A Guide to Digital TV

- **What is Digital Television?**

Digital television (DTV) is a new way of transmitting high quality video and audio to your TV set. Using DTV, broadcasters can transmit high definition TV (HDTV) images, Dolby digital surround audio, and new services such as multicasting (transmitting more than one program on the same TV channel) and datacasting. Several of these services can be combined into a single digital broadcast.

Digital Television Services

- **Digital Picture Quality**

DTV programs are transmitted in two different formats. The first is Standard Definition Television (SDTV) and the second is High Definition Television (HDTV).

- **SDTV** program formats include 480-line interlaced (480i) and 480-line progressive (480p) video. 480i programs are essentially a digital version of our current analog TV programs, while the 480p format offers improved image detail over 480i. Some 480p programs are broadcast in widescreen and are comparable to progressive-scan DVD movies in image quality.

- **HDTV** program formats include 1080-line interlaced (1080i) and 720-line progressive (720p). Both HDTV formats are always broadcast in widescreen, and offer much higher picture quality than SDTV.

- **Dolby Surround Sound**

With DTV, you can listen to a variety of Dolby digital audio formats from Dolby Surround 2.0 to Dolby Digital 5.1 surround, using your home audio system. Many HDTV programs are now broadcast with DD 5.1 soundtracks.

CableCARD and Digital Cable Ready TVs

CableCARD and Digital Cable Ready TVs are the products of a new digital cable standard. This new standard is called OpenCable and it is a concerted effort to standardize the digital cable service network interface in North America. For more information, please refer to www.cablelabs.com.

Digital Cable Ready TVs are equipped with a proper digital cable tuner to receive digital cable signals from your local cable service provider. They are also designed to work with digital cable card modules (PCMCIA card modules called CableCARDs). These PCMCIA card modules or CableCARDs will be provided by your local cable service provider after a proper subscription process.

The provided CableCARD from your local cable service provider needs to be inserted into the CableCARD slot of a Digital Cable Ready TV. Please refer to page 21 for how to insert the CableCARD. A digital set-top box which used to be provided by the cable service provider is no longer needed with Digital Cable Ready TVs and CableCARDs.

When CableCARD is inserted into the slot, the TV screen will show the message that CableCARD is inserted and tries to download necessary data such as channel information or subscription information from your digital cable service provider. When you insert CableCARD for the first time, this process may take a few minutes depending on the amount of data your cable provider needs to send. During this process the digital cable service provider or CableCARD may display messages on the TV screen to help or give you further information.

Please contact your local cable provider for more information on service availability and how to acquire a CableCARD.

NOTE

- *This television receiver supports the copy protection system regulated by DTLA (Digital Transmission Licensing Administrator). It should be noted that copy protected content may not be viewable depending on your particular connections.*

Q&A

1. Is the antenna I use for existing TV reception good enough for DTV?

Over-the-air (OTA) digital TV broadcasting uses the same channels as analog TV and works well with many existing TV antennas. However, DTV broadcast channel assignments are different than analog channels. You should find out whether your local DTV broadcasts are on VHF (channels 2-13) or UHF (channels 14-69) to see if you need a different antenna.

If your DTV channels are on UHF and you already get good UHF reception, your present antenna may work fine. The same holds true for VHF DTV reception. Note that in some markets, both VHF and UHF channels are used for DTV broadcasts.

You can find out the latest DTV channel assignments for your area by browsing selected Internet web sites such as www.titandtv.com, www.10000watts.com, and www.fcc.gov.

2. How difficult is it to receive DTV signals indoors?

This depends on whether your local DTV stations are running full power or not and how close your location is to the transmission tower. DTV receivers do not require as much signal as analog TV receivers to produce high-quality images and sound.

Once the DTV signal level exceeds a certain threshold at the receiver, the digital video and audio data is decoded at the same quality it was originally encoded for broadcast.

This is a big advantage for DTV over analog TV - there is no noise, ghosting, static, or scratchy audio.

3. How can I connect an antenna in my townhouse, co-operative apartment, condominium, or apartment?

The Federal Communications Commission's OTARD Rule (part of the Telecommunications Act of 1996) allows residents of condominiums, townhouse, or members of neighborhood associations to put up outside antennas for reception of broadcast TV signals as long as those antennas are not located in common areas and are no more than 12' in height.

Residents of rental units (apartments, etc.) are not covered by the OTARD rules and will have to use indoor antennas to receive DTV broadcasts. It is possible that the landlord of an apartment complex can provide broadcast DTV signals via a master TV antenna system to each apartment.

4. Can I connect my DTV set-top receiver to my cable TV service?

Cable TV systems use a different method for transmitting digital TV programs that is currently incompatible with broadcast DTV set-top receivers. So you will still need to use an outdoor or indoor antenna to receive OTA broadcast DTV programs.

The good news is that you won't have to pay a monthly or per-program charge to watch OTA DTV and HDTV programs. They're free, unlike subscription satellite TV or premium cable TV. All you need is an antenna and a DTV set-top receiver to enjoy clear, sharp widescreen images and high-quality audio.

5. I hear a Clicking sound in standby mode.

You will hear the sound if you have set both ANTENNA (Air) and Cable to "Yes" in the TV Guide On Screen™ Setup.

However, do not worry about this since the sound comes from inside your TV while it receives data for your TV Guide.

SAMSUNG

Sound Control

Sound Control

Sound Control

You can control and customize the sound levels and settings of the TV with the remote control.

Adjusting the Volume

Press the VOL+ or VOL- button to increase or decrease the volume.

Using the MUTE Button

At any time, you can temporarily cut off the sound.

Press the MUTE button on the remote control.

The message "Mute" is displayed and the sound cuts off.

To turn mute off, press the MUTE button again or press either the VOL+ or VOL- button.

Customizing the Sound

The sound settings can be adjusted to suit your personal preference. (Alternatively, you can use one of the automatic settings. See next page.)

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Equalizer", then press the ENTER button.

Continued...

- 3 Press the ◀ or ▶ button to select a particular item to be changed.
Press the ▲ or ▼ button to increase or decrease the selected frequency.

Press the EXIT button to exit.

Notes

- If you make any changes to the equalizer settings, the sound mode is automatically switched to the custom mode.
- **L/R Sound Balance Adjustment**
To adjust the sound balance of the L/R speakers.
- **Bandwidth Adjustment (100, 300, 1K, 3K, 10K)**
To adjust the level of different bandwidth frequencies.

Using Automatic Sound Settings

Your TV has automatic sound settings ("Standard", "Music", "Movie", and "Speech") that are preset at the factory. You can select "Custom", which automatically recalls your personalized sound settings.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ENTER button to select "Mode".
Press the ▲ or ▼ button to select a particular item, then press the ENTER button.

Press the EXIT button to exit.

- Choose "Standard" for the standard factory settings.
- Choose "Music" when watching music videos or concerts.
- Choose "Movie" when watching movies.
- Choose "Speech" when watching a show that is mostly dialog (i.e., news).
- Choose "Custom" to recall your personalized settings.

Sound Control

Setting the SRS TSXT

TruSurround XT is a patented SRS technology that solves the problem of playing 5.1 multichannel content over two speakers. Trusurround delivers a compelling, virtual surround sound experience through any two-speaker playback system, including internal television speakers. It is fully compatible with all multichannel formats.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "SRS TSXT", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "Off", "3D Mono" or "Stereo", then press the ENTER button.

Press the EXIT button to exit.

NOTE

- Press the INFO button on the remote control to see the current status of sound settings.

Auto Volume

Each broadcasting station has its own signal conditions, and it is inconvenient to adjust the volume every time the channel is changed. "Auto Volume" automatically adjusts the volume of the desired channel by lowering the sound output when the modulation signal is high or by raising the sound output when the modulation signal is low.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Auto Volume", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "Off" or "On", then press the ENTER button.

Press the EXIT button to exit.

Sound Control

Choosing a Multi-Channel Sound (MTS) track Digital

The digital-TV transmission system is capable of simultaneous transmission of many audio tracks (for example, simultaneous translations of the program into foreign languages). The availability of these additional "multitracks" depends upon the program.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Multi-Track Options", then press the ENTER button.

- 3 Press the ENTER button to select "Preferred Language". Press the ▲ or ▼ button to choose the language (English, Spanish or French) you want, then press the ENTER button.

Press the EXIT button to exit.

Alternate method

Press the MTS button on the remote control.
You can listen in a language other than the favorite language by pressing the MTS button.

Choosing a Multi-Channel Sound (MTS) track **Analog**

Depending on the particular program being broadcast, you can listen to Mono, Stereo or SAP.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Multi-Track Options", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "Multi-Track Sound", then press the ENTER button.
Press the ▲ or ▼ button to select a setting you want, then press the ENTER button.

Press the EXIT button to exit.

Alternate method

Press the MTS button on the remote control repeatedly to select an external signal source.

NOTES

- Choose "Mono" for channels that are broadcasting in mono, or if you are having difficulty receiving a stereo signal.
- Choose "Stereo" for channels that are broadcasting in stereo.
- Choose "SAP" to listen to the Separate Audio Program, which is usually a foreign-language translation.

Sound Control

Choosing a Digital Sound Format Digital

Digital sound can be output from the rear-panel connector on your TV. The digital sound output is an optical connector labeled "Optical Out". After connecting an optical digital-audio component, you must specify the transmission format (Dolby or PCM, as appropriate to your digital audio component). See the owner's manual of your Digital Audio component for further information.

