Subject: Re: FCC ID: A3L05DRAGON2

Dear Gregory,

How have you been! Time was really fast almost we stand at the end of 2006 meanwhile coming the Christmas.

Regarding to your points of review for subject ID, I reply you as below;

1. Please provide the FCC ID's of the support equipment, or else indicate if they were approved under DoC.

(Ans) According to your recommendation, we did indicated the approval status(FCC ID or DoC) for supported equipment to the table 1.5 in the test report. Please confirm the attached #1 Test report.

2. The block diagram submitted with the application is actually a wiring diagram. Please submit a block diagram that shows all of the clocks / oscillators.

(Ans) For your reference, we send you the block diagram as attached #2.

3. The AC Line Conducted test set up photos appears to show that the EUT is not connected to the pc (the radiated emission test set up photos show that it is connected to the EUT). Please address.

(Ans) EUT have been connected to the PC during the AC conducted emission test.

But, photos in the page 19 of test report seems to be only on USB cable was connected to the PC even EUT have two cable ports.

A reason of that, measurement of conduction for #1 USB was impossible(PC recognize the #2 at first) when two cables connected with same time basically, so we have to disconnected #2 USB during the testing for #1 USB cable.

But, we could measurement of conduction test for #2 USB whatever #1 was connected to the PC or not.

Please refer to this special situation.

I hope you can accept this feedback, then I can receive the grant as soon as possible.

Sincerely..

12/27/2005
