

Voganza Bluetooth control software user manual:

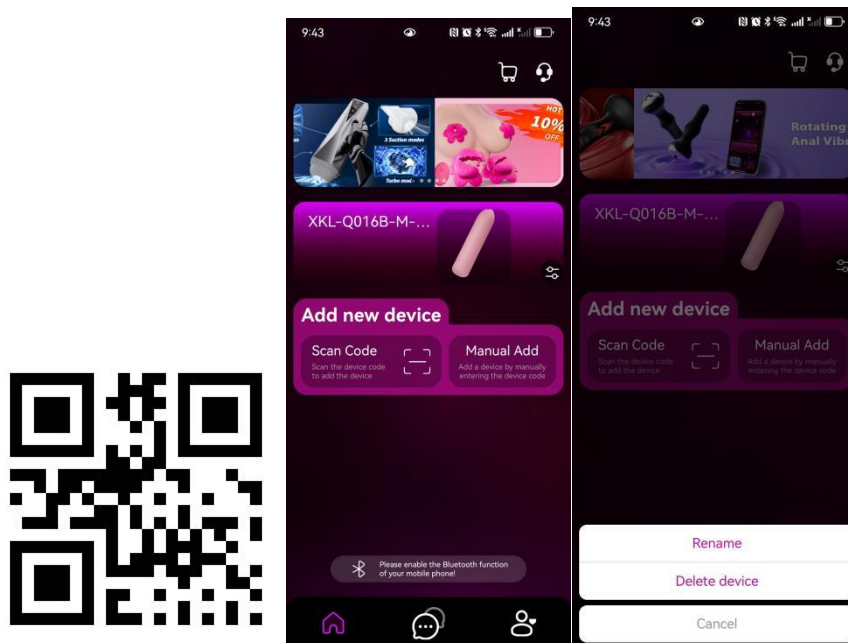

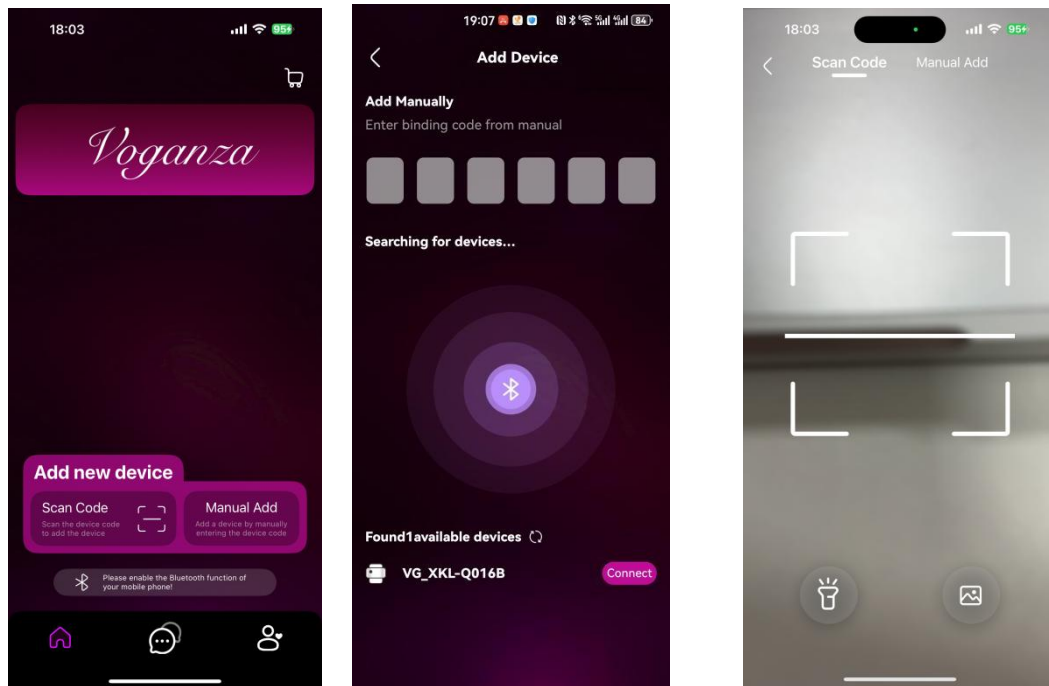

Software download QR code

Connection steps:

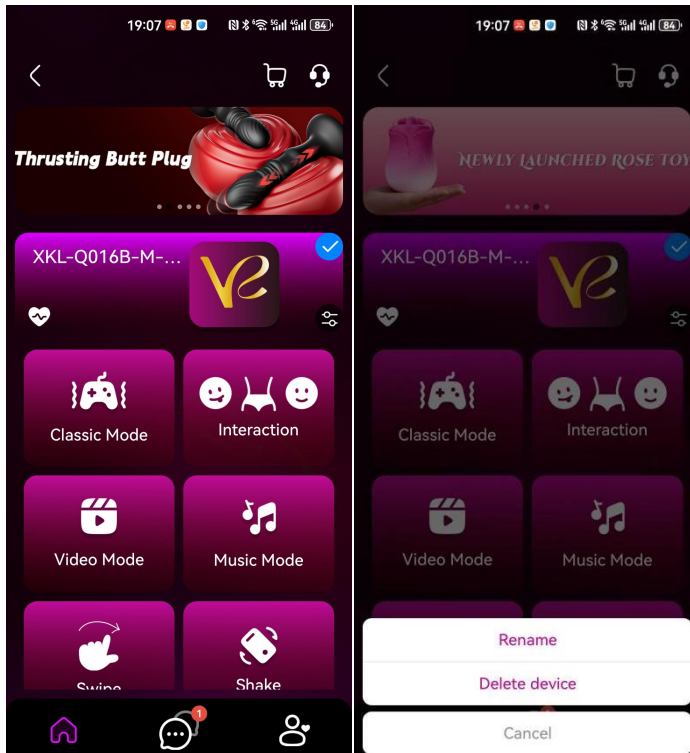

- 1、 After scanning the QR code with your phone's QR code, open the scanned download link in your phone's browser, and then select the corresponding device to download the software on the download page.;

- Upon entering the app's home page for the first time, a Bluetooth permission prompt will appear. Tap "Allow", then tap the "Add Device" button at the bottom of the page. After being redirected, you can pair the device by entering the 6-digit device number "786404", searching for the Bluetooth name "Q-015-0076 、 Q-015-0076CP", or scanning the product QR code. Once successfully bound, you can select various control modes to start remotely controlling the device.

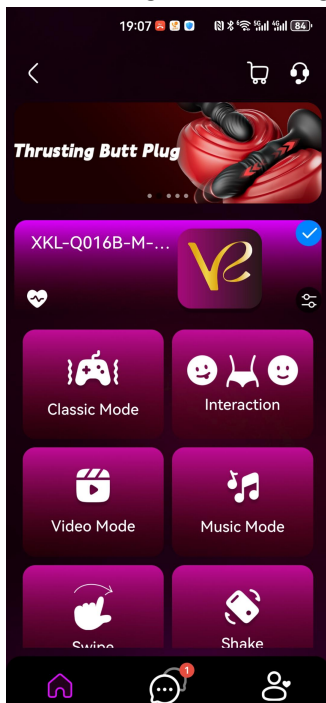

- On the software's homepage, clicking on the corresponding device in the device list will switch to the functions supported by that device. Additionally, clicking the edit button on the device card will bring up the editing function, allowing you to delete or rename the device.;