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Digital Output", then press the ENTER button. Press the ▲ or ▼ button to select "Dolby Digital" or "PCM", then press the ENTER button.

Press the EXIT button to exit.

Manufactured under license from Dolby Laboratories.
"Dolby" and the double-D symbol are trademarks of Dolby Laboratories.

Selecting the Internal Mute

When using a device such as a Home Theater or Amplifier with external speakers, you can set Internal Mute to On to cut off sound from the TV's internal speakers.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Internal Mute", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "On", then press the ENTER button.
Pressing the ▲ or ▼ button will alternate between "On" and "Off".

Press the EXIT button to exit.

NOTES

- The VOL +, VOL - and Mute buttons do not operate when the Internal Mute is set to On.
- When Internal Mute is on, only the Multi-Track Options, Melody, Sound Select, and SubWoofer menu are available in the Sound menu.

Sound Control

Setting the On/Off Melody

A melody sound can be set to come on when the TV is powered On or Off.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Melody", then press the ENTER button.
Press the ▲ or ▼ button to select "On" or "Off", then press the ENTER button.

Press the EXIT button to exit.

Setting up the Sub Woofer Output

After connecting a Sub Woofer Speaker (sold separately), you may set the activation, volume and cut-off frequency.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Sound", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Sub Woofer", then press the ENTER button.

- 3 Press the ENTER button.
Press the ▲ or ▼ button to select "On", then press the ENTER button.
Pressing the ▲ or ▼ button will alternate between "On" and "Off".

- 4 Press the ▲ or ▼ button to select "Volume" or "Freq.", then press the ◀ or ▶ button to change the value of the item.
 - Volume : adjust the volume of the Sub Woofer.
 - Freq. : adjust the Frequency in units of 10Hz for the best bass response in your room.

Press the EXIT button to exit.

NOTE

- Refer to page 27 for SubWoofer connection.

SAMSUNG

Special Features

Special Features

Setting the Function Help

Displays Help on the menu functions.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Function Help", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "On", then press the ENTER button.

Press the EXIT button to exit.

NOTE

- The function Help default setting is ON.

Menu Transparency Level

Adjusts the transparency of the menu screen.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Menu Transparency", then press the ENTER button.
Press the ▲ or ▼ button to select level, then press the ENTER button.

Press the EXIT button to exit.

Special Features

Using the V-Chip

Access to channels and programs is controlled by a password (i.e., a 4-digit secret code that is defined by the user). The on-screen menu will instruct you to assign a password (you can change it later, if necessary).

How to Change Your Password

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button. Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2 Press the number buttons to enter your current 4-digit pin number. (The default pin number for a new TV set is "0000".) The "V-Chip" menu is displayed.

- 3 Press the ▲ or ▼ button to select "Change PIN", then press the ENTER button.

- 4 Press the number buttons to enter your new 4-digit pin number. Re-enter your new pin number to confirm.

Press the EXIT button to exit.

NOTES

- The PIP doesn't function when the V-Chip is active.
- If you forget the pin number, press the remote control buttons in the following sequence, which resets the pin to 0-0-0-0: POWER (Off), MUTE, 8, 2, 4, POWER (On).
- The V-Chip function only works in RF, AV mode and S-Video mode.

How to Enable/Disable the Rating Controls

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.
Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2 Press the number buttons to enter your current 4-digit pin number.
(The default pin number for a new TV set is "0000".)
The "V-Chip" menu is displayed.

- 3 The "V-Chip" screen will appear. To enable the V-Chip feature, press the ENTER button so that the "V-Chip Lock" field is "On".
(Pressing the ▲ or ▼ button will alternate between "On" and "Off".)
Press the ENTER button.

Press the EXIT button to exit.

Special Features

How to Set up Restrictions Using the "TV Parental Guidelines"

The parental restrictions can be set up using either of two methods: The "TV Parental Guidelines" or "MPAA Rating".

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button. Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2 Press the number buttons to enter your current 4-digit pin number. (The default pin number for a new TV set is "0000".) The "V-Chip" menu is displayed.

- 3 Press the ▲ or ▼ button to select "TV Parental Guidelines", then press the ENTER button.

- 4** You can independently lock the TV ratings. The locked TV (FCC) ratings are indicated by the symbol "🔒". Press the ▲/▼/◀/▶ buttons and the ENTER button to activate the appropriate restrictions for TV (FCC) rating system. To unlock items that are locked, press the Enter button again.

TV-Y : Young children
 TV-Y7 : Children 7 and over
 TV-G : General audience
 TV-PG : Parent Guidance
 TV-14 : Viewers 14 and over
 TV-MA : Mature Audience

NOTE

- **Allow All** : Press to unlock all TV ratings.
- **Block All** : Press to lock all TV ratings.

Press the EXIT button to exit.

NOTES

- These categories consist of two separate groups: "TV-Y" and "TV-Y7" (young children through age 7), and "TV-G" through "TV-MA" (everybody else).
- The restrictions for these two groups work independently: If a household includes very young children as well as young adults, the TV parental guidelines must be set up separately for each age group. (See page 95.)

Special Features

How to Set up Restrictions Using the "MPAA Rating"

The Movie rating system uses the "MPAA" (Motion Picture Association of America) system, and its main application is for movies.

When the rating control is on, the TV will automatically block any programs that are coded with objectionable ratings (either "MPAA Rating" or "TV Parental Guidelines").

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.
Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2 Press the number buttons to enter your current 4-digit pin number.
(The default pin number for a new TV set is "0000".)
The "V-Chip" menu is displayed.

- 3 Press the ▲ or ▼ button to select "MPAA Rating", then press the ENTER button.

- 4 You can independently lock the movie ratings. The locked movie ratings are indicated by the symbol "Ⓜ".
Press the ▲/▼/ENTER buttons to activate the appropriate restrictions for movie rating system.
To unlock items that are locked, press the Enter button again.

Press the EXIT button.

NOTE

- Allow All : Press to unlock all movie ratings.
- Block All : Press to lock all movie ratings.

Important Notes About Parental Locks

Explanation of the MPAA and TV (FCC) Rating Systems:

TV (FCC) Age-Based Ratings

TV-MA

Mature audiences only. This program may contain mature themes, profane language, graphic violence and explicit sexual content.

TV-14

Parents strongly cautioned. This program may contain sophisticated themes, sexual content, strong language and more intense violence.

TV-PG

Parental guidance suggested. The program may contain infrequent coarse language, limited violence, some suggestive sexual dialog and situations.

TV-G

General audience. It contains little or no violence, no strong language, and little or no sexual dialog or situations.

TV-Y7

Directed to older children. Themes and elements in this program may include mild physical or comedic violence, or may frighten children under the age of seven.

TV-Y

All children. The themes and elements in this program are specifically designed for a very young audience, including children from ages two – six.

TV (FCC) Content Category

V	Violence.
S	Sexual content.
L	Offensive language.
D	Dialog sexual innuendo.
FV	Fantasy or cartoon violence.

MPAA Rating System (Movies)

G	General audience. No restriction.
PG	Children under 13 should be accompanied by an adult.
PG-13	Parental guidance suggested. Children under 13 should be accompanied by an adult.
R	Restricted. Viewers should be 17 or older.
NC-17	Not classified. Viewers should be 17 or older.
X	Adults only.
NR	Not rated.

- TV (FCC) ratings : The particular rating that you have selected will be locked (and indicated as a red "L" on a blue background). Also, all of the age-based ratings will be locked within the particular group (i.e., "group 1" or "group 2"). Suppose that the TV-G rating and all of its contents (V, S, L, and D) are locked. In that case, more restrictive ratings (TV-PG, TV-14, and TV-MA) and all of their contents (V, S, L, and D) are automatically locked as well.
- MPAA ratings : The particular rating that you have selected will be locked. In addition, more restrictive ratings will be locked as well.
- Neither TV (FCC) ratings nor MPAA ratings apply to news programs.

Special Features

How to Set up Restrictions Using Canadian English

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2 Press the number buttons to enter your current 4-digit pin number.
(The default pin number for a new TV set is "0000".)
The "V-Chip" menu is displayed.

- 3 Press the ▲ or ▼ button to select "Canadian English", then press the ENTER button.

4 Press the ▲ or ▼ button to select a appropriate restriction.

Press the ENTER button to activate the restriction selected.

The "⏏" symbol is indicated.

To unlock items that are locked, press the Enter button again.

Press the EXIT button.

NOTE

- *Allow All : Press to unlock all TV ratings.*
- *Block All : Press to lock all TV ratings.*

- | | |
|------------|---|
| E | Exempt programming includes...news, sports, documentaries and other information programming, talk shows, music videos, and variety programming. |
| C | Programming intended for children under age 8. |
| C8+ | Programming generally considered acceptable for children 8 years and over to watch on their own. |
| G | General programming, suitable for all audiences. |
| PG | Parental Guidance. |
| 14+ | Programming contains themes or content which may not be suitable for viewers under the age of 14. |
| 18+ | Adult programming. |

Special Features

How to Set up Restrictions Using Canadian French

- 1** Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

Press the ▲ or ▼ button to select "V-Chip", then press the ENTER button.

- 2** Press the number buttons to enter your current 4-digit pin number.
(The default pin number for a new TV set is "0000".)
The "V-Chip" menu is displayed.

- 3** Press the ▲ or ▼ button to select "Canadian French", then press the ENTER button.

- 4** Press the ▲ or ▼ button to select a appropriate restriction.
- Press the ENTER button to activate the restriction selected.
The "Ⓢ" symbol is indicated.
To unlock items that are locked, press the Enter button again.

