CCTV Camera

Product Manual V3.2

Read carefully before using the device and keep it for subsequent use

Download

Search for "V380 Pro" in the APP Store or scan the QR code below to download and install the V380 Pro APP.

Scan the QR code to download the V380 Pro APP

Electronic manual

Use the V380 Pro APP to scan the QR code on the camera to add the device and follow the instructions to view the electronic manual of the device.

1

Reset the camera

1. Power on the camera. (For 4G camera, please ensure the SIM card has been inserted into the camera before power on.)

2. Press and hold the reset button for several seconds, the camera will prompt "Reset completed".

Note: The position of the reset button and SIM card slot is for reference only, depending on your device.

2

Add camera

1. Open APP to register your account and log in.

2. Click the "+" icon and scan the QR code on the device.

Note: Each APP version may be different, please follow the prompts in the latest version of APP to set up the camera.

3

After scanning the QR code on the device, please select the corresponding network configuration method according to your network configuration interface.

Wi-Fi

1. Bluetooth network connection, please check page 6.

2. QR code network connection, please check page 8.

3. AP hotspot connection, please check page 10.

4G

Please check page 14.

4

Bluetooth network connection

Note: Turn on your phone's Bluetooth before you add a camera

1. Connect your mobile phone to 2.4GHz Wi-Fi first.

2. Confirm the connected Wi-Fi and enter the password.

6

3. The device will prompt "Network configuration received, connecting".

Please be patient when using the device for the first time.

4. After the device prompts "Network connected" - "Bind successfully, camera ready", it means that the device has connected to the network and is successfully added.

7

QR code network connection

1. Please select the Wi-Fi that the device needs to connect to, and enter the correct password.

Note: The device only supports 2.4GHz Wi-Fi. Please select Wi-Fi without "5G". The name of Wi-Fi should not contain special symbols.

8

2. The APP will generate the QR code and then use camera to scan this QR code.

3. After the device identifies the QR code successfully, it will prompt "Network configuration received, connecting". Please be patient when using the device for the first time.

4. After the device prompts "Network connected" - "Bind successfully, camera ready", it means that the device has connected to the network and is successfully added.

* Adding completed" is on page 13

AP hotspot connection

The device also supports the "AP hotspot connection".

Please ensure the device has been reset.

1. Click "+" in the upper right corner, swipe up the bottom and select "Wi-Fi Camera" - "AP hotspot connection".

10

2. Select the Wi-Fi that the device needs to connect to, and enter the correct password.

(For iOS, if you want to connect to other Wi-Fi, please connect your mobile phone to the Wi-Fi you need and then return to the APP to refresh)

3. Connect to the hotspot of the device based on APP instructions.

Note: You can find the corresponding ID on the device body tag which is for the hotspot's name.

* Adding completed" is on page 13

11

4. Enter the four-digit numbers prompted by the voice of the device in turn to add the device.

5. After the device prompts "Network connected" - "Bind successfully, camera ready", it means that the device has connected to the network and is successfully added.

12

Adding completed

After the camera prompts "Network connected" - "Bind successfully, camera ready", you can create a group for the camera and set the name.

13

Add 4G camera

After the camera is successfully networked, it will appear online and you can create a group for the camera and set the name.

14

APN settings

1. Click "APN information settings" to set APN parameters.

2. After the setting is complete, click "Next".

3. Short press the reset button on the device for one second. The device's yellow indicator light will flash or the device will prompt a sound of "Beep", which means it has entered the APN setting mode.

If the 4G camera is offline, please try to set APN. Please contact your SIM card operator for APN information.

15

4. The APP will generate the QR code and then use the device to scan this QR code.

5. After the device identifies the QR code successfully, it will prompt a notification sound.

16

Cloud service

You can enjoy these special functions after subscribing the cloud service on the [Cloud] interface of the V380 Pro APP.

* Cloud service is a value-added service that requires payment.

17

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Mobile device

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