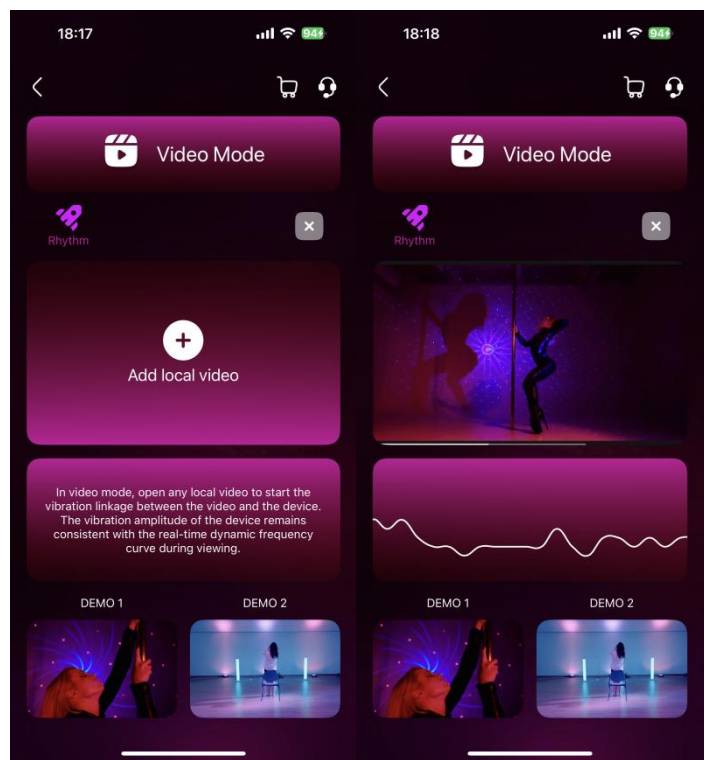

Device Play:

- 1、 Classic Mode: There is at least one set of buttons. Clicking the corresponding button will display a dynamic animation, and the device will activate the corresponding vibration level. Clicking the button again will deactivate the vibration level.;

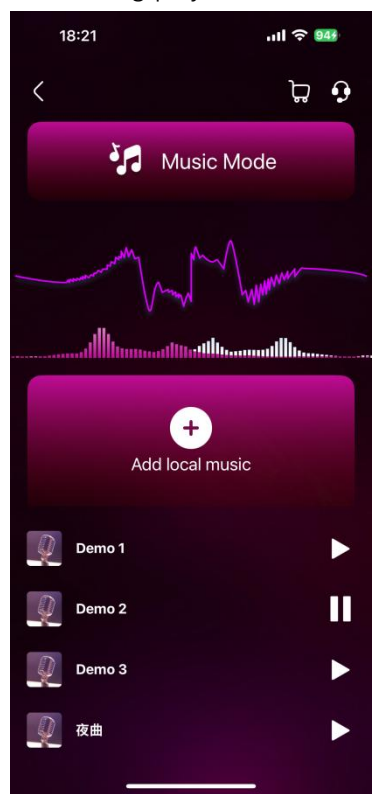

- 2、 Video Mode: After switching to video mode, you can select local videos to play. At this time, the device's vibration and other functions can be synchronized according to the video's sound or content; (Android supports synchronization with online videos. Simply

enter the video websites you usually watch and you can play the videos there to achieve video synchronization)

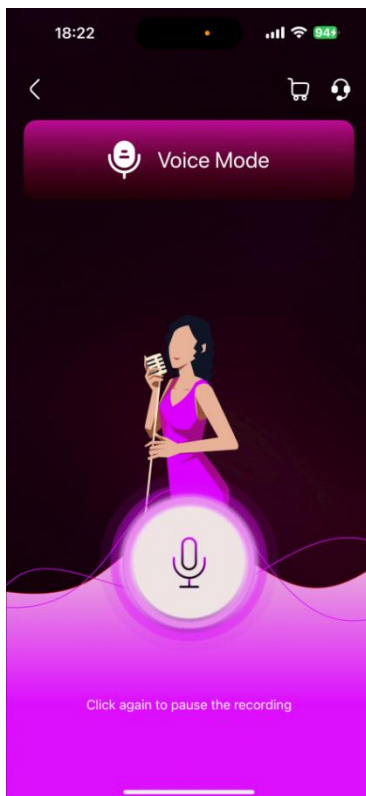

3、Music Mode: Controls the device's vibration intensity by recognizing the rhythm of the music being played.;