Press the EXIT button.

NOTE

- *Allow All* : Press to unlock all TV ratings.
- *Block All* : Press to lock all TV ratings.

- E** Exempt programming includes...news, sports, documentaries and other information programming, talk shows, music videos, and variety programming.
- G** General.
- 8 ans+** 8+ General-Not recommended for young children.
- 13 ans+** Programming may not be suitable for children under the age of 13.
- 16 ans+** Programming is not suitable for children under the age of 16.
- 18 ans+** Programming restricted to adults.

Special Features

Viewing Closed Captions (On-Screen Text Messages) Analog

The Analog Caption function operates in either analog RF channel mode or external source mode. (Depending on the broadcasting signal, the Analog Caption function may operate on digital channels.)

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Caption", then press the ENTER button.

- 3 Press the ENTER button to select "Caption".

Press the ▲ or ▼ button to select "On", then press the ENTER button.

- 4 Press the ▲ or ▼ button to select "Mode", then press the ENTER button.
Press the ▲ or ▼ button to select submenu (CC1~CC4 or Text1~Text4) you want, then press the ENTER button.

Press the EXIT button to exit.

NOTES

- The default is "CC1".

CC1 : The Primary Synchronous Caption Service. These are captions in the primary language that must be in sync with the sound, preferably matched to a specific frame.

CC2 : The Special NonSynchronous Use Captions. This channel carries data that is intended to augment information carried in the program.

CC3 : Secondary Synchronous Caption Service. Alternate program-related caption data, typically second language captions.

CC4 : Special Non-Synchronous Use Captions. Similar to CC2.

Text1 : First Text Service. This may be various non-program related data.

Text2 : Second Text Service. Additional data, usually not program related.

Text3/Text4 : Third and Fourth Text Services. These data channels should be used only if Text1 and Text2 are not sufficient.

- The Caption feature only works in RF, AV and S-Video mode.
- The availability of captions depends on the program being broadcast.

Special Features

Viewing Closed Captions (On-Screen Text Messages) Digital

The Digital Captions function operates on digital channels.

NOTE

- "Caption Options" are available only when "Service 1 ~ Service 6" can be selected in "Mode".

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Caption", then press the ENTER button.

- 3 Press the ENTER button to select "Caption".

Press the ▲ or ▼ button to select "On", then press the ENTER button.

- 4 Press the ▲ or ▼ button to select "Mode", then press the ENTER button. Press the ▲ or ▼ button to select submenu (Service 1 ~ Service 6, CC1 ~ CC4 or Text1 ~ Text4) you want, then press the ENTER button.

- 5 Press the ▲ or ▼ button to select "Caption Options", then press the ENTER button.

- 6 Press the ▲ or ▼ button to select "Size", then press the ENTER button.
Press the ▲ or ▼ button to select the desired item in the Size menu, then press the ENTER button.
Set other listed options below using the same method as above.
Press the EXIT button to exit.

NOTE

- The availability of captions depends on the program being broadcast.
- "Default" means to return to the original caption options set by the broadcaster.

Size

This option consists of "Default", "Small", "Standard", and "Large". The default is "Standard".

Font Style

This option consists of "Default", "Style0 ~ Style 7". You can change the font you want. The default is "Style 0".

Foreground Color

This option consists of "Default", "White", "Black", "Red", "Green", "Blue", "Yellow", "Magenta", and "Cyan". You can change the color of the letter. The default is "White".

Background Color

This option consists of "Default", "White", "Black", "Red", "Green", "Blue", "Yellow", "Magenta", and "Cyan". You can change the background color of the caption. The default is "Black".

Foreground Opacity

This option consists of "Default", "Transparent", "Translucent", "Solid", and "Flashing". You can change the opacity of the letter.

Background Opacity

This option consists of "Default", "Transparent", "Translucent", "Solid", and "Flashing". You can change the background opacity of the caption.

Return to Default

This option sets each of "Size", "Font Style", "Foreground Color", "Background Color", "Foreground Opacity", and "Background Opacity" Color to its default.

Alternate method

Press the CAPTION button on the remote control repeatedly to select "On" or "Off".

Special Features

Setting the Port Selection Mode

Sets your port selection mode to Anynet, G-Link or RS232C.

The Anynet functions, the G-LINK™ and the RS232C functions of external devices cannot be operated at the same time. Use this menu to set your port selection mode.

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "Port Selection", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select "Anynet", "G-Link" or "RS232C", then press the ENTER button.

Press the EXIT button to exit.

NOTES

- The default setting for the port selection mode is "G-Link".
- Select the "G-Link" to operate an external device after connecting the IR Controller cable to the G-LINK™ terminal.
(Refer to the TV Guide On Screen™ manual and TV Guide On Screen™ Quick Setup Sheet for further information on G-LINK™.)
If you set the port selection mode to G-LINK™, Anynet and RS232C functions are not available.
- To download program listings, the TV Guide On Screen™ system needs to be able to change channels on your cable box when the TV is not in use. Please connect the supplied G-LINK™ cable to the G-LINK™ jack of the TV. After you connect the G-LINK™ cable you will be able to control your cable box using the TV's remote.
- To use Anynet or RS232C Function, set your port selection mode back to "Anynet" or "RS232C".
- For further information on Anynet's functions, refer to the "Anynet" manual.
- For further information on RS232C, refer to the "PROCEDURES FOR CONTROLLING A DLP DTV USING AN RS-232C CONNECTION" manual.

Using the CableCARD

This menu works with a CableCARD provided by a local cable service provider. Prior to accessing this menu, a CableCARD should be connected to the rear panel of the TV. For detailed connection instructions, refer to the "Connecting CableCARD" section on page 21 of this manual.

Displaying CableCARD related information

To access information on Status, Pairing, Network Setup of the CableCARD provided by the service provider in CableCARD menu.

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "CableCARD™", then press the ENTER button.

- 3 Press the EXIT button to exit.

Special Features

Using the CableCARD Setup Function

Sets up relevant CableCARD options.

CableCARD Reset

Resets CableCARD when the channels provided by CableCARD are not available.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "CableCARD™ Setup", then press the ENTER button.

- 3 Press the ENTER button to select "CableCARD™ Reset".

Channel List Reorganization

Deletes and reorganizes the channel list provided by CableCARD.

This feature should be used if you change or upgrade your CableCARD service.

- 1 Press the MENU button.
Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

- 2 Press the ▲ or ▼ button to select "CableCARD™ Setup", then press the ENTER button.

- 3 Press the ENTER button to select "Channel List Reorganization".

Special Features

Using Game Mode

When connecting to a game console such as PlayStation™ or Xbox™, you can enjoy a more realistic gaming experience by selecting Game mode.

- 1 Press the MENU button. Press the ENTER button to select "Input".

- 2 Press the ▲ or ▼ button to select "Edit Name", then press the ENTER button.

- 3 Press the ▲ or ▼ button to select a signal source to edit, then press the ENTER button.

- 4 Press the ▲ or ▼ button to select "GAME", then press the ENTER button.

Press the EXIT button to exit.

NOTES

- Game mode is only available for AV1, AV2, AV3, S-Video1, S-Video2, S-Video3, Component1 and Component2.
- For Component input, Game mode only supports a resolution of 480i.
- Since selecting Anynet cancels Game mode, to play a game, select Game mode again.
- You cannot rename an input port to which an Anynet device is connected after setting Anynet.
- To set the game mode of the input port (Composite/S-Video/Component), set Anynet again after connecting a game console.

Restrictions on Game Mode (Caution)

- To Disconnect the game console and connect another external device, cancel Game mode in the Edit name menu.
- If you display the TV menu in Game mode, the screen shakes slightly.
- In Game mode, the TV Guide On Screen™ Reminder function does not work.

Disabled Menus in Game Mode

In Game mode, you will not be able to use some items in the Input, Picture, Sound, Channel, Setup and Listings menus.

1. Input: Anynet and D-Net are disabled.
2. Picture: All functions are disabled except for the Contrast, Brightness and the Reset function of the P.Mode
3. Sound: Sound Select is disabled when Game mode is selected (because PIP is disabled)
4. Channel: (Disabled regardless of Game mode)
5. Setup: Disabled when Game mode is selected - Caption, ColorWeakness, Menu Transparency, Function Help
6. Listings: (Disabled regardless of the Game mode selection)

Using TV Guide On Screen™

- 1 Press the MENU button. Press the ▲ or ▼ button to select "Listings", then press the ENTER button.

- 2 Press the ENTER button to select "TV Guide On Screen™".

- If you decide not to setup the Guide now, this reminder screen will appear each time you power On the TV (except if you selected "Don't remind me again").

Press the EXIT button to exit.

NOTES

- In order for the Guide to receive channel lineup & listings successfully, "Auto Program" must be performed at least once, prior to powering off your TV. The Guide displays the channels that are programmed during "Auto Program".
- Refer to TV Guide On Screen™ manual for details.

SAMSUNG

Using the D-Net

Using the D-Net

What's D-Net?

This refers to a home network consisting of devices supporting D-Net (IEEE1394) connections (such as digital VCRs and Set-Top Boxes) for digital audio and video data.

The D-Net (IEEE1394) standard for the High Performance Serial Bus is a serial data transfer protocol and interconnection system.

D-Net (IEEE1394) interface is capable of supporting various high-end digital A/V applications, such as A/V device control and signal routing, Digital Video (DV) editing, home networking.

