

尺寸:50*70mm

Children's smart companion T89

Quick Start Guide

Please read the instruction manual carefully before use to ensure correct installation and quick operation. Product color may vary slightly from the actual product.

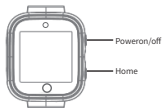

I. Preparation Before Use

1. Check that the device model is correct and that all accessories are complete.
2. Install the mobile app. For app details, please consult your dealer.

II. Powering On/Off

1. Powering On: Press and hold the power button to power on the watch from the power-off position.
2. Powering Off: The watch can be powered off remotely via the app or through the settings menu while it is in normal working status. If the watch is not connected to the app, you can power it off by pressing and holding the power button.

III. Introduction

Note: The actual product shall prevail.

IV. download APP

1. Scan the QR code to download the watch app Setracker2. The app QR code can also be found on the watch's app download page.

2. Registration and Login Follow the instructions in the app to register an account and log in.

3. Binding your watch to your app account: After successful account registration, bind your watch by scanning or manually entering the registration code, which can be found on the watch app download page. Then proceed to the binding settings.

V. Introduction to Some Watch Functions

1. Location: View real-time location on the app map.
2. Weather Forecast: The watch automatically updates weather information.
3. Voice Chat: Enables voice conversations between the watch and the app.
4. Tracking: View historical tracking data.
5. Safe Zone: Set up to 3 safe zones; an alarm will sound if the watch leaves the designated area.

6. Alarm: Set up to 3 alarms.
7. Operating Modes: 3 operating modes, default is normal mode.
8. Remote Power Off: After the watch is powered on and working normally, it cannot be powered off by pressing a button; it can only be powered off remotely via the app.

Note: If consumers use a power adapter, they should purchase a compatible power adapter that has obtained CCC certification and meets the standard requirements.

The maximum electromagnetic radiation specific absorption rate (SAR) of this product is 2.0W/kg, which meets the requirements of national standard GB21288-2022.

VI. Troubleshooting

The watch cannot connect to the server upon first power-on, and the APP displays "device not connected to the network." Please check:

1. There are two situations where registration fails: a. The message indicates that the device number does not exist or has already been registered. You must contact your distributor for assistance.
2. The message indicates that the account has already been registered. The customer only needs to use a different account to register again.

Note: This instruction manual is for reference only. The right of interpretation belongs to our company!

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