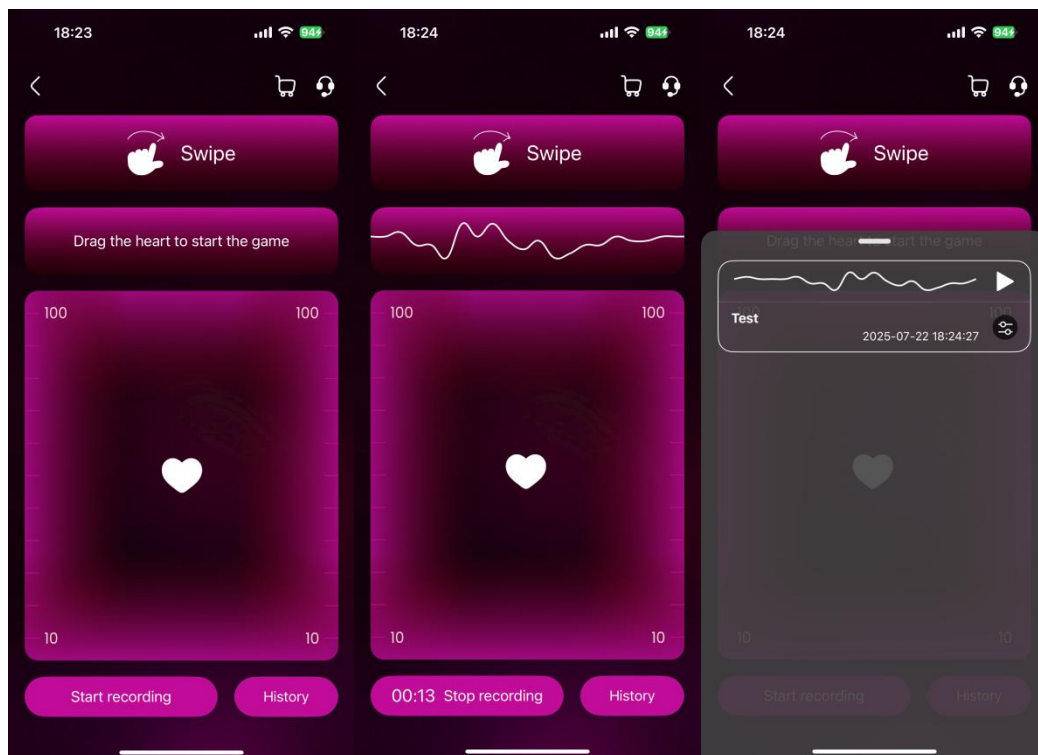

- 4、 Shake mode: Control the vibration intensity by shaking your phone.;