How to connect compatible IEEE1394 Devices

Connecting compatible IEEE1394 devices is simple using this TV equipped with IEEE1394. A secure digital interface is provided to other digital home entertainment units, such as a DTV, a Set-Top Box, an AVHDD, a digital VCR, a MPEG Camcorder.

1 Connect the IEEE1394 cable from the jack of the component with IEEE1394 capability, such as a Set-Top Box or a Digital VCR to the IEEE1394 jack on the TV.

2 Press the D-Net button on the Remote Control.

3 Select the D-Net (IEEE1394) Compatible device.

NOTES

- To access D-Net (IEEE1394) in the menu, see page 117.
- The IEEE1394 interface is equipped with a copy protection standard called Digital Transmission Content Protection (DTCP).
- The name of 1394 Jack may be different according to the manufacturer (i.e., DTV LINK or i.LINK).
- The supported video format is MPEG-2 Digital video. Other digital video formats (e.g. DV format...) are not supported.
For audio, Dolby Digital and MPEG Digital Audio are supported, other digital audio formats (e.g. MP3, DTS) are not supported.
- Because IEEE1394 is an evolving technology, it is possible that some or all of the connectivity features of a device you connect to the TV through the IEEE1394 port may not operate.
- There may be a single IEEE1394 jack depending on the specifications of the external device.
- If only a single IEEE1394 jack is supported, connect the cable to the last jack.

When Connecting D-Net (IEEE1394) Compatible devices

- 1** The last device in the chain may not be looped back to the TV as the TV may not be able to work with the other devices.
To connect two or more D-Net (IEEE1394) Compatible devices, follow the diagram below.

A maximum 10 D-Net (IEEE1394) Compatible devices can be connected.

Do not connect D-Net (IEEE1394) Compatible devices in a way that creates a loop.

NOTE

- IEEE1394 cables longer than 14.76 feet (177.16 inches) should not be used between devices.

Using the D-Net

Connection Options

There are two different connection options for connecting D-Net (IEEE1394) compatible devices. Select the most suitable option according to your network of audio/video products.

The Direct Device-To-Device Option

D-Net (IEEE1394) permits the chaining of devices, unlike analog audio and video connections where each device needs to be individually connected to the TV. This allows you to connect your D-VHS to your 1394 Set-Top Box only, then connect the Set-Top Box to the TV. More IEEE1394 devices can be added to the chain as needed. Each video device can be viewed on the TV's D-Net and information can be sent from any IEEE1394 device to other compatible devices.

The Hub Connection Option

D-Net (IEEE1394) also permits connecting devices using the TV as a hub. Each device is capable of sending information, which may include audio and video, to any other device on the network.

4-Pin and 6-Pin Connectors

Two different types of connectors are used for IEEE1394 terminals and cables, a 4-pin and a 6-pin.

The 4-pin connector sends digital audio, digital video and digital control signals to and from devices. The TV has two available 4-pin connection jacks, of which two are at the back.

The 6-pin connector also sends digital audio, video and control signals, but can also send low voltage electrical power. There are no 6 pin connectors on this TV.

It is not possible to directly connect a 6-pin connector to a 4-pin jack, and vice versa. In order to connect a 6-pin device to a 4-pin device, an adaptor or adaptor cable is required, easily purchased from an electronic or computer store.

Connecting a 6-pin device (such as a camcorder) directly to the TV, (if it is designed to receive electrical power from another 6-pin device) will require that the camcorder is directly connected to the AC supply, or that the camcorder's battery power is used.

Using the D-Net

Selecting a D-Net device

Prior to viewing an IEEE1394 device, it first needs to be selected in the D-Net Device List.

-
- 1 Connect the relevant D-Net (IEEE1394) Compatible device in the list.
(See "How to connect compatible IEEE1394 Devices" on page 112)

-
- 2 Press the D-Net button on the remote control.

- The TV and all other devices connected on the D-Net (IEEE1394) chain appear in the D-Net device list.
- If "UNCONTROLLABLE" is listed in the device list, the device is not supported by the TV, and cannot be controlled with the TV remote control or the D-Net control panel on the screen.
- The device list is in the order of DTV, STB, AVHDD, DVHS, Camcorder and UNCONTROLLABLE. If there are multiple devices of the same type, the devices will be listed in ascending order of the manufacturer name with Samsung first as the exception. If there are multiple devices of the same type and they are manufactured by the same company, they will be listed in the order of their serial number.

-
- 3 Select a connected D-Net device by pressing the ▲ or ▼ button.

- It is possible to connect a D-Net device to another device and to the TV while the TV is ON. The D-Net device list automatically adds the newly-connected device to the list. See "How to connect compatible IEEE1394 Devices", page 112 on connecting D-Net (IEEE1394) Compatible devices.

-
- 4 To select a device, press the ENTER button. Then display the D-Net device control panel and operate the selected device.

- At this time, the screen changes to the picture from the selected device.

Follow the instructions below to activate D-Net in the menu.

- 1 Press the MENU button.
Press the ENTER button to select "Input".

- 2 Press the ▲ or ▼ button to select "D-Net", then press the ENTER button.
- The TV and all other devices, connected on the D-Net (IEEE1394) chain, appear in the D-Net device list.
 - This is also available using the D-Net button on the remote control.

- 3 Press the ▲ or ▼ button to select a D-Net (IEEE1394) connected device.

Using the D-Net

The D-Net control panel

Select an IEEE1394 from the D-Net device list. The TV will then display the D-Net control panel. This panel allows you to use the TV remote control to control the selected IEEE1394 device.

1 Press the D-Net button on the remote control.

2 Press the ▲ or ▼ button to select a D-Net (IEEE1394) connected device. Press the ENTER button.

- The D-Net control panel appears on the bottom of the screen.

3 Use the ▲, ▼, ◀, ▶ buttons on the remote control to move through the options (see next page) available in the D-Net control panel.

4 Press the ENTER button to select an option.

5 To view the IEEE1394 device in FULL SCREEN, press the EXIT button on the remote control.

- To exit D-Net mode, select DTV from the D-Net device list or press the SOURCE button on the remote control.

NOTE

- For information about how to use the icons, refer to the following page.

Control Panel ()

Button	Name	To do this
	Return	Move to the previous menu.
	Target	Start and stop recording a Digital stream.
	Program List	Display the AVHDD program list.
	Play	Play the digital stream from the selected digital device.
	Stop	Stop the digital stream from the selected digital device.
	Rewind	Fast rewind a digital stream from the selected digital device.
	Forward	Fast forward a digital stream from the selected digital device.
	Device menu	Display the EIA-775 OSD receive to connected 1394 device. Display only EIA-775 support device.
	Power	Turn the Power of the selected device ON/OFF.
	Go to recording position	When in time shift mode on AVHDD, this moves to the recording position.
	Recording	Display only Camcoder recordings.
	Pause	Pause Play.
	Recording stop	Display only AVHDD recordings.

NOTES

- Press the ▲, ▼, ◀, ▶ buttons on the remote control to select a control panel button and press the ENTER button on the remote control.
- Depending on the device being controlled, not all options on the D-Net control panel may be available.
- The selected IEEE1394 device and its functions can be controlled through the equivalent buttons on the TV's remote control.
- Not all functions are supported for all IEEE1394 devices.
- It is possible to use direct keys on the remote control (rewind, stop, play/pause, fast forward) to control external devices.

* **What is EIA-775** : EIA-775 is an OSD standard that enables the control of external 1394 devices using functions such as Play, Stop, etc.

* **What is CEA-931** : This is a standard for controlling external IEEE1394 devices with the TV remote control and not the remote control of the external device.

For example, to play DVHS, you press the Play button of the TV instead of the Play button of the DVHS, the Play command is transmitted to the DVHA through the IEEE1394 connection.

Using the D-Net

Operating Tips

- 1) When the screen is switched to the TV program.
 - When you select the first button, the TV button, in the Device List, it switches to the TV program.
 - Although you have selected another device from the Device List, if detecting a video signal from the device fails, the "Connection failed" message appears and the screen automatically switches to the TV program.
 - When the 1394 connection to the selected device is disconnected, the screen automatically switches to the TV program. If you reconnect the device, the reconnected device is automatically selected.
- 2) AVHDD, DVHS and camcorders automatically stop when you select another device while watching one of the devices.
- 3) Some devices may be displayed in the Device List as 'UNCONTROLLABLE'.
This may happen when the device does not contain the proper information or it cannot read.
- 4) Some devices may not be recognized and may be disconnected from the 1394 connection when they are turned off.
- 5) When connecting another TV, the TV may transmit *Digital TS which appears in the TV or another picture (e.g. Only RF may be transmitted, although DVHS is being displayed on the screen) depending on the TV specifications.
- * **What is Digital TS** : DTV packages digital data (video, audio and data) into 188 byte units using the MPEG-2 algorithm and transmits the data unit unlike for analog. It is called Digital Transport Stream or Digital TS.
- 6) When connected to another STB, some STBs may not be displayed in the Device List due to device specifications or defects when multiple devices are connected.
Even if the device is displayed in the Device List, the connection to the device may fail. Otherwise, due to STB trouble, the video stream may be stopped while recording, or the recording may fail.
In this case, you have to discover which device is defective by removing the devices one by one.
- 7) When connected to the AVHDD
 - To rotate the AVHDD disc, there may a time delay.
 - Some AVHDDs may provide two playbacks or recordings simultaneously. In this case, there may be two Play icons in the Program List and 2 AVHDD buttons in the Target List.
 - If you copy a program from the Program List, the selected AVHDD program is played on the TV screen and recorded using the device selected from the Target List.
Even if the program reaches its end, the recording device does not stop automatically.
 - Some AVHDDs may display the wrong program information after recording, depending on the situation.
 - If AVHDD is recording, the program is automatically played which is currently being recorded, when it is selected from the Device List. (PVR function)
 - For the "Go to recording position" button operation, the difference between recording and play time must be longer than 30 seconds.
- 8) When connected to DVHS
 - Some devices support an automatic connect function (I-mode). These devices may cause a malfunction when multiple devices are connected.
 - Some DVHS devices may not record properly when multiple devices are connected and the mode is I-mode.
- 9) When connected to a camcorder
 - Depending on if the camcorder is in Tape or Camera Mode, the control panel changes.
If the camcorder turns off the power (power saving mode), the camcorder may disappear from the Device List.

