Product parameters

Name: Magnetic Wireless Charging Power Bank 5000mAh 22.5W

Battery Capacity: 5000mAh

Battery Quantity: 546280 3.85V 5000mAh

Battery Type: Polymer lithium-ion battery

Type-C Input: 5V DC 3A, 9V DC 2A (Max 18W)

Type-C Output: 5V DC 3A, 9V DC 2.22A, 10V DC 2.25A (SCP), 12V DC 1.67A (PD, Max 20W/22.5W)

Wireless Output: 5W / 7.5W / 10W / Max 15W

Material: PC + ABS (Fireproof Material)

Common knowledge of safety maintenance

If used frequently, it can keep the electrons of the battery cell in the best moving state.

If not used for a long time, please charge 50% of the battery and store it.

If not used frequently, please remember to charge and discharge the product every three months.

Any product must be used correctly in a safe environment, especially electronic products, and attention must be paid to safe use of electricity.

When you find that the battery level display is not accurate, please press the cycle of fully charged, fully discharged, fully discharged, and then charged again.

背面

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