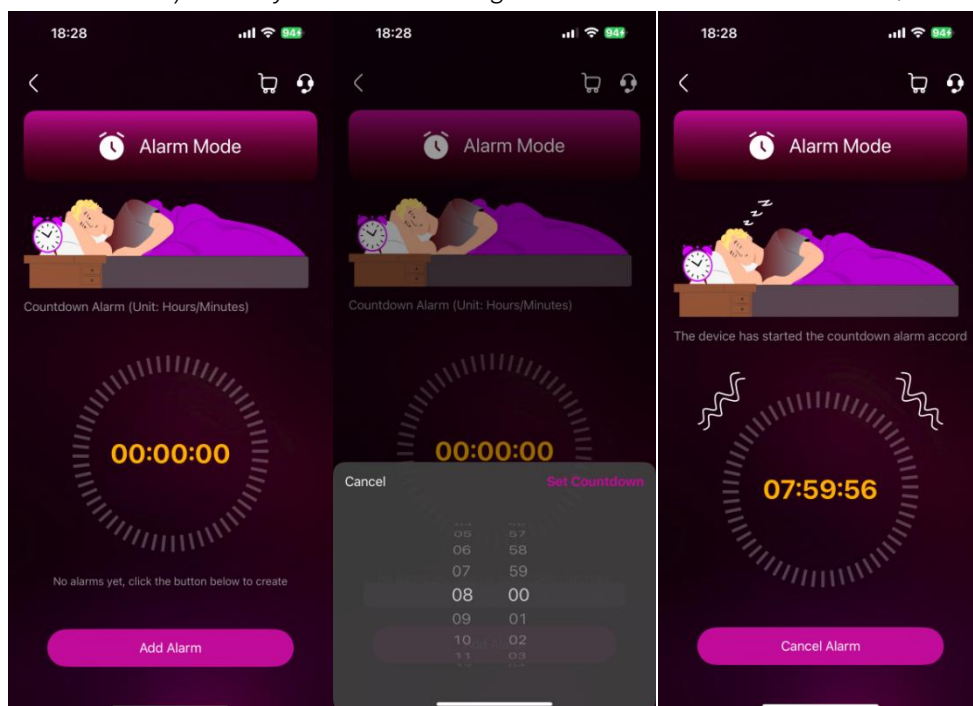

- 5、 Sound mode: The vibration intensity is controlled by the phone's microphone, which detects the volume of ambient sounds.;

- 6、Swipe mode: Drag the heart button on the screen to control the vibration intensity of the device. You can also click to start recording. After swiping, the recording will be saved and can be played back directly from the recording history page later.;

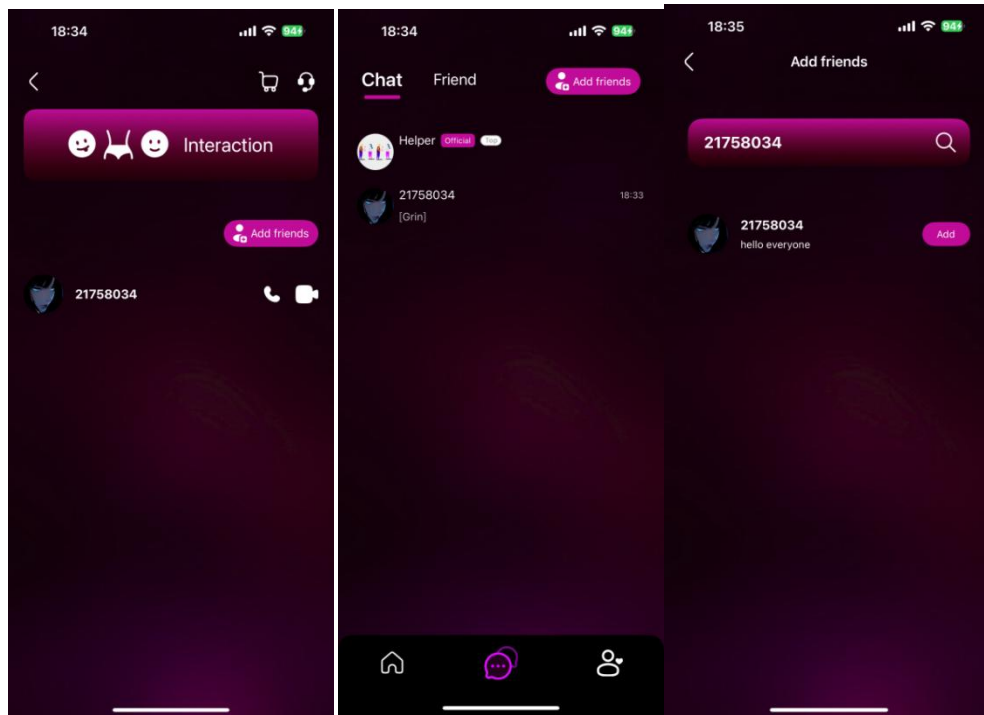

- 7、Alarm Clock Mode: Click the "Add Alarm" button to set a countdown alarm. Once set, the toy will start counting down according to the time displayed on the disc (unit: hours/minutes). The toy will start vibrating when the countdown reaches 0.;

