Precautions

- Before using the product, please ensure that the power cord is safely grounded. A 2A data cable and power supply are required.
- The maximum design capacity of the water tank is 300 milliliters. Do not exceed the maximum water level indicated by the "MAX" mark on the outside of the water tank, as this may affect the spray effect or cause leakage and damage the machine.
- Ensure that the aromatherapy machine is placed on a stable horizontal surface and away from flammable materials to prevent accidental fires.
- Use filtered water in the water tank of the fragrance machine to avoid the damage of impurities in the water to the spray mechanism.
- The sound produced during the operation of the water tank is normal, indicating that the water tank is functioning properly.
- When the product is not in use for a short period of time, please unplug the power cord. If the machine is not in use for a long time, unplug the power cord, wipe the inside of the machine clean with water, and store it in a suitable location.
- Regularly clean the product after use.
- Store the product out of reach of children.
- Do not tilt or invert during use to avoid damage to internal functions due to overflow.
- When using the atomization function in this machine, the water free detection will automatically power off for protection, and all functions will be turned off.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures:

- ☐ Reorient or relocate the receiving antenna.
- ☐ Increase the separation between the equipment and receiver.
- ☐ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ☐ Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not expressly approved by the manufacturer could void your authority to operate it.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body