- 10) When multiple devices are connected, some devices may appear and then disappear periodically in the Device List. This is because some devices malfunction when multiple devices are connected.

If this occurs, you have to discover and remove the defective device from the connection by removing the devices one by one.

- 11) When multiple devices are connected, the response time may be relatively long when selecting a device. This may happen when there is a device(s) that malfunctions and degrades the 1394 connection speed.
At this time, some of the functions of AVHDD or DVHS may not work, and the stream connection may fail. If this occurs, you have to discover and remove the defective device from the connection by removing the devices one by one.
- 12) Copy Protection
- You can record a Copy-Free, or Copy-One-Generation screen.
 - Although you cannot record a Copy-No-More, or Copy-Never screen, you can view it through another device.
 - If you change the channel to a 'copy never' channel while recording a 'copy free' channel, the recording is automatically stopped in some devices. Even if the program was recorded, you will not be able to view the recorded 'copy never' channel. At this time, therefore, the user has to manually stop the recording.

Copy information

Message	Descriptions
Copy_free	Able to copy.
No_more_copies	Unable to copy anymore.
Copy_one_generation	Able to copy once.
Copy_never	Unable to copy.

- 13) When multiple devices are connected, and a device malfunctions while playing DVHS or AVHDD, the user may experience interrupted screen play.
- 14) When playing and recording a program simultaneously using AVHDD, and the program is copy protected, the program may not play depending on whether the AVHDD device supports simultaneous copy protection.
- 15) When AVHDD or DVHS is being played, and you press the Pause button, some products may show the "No Signal or Weak Signal" message on the TV screen instead of a still picture as there is no video stream from the product.
- 16) If the number of connected IEEE 1394 devices exceeds 10, it may cause abnormal operation.
- Yes and Play may not operate smoothly, if you play after recording.
 - Yes and the Play, Record and Copy functions do not work properly.
 - Disconnect the malfunctioning device and then try again.

Using the D-Net

Recording Tips

- 1) Recording using the Target List while also watching the screen being recorded.
 - Check that the AVHDD and DVHS devices are connected.
 - Select a source device to be recorded and press the Target button.
 - Select a device to be recorded from the Target List.
- 2) Recording a program in the Program List of AVHDD using another device.
 - Select an AVHDD program to be recorded from the Program List and press Copy.
 - Select the target device from the Target List.

NOTES

- In this case, the selected program is automatically played and displayed on the TV screen and the target device automatically starts recording.
- Controlling a device with another device's remote control or through manual operation, may cause a malfunction when controlling a device through the TV. When copying a program, the recording will not stop automatically when the program reaches its end.
- Although you can make a recording to connected devices regardless of copy protection, you may not be able to watch the copy-protected recording as the playback picture may be distorted.
- When recording an HD program on cable TV or from satellite, programs on some channels may not be recorded if the program exceeds the limit of the allowable range of recording devices such as D-VHS.
- If a recording is in process and another command is issued while the "Recording..." D-Net Notice is displayed on the screen, the recording may fail.

Tips on stopping recording

- 1) In general, you can instantly evaluate the current recording device through the Target List. If you select a device that you wish to stop, a message appears asking if you really want to stop recording.
- 2) For DVHS. If you select a recording DVHS from the Device List, a message appears asking if you really want to stop recording.
- 3) For AVHDD, if the program currently being recorded is selected, you can stop the recording using the Recording stop button.

NOTE

- Controlling a device through another device or through a manual operation may cause a malfunction when controlling a device through the TV.

Troubleshooting (D-Net)

Problem	Possible Solution
The device is displayed as being "UNCONTROLLABLE".	Only DTVs, STBs, AVHDDs, DVHSs and MPEG camcorder IEEE 1394 devices are controllable. Other devices will display "UNCONTROLLABLE" in the device list. Some supported devices may display as "UNCONTROLLABLE" due to an initialization error. → If a device is supported but is displayed as "UNCONTROLLABLE", reconnect the 1394 cable. If this does not work, this is because the information about the device is unreadable due to an internal error.
A connected device is not displayed in the device list.	A device, which has experienced an error during initialization, may malfunction and affect the operation of other connected devices. Other devices may not be displayed in the list. → Disconnect and reconnect the 1394 cable. → Remove a device which does not guarantee compatibility when multiple devices are connected.
"Check the connection with IEEE 1394 cable." message appears.	This message appears when there is a problem with the connected device or the 1394 cable. Initialization might fail when multiple devices are connected due to limitations of some connected devices. → Check that the 1394 cable is making a loop and reconnect the 1394 cable. Check that cables are correctly connected to all connected devices. This message may appear due to an operating error of the 1394 port of a particular device.
"Connection is failed. Exceeds the limit of 1394 network connection." message appears.	IEEE 1394 supports a limited number of screen connections. This message appears when the limit has been exceeded. → Stop unnecessary operations such as playing, recording, etc. and try it again. Turn the auto screen connection function (I-mode) of DVHS devices OFF, and retry. If a camcorder is connected and it is not currently being used, turn it off or disconnect it from the 1394 network.

Continued...

Using the D-Net

Problem

Possible Solution

"Connection is failed.
1394 network speed is not
compatible." message appears.

This message appears when the connection speed of
the connected device and the device selected from the
Target List are different when copying data.

→ Connect a low speed device between the two
devices. (See figure)

※ A 1394 device has a maximum connection
speed which will be marked near the
IEEE 1394 connector with an "S" number
(i.e., S100, S200, S400). The higher the number,
the faster the maximum connection speed.
This TV has a maximum connection speed of S400.

"This device is occupied by another
device." message appears.

This message appears when you try to record a
device, which is currently being recorded manually or
by another device, through the TV.
→ Stop the recording device and retry.

"Authentication is failed" message
appears.

Check that the connected device supports DTCP.

"Recording is prevented." message
appears.

This message appears when trying to copy protected
content.

Although DV Camcorder is in
the device list, no picture is
displayed on the screen when
the DV camcorder is selected.

Although a camcorder which supports the DV format
appears in the device list, you cannot watch video
from the camcorder even if you select the camcorder
as an input source, because the TV supports the
MPEG format only.

Continued...

Problem	Possible Solution
No picture on the screen after selecting a device	Check if the current mode for DTV and STB is set to analog by mistake. For AVHDD, check if the played content reaches to the end. (Select the item from the content list again.) For DVHS, check if a D-VHS tape is being used. If the camcorder supports the DV format, no picture will be displayed on the screen.
"Initializing D-Net" message appears.	This message appears when the D-Net function is being initialized. Retry after a short wait to use the D-Net function.
"Exceeds the limit of device numbers." message appears.	This message appears when the number of currently connected D-Net devices exceeds 10. Retry after disconnecting unnecessary devices.
"Recordable device is not connected" message appears.	This message appears when the recordable device is not on the network when you try to make a recording using a D-Net device. Retry after connecting a recordable device (DVHS, AVHDD).
"Not available while recording" message appears	The message appears informing you that you cannot change the channels or change the input source using the remote control because a recording is in progress through D-Net. Retry after stopping the current recording through D-Net.
"The connected device is unavailable to perform this function for temporary problems." message appears.	This message appears when the selected function is not supported by the relevant device or the relevant device cannot execute the selected function. Most STBs, DTVs and camcorders do not support the power on/off command. This message may appear when you issue the power command for these devices. This message also appears when the command is supported but the relevant device cannot follow the command. Retry after checking the current mode of the relevant device.
D-Net cannot record video from analog channels from connected external equipment.	This message appears when the user presses the RECORD button in analog mode. D-Net only supports recording for digital.
"Not available format is selected." message appears.	This message appears when the selected device does not support the MPEG format. At present, D-Net supports MPEG TS only.

Continued...

Using the D-Net

Problem	Possible Solution
This device is unavailable for D-Net.	This message appears if you have connected a 1394 device or equipment other than a supported device (DVHS, DTV, STB, AVHDD, Camcorder), or if the connected device does not support the AVC defined in the 1394 specifications, even if the device is a supported device, when you have selected the device to use it.
Connection failed. Check if the 1394 cable is connected.	This message appears if there is a connection problem when trying to use a D-Net device.
Initializing...	This message appears if the AVHDD is booting when trying to use the AVHDD.
Please wait. A recordable device is on standby.	This message appears if the recording device is turned off when trying to record using the D-Net device. Please wait a moment until it is turned on.
Connection failed. The device is not responding.	This message appears if there is a connection problem when trying to use a D-Net device. This message appears when the response of the component device malfunctions or is incorrect.
No space left on disc.	This message appears if the AVHDD has no space to record.
The D-NET ERROR message appears on the screen.	Although you have connected external devices according to the procedures described in the manual to use the D-Net function, the D-NET ERROR message may appear on the screen. In this case, check to see if the jacks are damaged.