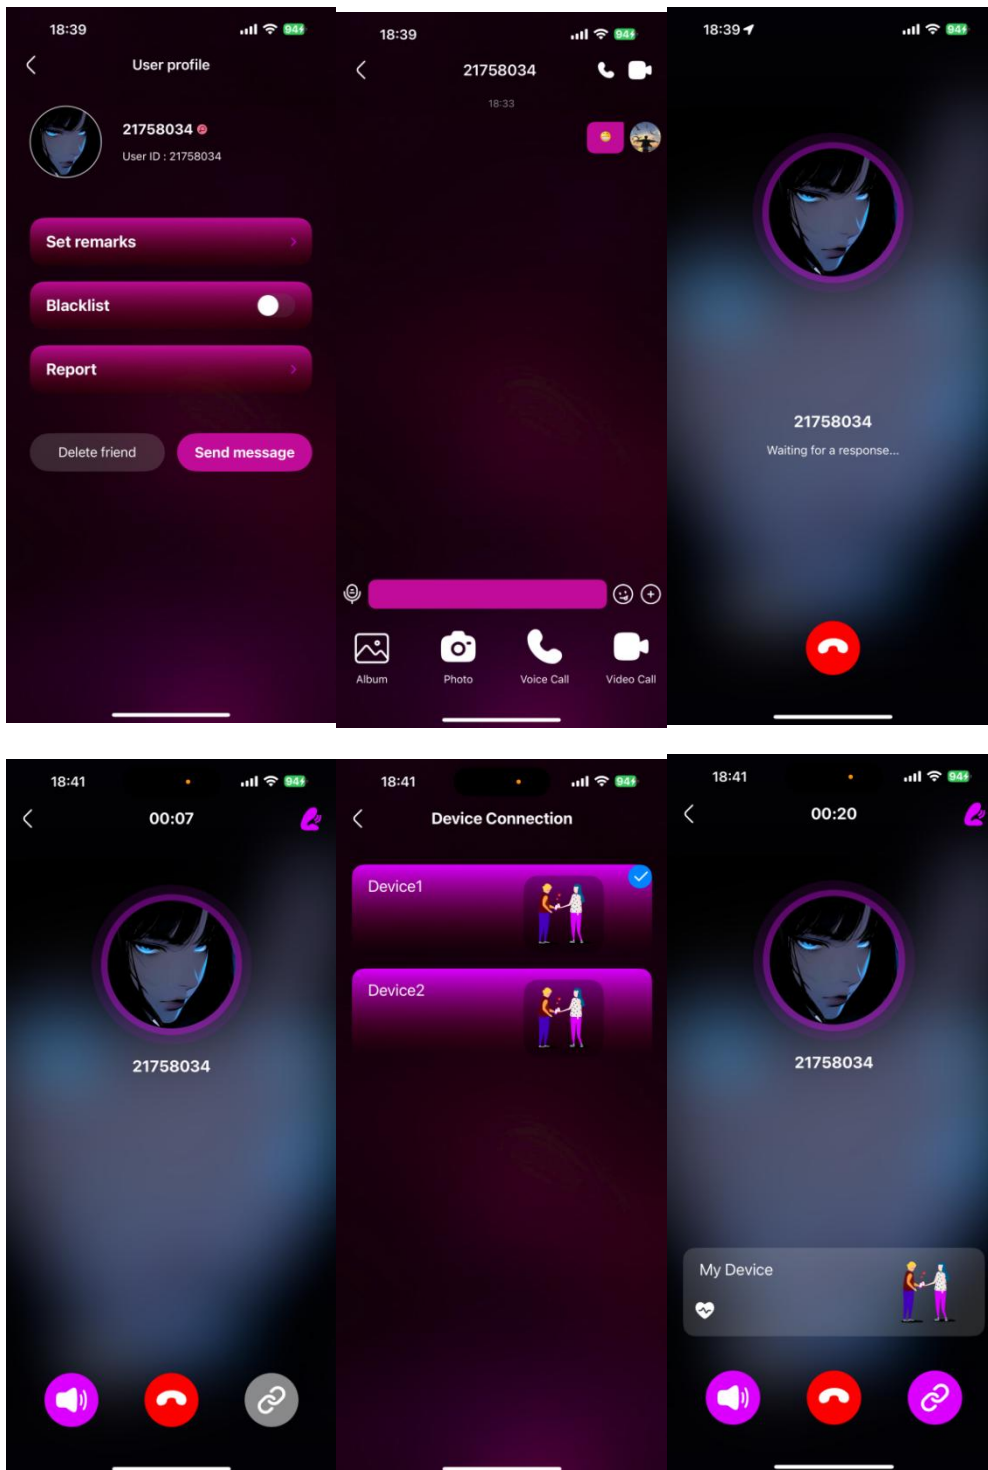

Interactive gameplay:

1、Click the chat button at the bottom of the software's homepage to access the friends and messages page, or enter the interaction mode from the device mode. Click the "+" icon to access the add friends page, enter the other person's ID to search for them, and click the add button to send a friend request. Once the other person accepts the friend request, the added friend will appear in their friend list.;

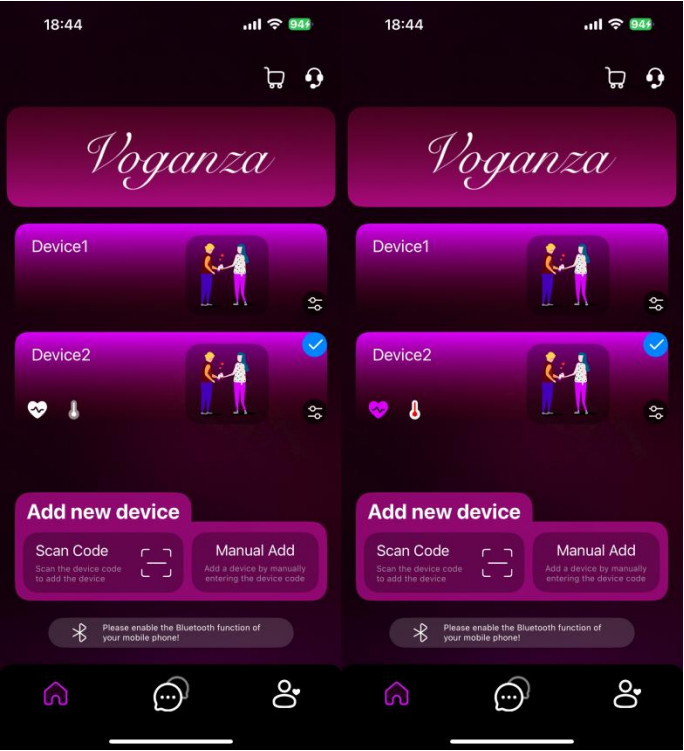

2、Clicking on a friend will take you to their profile page, where you can send messages and perform other actions. At the top right of the message sending page are voice and video call buttons. Clicking the call button will send an interaction invitation to the other person if they are online. After accepting the invitation, both parties can enter the remote interaction page. Clicking the device button in the upper left corner will take you to the device switching page, allowing the other person to control different devices. Clicking the remote control button at the bottom will bring up the remote control page, which supports functions such as vibration, heating, and extension to remotely control the other person's device.;

Other ways to play:

Heating, electric shock, critical strike, sound, etc.: If the bound device has any of these functions, they will be displayed at the bottom of the device card on the software's homepage. Clicking the corresponding shortcut button will control whether the corresponding function is turned on or off.;

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
