Start

recording

- Tap the Record/Power button; the screen will display the recording status, indicating that recording has started.
- Recording completed
 - Tap the Record/Power button again; the screen will return to the standby icon, indicating that the recording has finished.

·real time synchronization

- When the device is connected to the mobile app via Bluetooth, the recorded audio is uploaded and synchronized in real time to the mobile app, allowing users to view the recording immediately.

· Bluetooth offline synchronization

- When the device is disconnected from Bluetooth or in an offline state, the audio recordings made by the device will be temporarily saved locally on the device. Once the device and the app re-establish a Bluetooth connection, the stored recording files will be automatically uploaded and synchronized to the mobile app, preventing any loss of recording data.

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help important announcement

Radiation Exposure Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