PC Display

Using Your TV as a Computer (PC) Display

How to Connect Your PC to the TV

This figure shows the Standard Connector-jack panel. The actual configuration on your TV may be different, depending on the model.

Connecting a PC (15p D-SUB) to the TV

- 1 Connect a PC cable between the PC Output jack on the PC and the RGB input jack (PC IN) on the TV.
- 2 Connect a Audio cable between the Audio jack on the PC and the Audio input jacks (PC AUDIO IN) on the TV.

TV Rear Panel

Setting up Your PC Software (Windows only)

The Windows display-settings for a typical computer are shown below. But the actual screens on your PC will probably be different, depending upon your particular version of Windows and your particular video card. But even if your actual screens look different, the same, basic set-up information will apply in almost all cases. (If not, contact your computer manufacturer or Samsung Dealer.)

1. Right click the mouse on the Windows Desktop, then click on Properties. The Display Dialog-Box will be displayed.
2. Click on Settings, then set the Display Mode with reference to the Display Modes Table. You do not need to change the Colors settings.
3. Click on Advanced. A new settings dialog box will be displayed.
4. Click on the Monitor tab, then set the Screen Refresh Rate with reference to the Display Modes Table. Set the Vertical Frequency and Horizontal Frequency individually if you can do so, instead of setting the Screen Refresh Rate.
5. Press the OK button, close the window, then press the OK button on the Display Registration Information window. Automatic re-booting may commence at this moment.
6. Shutdown the PC, and connect it to your TV.
 - * The actual screens on your PC may look different, depending on your particular version of Windows and the type of your PC.
 - * When you use your TV as a PC monitor, it supports Colors up to 32 bits.
 - * In this case, the display on the TV may look different depending on your particular version of Windows or the PC manufacturer.
 - * When connecting a PC, you must set it to the display settings that are supported by the TV. Otherwise, the message Out of input range will be displayed.

continued...

PC Display

Checklist Before Connecting to a PC

- Adjust the PC Display Setup to the resolution and frequency values that are supported by the TV.
- Please read the user's manual provided with the PC (Graphic Card & Sound Card).
- Do not supply power to either device until all connections are complete.
Supplying power in the middle of connecting may cause damage to the product.
- Check the terminal types for the PC's graphic card.

Setting the Display Modes to be Compatible with Your TV

Mode	Resolution	Vertical Frequency [Hz]	Horizontal Frequency [KHz]	Vertical Polarity	Horizontal Polarity
IBM	640 x 350	70.086	31.469	N	P
	720 x 400	70.087	31.469	P	N
		59.940	31.469	N	N
VESA	640 x 480	72.809	37.861	N	N
		75.000	37.500	N	N
		56.250	35.156	P/N	P/N
	800 x 600	60.317	37.897	P	P
		72.188	48.077	P	P
		75.000	46.875	P	P
		60.004	48.363	N	N
	1024 x 768	70.069	56.476	N	N
		75.029	60.023	P	P
		60.020	63.981	P	P
	1280 x 1024	75.025	79.976	P	P
		59.988	66.647	N	P

NOTES

- The Modes Table conforms to the regulations of IBM/VESA and is prepared based on analog input standards.
- The optimal resolution is 1920 x 1080 @ 60Hz.
- The optimal timing per each mode is the Vertical Frequency 60Hz.
- Resolutions other than the resolutions above are not supported in PC mode.
- Although the OSD menu may shake when selecting a PC input of 1920 x 1080, this is not a defect. Therefore, please use the unit as usual.

Adjusting the Picture Quality

The purpose of picture quality adjustment is to remove or reduce picture noise. If the noise is not removed by fine tuning alone, then do the frequency adjustments to the utmost and fine tune again. After the noise has been reduced, re-adjust the picture so that it is aligned on the center of screen.

NOTE

- This feature may change the width of the image. If necessary, adjust the position to center.

1 Press the SOURCE button to select "PC".

2 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

3 Press the ▲ or ▼ button to select "PC", then press the ENTER button.

4 Press the ENTER button to select "Image Lock", then press the ENTER button.

5 Press the ▲ or ▼ button to select "Coarse" or "Fine", then press the ENTER button.

- You can also select these options (Coarse, or Fine) by pressing the ▲ or ▼ button.

6 Pressing the ◀ or ▶ button to remove the picture noise.

Press the EXIT button to exit.

PC Display

Changing the Picture Position

After connecting the TV to your PC, adjust the position of picture if it is not well-aligned.

1 Press the SOURCE button to select "PC".

2 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

3 Press the ▲ or ▼ button to select "PC", then press the ENTER button.

4 Press the ▲ or ▼ button to select "Position", then press the ENTER button.

5 Adjust the position of picture by pressing the ▲/▼/◀/▶ button.

Press the EXIT button to exit.

Adjusting the Picture Quality and Position Automatically

This feature allows the TV to self-adjust to the incoming video signal. The values of fine, coarse and position are adjusted automatically.

1 Press the SOURCE button to select "PC".

2 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

3 Press the ▲ or ▼ button to select "PC", then press the ENTER button.

4 Press the ▲ or ▼ button to select "Auto Adjustment", then press the ENTER button. The picture quality and position are automatically adjusted, and the picture returns to original view about a few seconds later.

Press the EXIT button to exit.

PC Display

Changing the Picture Size (PC Mode)

You can select the picture size which best corresponds to your viewing requirements.

1 Press the SOURCE button to select "PC".

2 Press the MENU button.
Press the ▲ or ▼ button to select "Picture", then press the ENTER button.
Press the ▲ or ▼ button to select "Size", then press the ENTER button.

3 Press the ◀ or ▶ button to select the screen format you want, then press the ENTER button.

Press the EXIT button to exit.

NOTES

- "4:3": Displays the picture as it is without changing the aspect ratio of input source.
- "WidePC": Scales the picture to 92% of the TV screen, regardless of the aspect ratio of the input source. The picture position (◻, ◻) and size (◻◻) adjustment are available by pressing the ▲/▼/◀/▶ button.

Alternate method

Press the P.SIZE button on the remote control repeatedly to change the picture Size.

Viewing the Current Resolution

You can get the resolution information of your PC.

1 Press the SOURCE button to select "PC".

2 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

3 Press the ▲ or ▼ button to select "PC", then press the ENTER button.

The resolution information is displayed on the screen.

NOTE

- To change the resolution, see pages 129~130.

PC Display

Initializing the Picture Settings

You can replace all picture settings with the factory default values.

1 Press the SOURCE button to select "PC".

2 Press the MENU button. Press the ▲ or ▼ button to select "Setup", then press the ENTER button.

3 Press the ▲ or ▼ button to select "PC", then press the ENTER button.

4 Press the ▲ or ▼ button to select "Image Reset", then press the ENTER button. The picture settings are replaced with the factory default values.

Press the EXIT button to exit.

Appendix

Appendix

Replacing the Lamp

- **Why do I need to replace the lamp?**

The lamp used in a DLP TV has a limited lifespan. For the best screen quality it needs to be replaced periodically. After replacing the lamp, the screen quality will be bright and clear as new.

- **When do I need to replace it?**

It should be replaced when the screen becomes darker, less clear or when all three LEDs on the front (TIMER, LAMP, & STAND BY/TEMP) are flashing.

- **Check before lamp replacement**

1. The lamp must be the same code number and type.
2. The lamp type is indicated on the side of the TV. It is also indicated on the lamp case.
3. After checking the code number for the lamp, give the code number to the store where you purchased the TV or to a Samsung Service center.

- **Caution**

1. Replace with the correct code numbered lamp to avoid damage to the TV.
2. Turn the power off and wait for 30 minutes before replacing the lamp as it will be hot.
3. Do not touch the glass part of the lamp with your bare hands and do not insert any foreign object inside the cover as it may cause poor screen quality, electric shock or fire.
4. Do not place the old lamp near flammable objects or within the reach of children.
5. Be sure to connect this TV directly to an AC wall outlet. If the TV's AC plug is connected to a cable box or other source, it will not allow for proper cool down time.

- For replacement, you will need a 5/91-Inch screwdriver and a pair of gloves.

- 1 Unplug TV, then use a screwdriver to remove the screws.

- 2 Remove the Lamp cover.

- 3 Remove the screw securing the Lamp by using a screwdriver.

- 4 Separate the Lamp from the engine by holding the handle and pulling it out.

- 5 To reinstall the Lamp, follow these steps in reverse order.

NOTES

- Be sure the replacement Lamp is the same type.
- After replacing the lamp, align the lamp cover with the groove and secure the screws.
- The TV will not turn on if the lamp cover is not correctly closed (as this will activate the protective circuit).

Appendix

Troubleshooting

If the TV seems to have a problem, first try this list of possible problems and solutions. If none of these troubleshooting tips apply, then call your nearest Samsung authorized service center.

