

XTRATECH

TABLET X11MK87

User Manual

Precautions on Volume Level Usage

Warning: Exposure to high sound volume levels from any source for prolonged periods may affect your hearing. The higher the sound volume, the faster hearing is affected.

To protect your hearing:

- Limit headphone/earphone use at high volume
- Avoid increasing volume to block background noise
- Lower volume if you cannot hear people around you

To prevent possible hearing damage, do not listen at high volume levels for prolonged periods.

Safety Instructions for Responsible Adults

This device is not a toy. As with all electrical products, safety precautions should be observed during handling and use to prevent electric shock. Parents should regularly check the Tablet (including the power adapter) for damage.

Battery Warning

Do not attempt to replace the internal rechargeable lithium polymer battery. Replacing it with an incompatible type may cause material damage or explosions.

Medical Devices

This device may interfere with pacemakers and other medical devices. Always maintain a distance of at least 20 cm.

- Read this guide carefully before using your device
- All images and illustrations are for reference only.

The actual product may vary.

Description

- 1 Volume Buttons
- 3 Microphone
- 5 Flash
- 7 Headphone Jack
- 9 Front Camera
- 11 Speakers

- 2 Power Button
- 4 Speakers
- 6 Card Slot
- 8 Rear Camera
- 10 USB-C Connector

Card Installation

Power off your device before inserting or removing a card.

Charging the Device

This device works with most USB adapters and a USB Type-C cable. Use a compatible charger with output no less than 18W.

Note: It is recommended to use a compliant charger. Using other chargers may damage the equipment.

To extend battery life, we recommend charging to at least 30%~50% capacity each time.

FCC Statement

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Specific Absorption Rate (SAR) information:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health.

FCC RF Exposure Information and Statement: The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. This device has also been tested against this SAR limit.

This device was tested for typical body-worn operations with the back of the device kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the device. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.
