Metal Cover

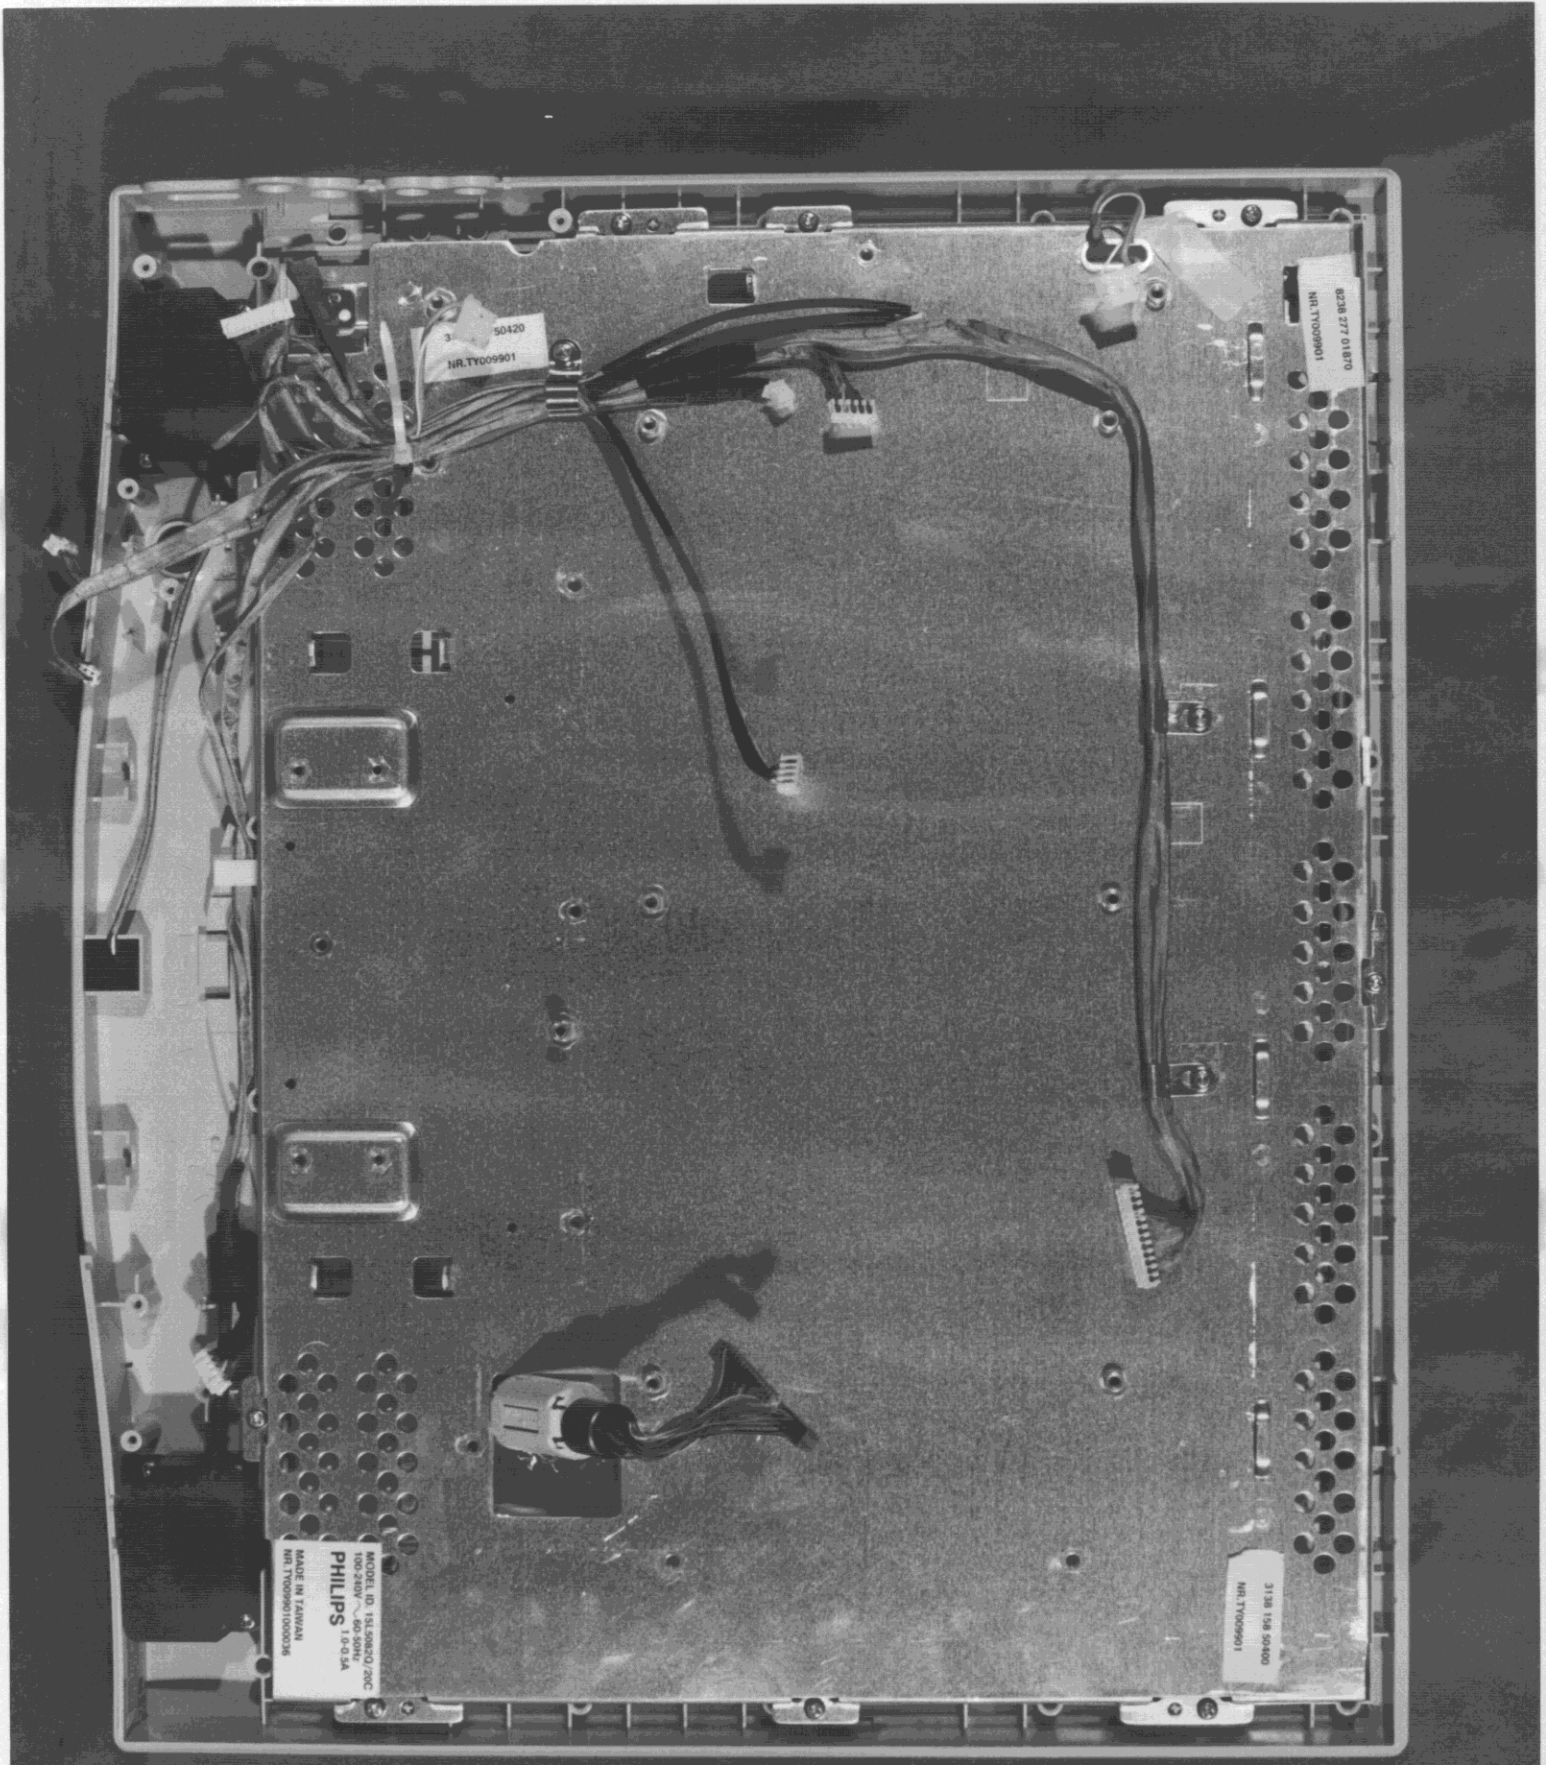

A black and white photograph showing the internal hardware of a Philips 486 computer. The system is housed in a metal case with the front panel removed. The motherboard is populated with a 486-class CPU, several RAM modules, and various expansion cards, including what appears to be a graphics card and a sound card. A power supply unit is mounted on the left side of the case. Numerous cables are visible, connecting the power supply, drives, and expansion cards to the motherboard. The Philips logo and model information are visible on a label at the bottom of the case.