Problem	Possible Solution
Poor picture quality.	Try another channel. Adjust the antenna. Check all wire connections.
Poor sound quality.	Try another channel. Adjust the antenna.
No picture or sound.	Try another channel. Press the SOURCE button. Make sure the TV is plugged in. Check the antenna connections. Check that the Mute feature is off.
No color, wrong colors or tints.	Make sure the program is broadcast in color. Adjust the picture settings.
Picture rolls vertically.	Adjust the antenna. Check all wire connections. If you are using a VCR, check the tracking.
The TV operates erratically.	Unplug the TV for 30 seconds, then try operating it again.
Your remote control does not operate your TV.	Press the MODE button to put your remote control into TV mode. Make sure the remote has batteries.
The TV won't switch on.	Make sure the wall outlet is working. Make sure the TV is plugged in. Make sure the remote has batteries.
Digital broadcasting screen problem.	Please check the digital signal strength and input antenna.
There is a "clicking" sound repeatedly in Standby mode.	There is a sound when both Air and Cable are set to "Yes" in the TV Guide On Screen™ Setup. The sound is made by the TV trying to receive TV Guide On Screen™ data in Standby mode, and is not a defect. Set up the Antenna (Air)/Cable according to the connection status in the TV Guide On Screen™ Setup.

Continued...

Problem	Possible Solution
The visual quality of 1080p will appear the same as for other DTV resolutions.	This TV receives a signal input and converts the signal into 1080p through signal processing. Although the resolution of this TV is 1920 x 1080, to watch TV with a higher visual quality and sharpness than a conventional TV, you can watch TV in a better visual quality when the input signal resolution is 1080p.
I want to view the clearest picture on the TV in 1080p resolution.	The best visual quality is supported for 1080p input signal. → To view TV in the best visual quality of 1080p, connect to a PC whose graphic output is WUXGA (1920 x 1080).
The visual qualities of digital channels vary.	The visual qualities of digital channels may vary depending on the original production method (analog or digital). → Classification by the information displayed when switching channels. → If the original production method is digital: High visual quality program. → If the original production method is analog: The digital program displayed on the screen is originally an analog program which has been converted. The visual quality is of an SD grade.
Although the TV caption shows HD, the visual quality is not satisfactory.	The HD caption that appears when switching channels or when pressing the Information button on the remote control means the selected channel is simply a digital channel. If the broadcasting station converts an analog signal into digital and transmits the signal, the visual quality may not be perfect. (Applied to Set Top Box built-in model only.)

- The display panel used for the DLP TV is composed of many tiny pixels. These pixels may occasionally appear on the screen.

Appendix

Cleaning and Maintaining Your TV

With proper care, your TV will give you many years of service. Please follow these guidelines to get the maximum performance from your TV.

Placement

- Do not put the TV near extremely hot, cold, humid or dusty places.
- Do not place the TV near appliances with electric motors that create magnetic fields, such as vacuum cleaners.
- Keep the ventilation openings clear; do not place the TV on a soft surface, such as cloth or paper.
- Place the TV in a vertical position only.

Liquids

- Do not handle liquids near or on the TV. Liquids that spill into it can cause serious damage.

Cabinet

- Never open the cabinet or touch the parts inside.
- Wipe your TV with a clean, dry cloth. Never use water, cleaning fluids, wax, or chemicals.
- Do not put heavy objects on top of the cabinet.
- This DLP TV projects the image onto a large screen by applying an optical system. If you place the TV set face down, it might cause a problem because dirt, or some other contaminant may become attached to the inside of the TV set.

Temperature

- If your TV is suddenly moved from a cold to a warm place, unplug the power cord, and allow at least two hours for moisture that may have formed inside the unit to dry completely.

Using Your TV in Another Country

If you plan to take your TV with you to a foreign country, please be aware of the different television systems that are in use around the world. A TV designed for one system may not work properly with another system due to differences in the TV channel frequencies.

Regulatory and Safety Compliance Guide

Warning! Important Safety Instructions

(Please read the appropriate section that corresponds to the marking on your Samsung product before attempting to install the product.)

CAUTION

RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). THERE ARE NO USER SERVICEABLE PARTS INSIDE. REFER ALL SERVISING TO QUALIFIED PERSONNEL.

This symbol indicates high voltage is present inside. It is dangerous to make any kind of contact with any inside part of this product.

This symbol alerts you that important literature concerning operation and maintenance has been included with this product.

- ☛ The slots and openings in the cabinet and in the back or bottom are provided for necessary ventilation. To ensure reliable operation of this apparatus, and to protect it from overheating, these slots and openings must never be blocked or covered.
 - Do not cover the slots and openings with a cloth or other materials.
 - Do not block the slots and openings by placing this apparatus on a bed, sofa, rug or other similar surface.
 - Do not place this apparatus in a confined space, such as a bookcase, or built-in cabinet, unless proper ventilations is provided.
- ☛ Do not place this apparatus near or over a radiator or heat register, or where it is exposed to direct sunlight.
- ☛ Do not place the sources of heat on this apparatus, such as a candle, ash tray, incense or other similar material.
- ☛ Do not place a water containing vessel on this apparatus, as this can result in a risk of fire or electric shock.
- ☛ Do not expose this apparatus to rain or place it near water (near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool etc.). If this apparatus accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean this apparatus with damp cloth when necessary, but be sure to unplug the apparatus first.
- ☛ Do not expose this apparatus set to extreme temperature conditions or to extreme humidity conditions.
- ☛ This apparatus uses batteries. In your community there might be regulations that require you to dispose these batteries properly under environmental considerations. Please contact your local authorities for disposal or recycling information.
- ☛ To cut off the power source, unplug this apparatus from the wall outlet.
- ☛ Do not overload wall outlets, extension cords or convenience receptacles beyond their capacity, since this can result in fire or electric shock.
- ☛ Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.
- ☛ To protect this apparatus from a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the set due to lightning and power line surges.
- ☛ Before connecting the AC power cord to the DC adapter outlet, make sure the voltage designation of the DC adapter corresponds to the local electrical supply.
- ☛ Never insert anything metallic into this apparatus openings. Doing so may create the danger of electric shock.
- ☛ To avoid electric shock, never touch the inside of this apparatus. Only a qualified technician should open this apparatus's case.
- ☛ Be sure to hold the plug, not the cord, when disconnecting this apparatus from an electric socket.
- ☛ Locate this apparatus near an easily accessible AC outlet.
- ☛ If this apparatus does not operate normally - in particular, if there are any unusual sounds or smells coming from it - unplug it immediately and contact an authorized dealer or service center.
- ☛ Unplug this apparatus from the AC outlet before any service.

Regulatory Compliance Statements

Your Samsung product is marked to indicate its compliance class:

- Federal Communications Commission (FCC) - USA
- Industry Canada Equipment Standard for Digital Equipment (ICES-003) - Canada
- Voluntary Control Council for Interference (VCCI) - Japan
- Bureau of Standards Metrology and Inspection (BSMI) - Taiwan
- Ministry of Information and Communication (MIC) - Republic of Korea
- Italian Post Ministry (Homologation) - Italy

FCC Information

FCC Class A Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Class B Notice

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no

guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

User Information

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. If necessary, consult with your dealer or an experienced radio/television technician for additional suggestions. You may find the booklet called How to Identify and Resolve Radio/TV Interference Problems helpful. This booklet was prepared by the Federal Communications Commission. It is available from the U.S. Government Printing Office. Washington, DC 20402, Stock Number 004-000-00345-4.

The party responsible for product compliance:

SAMSUNG ELECTRONICS CO., LTD.

America QA Lab of Samsung

3351 Michelson Drive

Suite #290, Irvine, CA92612 USA

Warning

User must use shielded signal interface cables to maintain FCC compliance for the product. Provided with this monitor is a detachable power supply cord with IEC320 style terminations. It may be suitable for connection to any UL Listed personal computer with similar configuration. Before making the connection, make sure the voltage rating of the computer convenience outlet is the same as the monitor and that the ampere rating of the computer convenience outlet is equal to or exceeds the monitor voltage rating.

For 120 Volt applications, use only UL Listed detachable power cord with NEMA configuration 5-15P type(parallel blades) plug cap. For 240 Volt applications use only UL Listed detachable power supply cord with NEMA configuration 6015P type(tandem blades) plug cap.

This television receiver provides display of television closed captioning in accordance with Section 15.119 of the FCC rules.(TV broadcast receivers with picture screens 13 inches or larger in diameter models only)

ICES-003 Class A Notice - Avis NMB-003, Classe A

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

ICES-003 Class B Notice - Avis NMB-003, Classe B

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

VCCI Class A Notice

VCCI Class B Notice

この装置は「情報処理装置等電波障害自主規制協議会(VCCI)の基準に基づくクラスB情報技術装置です。この装置は「家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。」
取扱説明書に従って正しい取り扱いをして下さい。」

BSMI Class A Notice

The following statement is applicable to products shipped to Taiwan and marked as Class A on the product compliance label.

警告使用者:

這是甲類資訊類產品，在居住環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。」

European Notice(Europe Only)

Products with the CE marking comply with the EMC Directive(89/336/EEC), (92/31/EEC), (93/68/EEC) and the Low Voltage Directive(73/23/EEC) issued by the Commission of the European Community.

Compliance with these directives implies conformity to the following European Norms:

- EN55022: Radio Frequency Interference
- EN55024: Electromagnetic Immunity of Information Technology Equipment
- EN61000-3-2: Power Line Harmonics
- EN61000-3-3: Voltage Fluctuations
- EN55013: Radio disturbance characteristics of broadcast receivers and associated equipments
- EN55020: Electromagnetic immunity of broadcast receivers and associated equipments

European Class A Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.(Class A product only)

정보통신기기 A급 기기(MIC Class A Notice)

이 기기는 업무용으로 전자파적합등록을 한 기기이오니 판매자 또는 사용자는 이 점을 주의하시기 바라며 만약 잘못 판매 또는 구입하였을 때에는 가정용으로 교환하시기 바랍니다.

