works for both Keyboard and Mouse — a design for simpler setup, not a missing part.

Forward

Back

Notice: A flashing red light on the keyboard/mouse indicates low battery. Please charge it immediately. Otherwise, device performance may be affected and operation will become unstable.

2.4G Mode Instructions (USB Receiver)

What to do if the keyboard and mouse lose connection with USB?

Remove the receiver first. Then press **Esc** and **+** together for 3 seconds until the red light stays solid, and plug the receiver back into your computer.

What can I do to switch the keyboard mode? (It defaults to Windows.)

Win: Press the **Fn** + **Q** together

Mac: Press the **Fn** + **W** together

Remove the receiver first. Then press and hold all three mouse buttons (left, scroll wheel, and right) for 3–5 seconds, and plug the receiver back into your computer.

How do I switch to the F1-F12 key functions?

This keyboard defaults to multimedia keys. Enable FN Lock to use F1-F12 functions.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

portable device statements

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