Important Safety Instructions(TV Only)

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.
- 5) Do not use this apparatus near water.
- 6) Clean only with dry cloth.
- 7) Do not block any ventilation openings, Install in accordance with the manufacturer's instructions.
- 8) Do not install near any heat sources such as radiators, heat registers, or other apparatus (including amplifiers) that produce heat.
- 9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- 10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- 11) Only use attachments/accessories specified by the manufacturer.
- 12) Use only with cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
- 13) Unplug this apparatus during lightning storms or when unused for long periods of time.
- 14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

CAUTION
RISK OF ELECTRIC SHOCK DO NOT OPEN
CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

This symbol indicates high voltage is present inside. It is dangerous to make any kind of contact with any inside part of this product. This symbol alerts you that important literature concerning operation and maintenance has been included with this product.	 
--	--

Warning: To prevent damage which may result in fire or electric shock hazard, do not expose this appliance to rain or moisture.

(EPA applied model only)

As an ENERGY STAR Partner, Samsung has determined that this product or product models meets the ENERGY STAR guidelines for energy efficiency.

■ Optional ■

Do not place the apparatus in a rack or bookcase. Ensure that there is adequate ventilation and that you've followed that manufacturer's instructions for mounting.
(For PDP or Projection TV apparatus)

If you place the apparatus in a rack or bookcase, ensure that there is adequate ventilation and that you've followed the manufacturer's instructions.

Wiring the Mains Power Supply Plug(UK Only)

IMPORTANT NOTICE

The mains lead on this equipment is supplied with a moulded plug incorporating a fuse. The value of the fuse is indicated on the pin face of the plug and, if it requires replacing, a fuse approved to BS11362 of the same rating must be used.

Never use the plug with the fuse cover omitted if the cover is detachable. If a replacement fuse cover is required, it must be of the same colour as the pin face of the plug. Replacement covers are available from your dealer.

If the fitted plug is not suitable for the power points in your house or the cable is not long enough to reach a power point, you should obtain a suitable safety approved extension lead or consult your dealer for assistance.

However, if there is no alternative to cut off the plug, remove the fuse and then safely dispose of the plug. Do NOT connect the plug to a mains socket as there is a risk of shock hazard from the bared flexible cord.

IMPORTANT

The wires in the mains lead are coloured in accordance with the following code:
BLUE - NEUTRAL BROWN - LIVE

As these colours may not correspond to the coloured markings identifying the terminals in your plug, proceed as follows:

The wire coloured BLUE must be connected to the terminal marked with the letter N or coloured BLUE or BLACK.

The wire coloured BROWN must be connected to the terminal marked with the letter L or coloured BROWN or RED.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL, WHICH IS MARKED WITH THE LETTER E OR BY THE EARTH SYMBOL , OR COLOURED GREEN OR GREEN AND YELLOW.

TCO'03 Recycling Information (TCO'03 applied model only)
Medical Requirement (Medical applied model only)

● **MPR II Compliance**

This monitor complies with SWEDAC(MPR II) recommendations for reduced electric and magnetic fields.

● **TCO'95-Ecological requirements for personal computers (TCO'95 applied model only)**

AB general requirements

AB2 Written Eco-document accompanying the products

Congratulations! You have just purchased a TCO'95 approved and labelled product! Your choice has provided you with a product developed for professional use. Your purchase has also contributed to reducing the burden on the environment and to the further development of environmentally-adapted electronic products.

Why do we have environmentally-labelled monitors?

In many countries, environmental labelling has become an established method for encouraging the adaptation of goods and services to the environment. The main problem as far as monitors and other electronic equipment are concerned is that environmentally harmful substances are used both in the products and during their manufacture. Since it has not been possible so far for the majority of electronic equipment to be recycled in a satisfactory way, most of these potentially damaging substances sooner or later enter Nature.

There are also other characteristics of a monitor, such as energy consumption levels, that are important from both the working and natural environment viewpoints. Since all types of conventional electricity generation have a negative effect on the environment (acidic and climate-influencing emissions, radioactive waste, etc.) it is vital to conserve energy. Electronic equipment in offices consumes an enormous amount of energy, since it is often routinely left running continuously.

What does labelling involve?

This product meets the requirements for the TCO'95 scheme, which provides for international environmental labelling of monitors. The labelling scheme was developed as a joint effort by the TCO (The Swedish Confederation of Professional Employees), Naturskyddsforeningen (The Swedish Society for Nature Conservation) and NUTEK (The National Board for Industrial and Technical Development in Sweden).

The requirements cover a wide range of issues: environment, ergonomics, usability, emission of electrical and magnetic fields, energy consumption and electrical and fire safety.

The environmental demands concern among other things restrictions on the presence and use of heavy metals, brominated and chlorinated flame retardants, CFCs (freons), and chlorinated solvents. The product must be prepared for recycling and the manufacturer is obliged to have an environmental plan, which must be adhered to in each country where the company conducts its operations policy. The energy requirements include a demand that the monitor after a certain period of inactivity shall reduce its power consumption to a lower level, in one or more stages. The length of time to reactivate the monitor shall be reasonable for the user.

Labelled products must meet strict environmental demands, for example in respect of the reduction of electric and magnetic fields, along with physical and visual ergonomics and good usability.

TCO Development Unit 1996-11-29

On the page this folder you will find a brief summary of the environmental requirements met by this product.

The complete environmental criteria document may be ordered from:

TCO Development Unit

S-11494 Stockholm

Sweden

Fax: +46 8 782 92 07

E-mail (Internet): development@tco.se

Current information regarding TCO'95-approved and labelled products may also be obtained via the Internet, using the address:

<http://www.tco-info.com/>

TCO'95 is a co-operative project between (3 logos)

Environmental Requirements

Brominated flame retardants are present in printed circuit boards, cables, wires, casings and housings. In turn, they delay the spread of fire. Up to thirty percent of the plastic in a computer casing can consist of flame retardant substances. These are related to another group of environmental toxins, PCBs, which are suspected to give rise to similar harm, including reproductive damage in fish eating birds and mammals, due to the bioaccumulative processes. Flame retardants have been found in human blood and researchers fear that disturbances in foetus development may occur.

TCO'95 demand requires that plastic components weighing more than 25 grams must not contain organically bound chlorine and bromine.

Lead

Lead can be found in picture tubes, display screens, solders and capacitors. Lead damages the nervous system and in higher doses, causes lead poisoning.

TCO'95 requirement Permits the inclusion of lead since no replacement has yet been developed.

Cadmium

Cadmium is present in rechargeable batteries and in the colour generating layers of certain computer displays. Cadmium damages the nervous system and is toxic in high doses.

TCO'95 requirement states that batteries may not contain more than 25 ppm (parts per million) of cadmium. The colour-generating layers of display screens must not contain any cadmium.

Mercury

Mercury is sometimes found in batteries, relays and switches. Mercury damages the nervous system and is toxic in high doses.

TCO'95 requirement states that batteries may not contain more than 25 ppm (parts per million) of mercury. It also demands that no mercury is present in any of the electrical or electronics

components concerned with the display unit.

CFCs (freons)

CFCs (freons) are sometimes used for washing printed circuit boards and in the manufacturing of expanded foam for packaging. CFCs break down ozone and thereby damage the ozone layer in the stratosphere, causing increased reception on Earth of ultraviolet light with consequent increased risks of skin cancer (malignant melanoma).

The relevant TCO'95 requirement: Neither CFCs nor HCFCs may be used during the manufacturing of the product or its packaging.

● TCO'99-Ecological requirements for personal computers (TCO'99 applied model only)

Congratulations!

You have just purchased a TCO'99 approved and labelled product! Your choice has provided you with a product developed for professional use. Your purchase has also contributed to reducing the burden on the environment and also to the further development of environmentally adapted electronics products.

This product meets the requirements for the TCO'99 schema which provides for an international environmental and quality labelling of personal computers. The labelling scheme was developed as a joint effort by the TCO(The Swedish Confederation of Professional Employees), Svenska Naturskyddsforeningen(The Swedish Society for Nature Conservation), Statens Energimyndighet(The Swedish National Energy Administration) and SEMKO AB.

The requirements cover a wide range of issues: environment, ergonomics, usability, reduction of electric and magnetic fields, energy consumption and electrical safety.

Why do we have environmentally labelled computers?

In many countries, environmental labelling has become an established method for encouraging the adaptation of goods and services to the environment. The main problem, as far as computers and other electronics equipment are concerned, is that environmentally harmful substances are used both in the products and during their manufacture. Since it is not so far possible to satisfactorily recycle the majority of electronics equipment, most of these potentially damaging substances sooner or later enter nature.

There are also other characteristics of a computer, such as energy consumption levels, that are important from the viewpoints of both the work (internal) and natural (external) environments. Since all methods of electricity generation have a negative effect on the environment (e.g. acidic and climate-influencing emissions, radioactive waste), it is vital to save energy. Electronics equipment in offices is often left running continuously and thereby consumes a lot of energy.

What does labelling involve?

The environmental demands have been developed by Svenska Naturskyddsforeningen (The Swedish Society for Nature Conservation). These demands impose restrictions on the presence and use of heavy metals, brominated and chlorinated flame retardants, CFCs(freons)and chlorinated solvents, among other things. The product must be prepared for recycling and the manufacturer is obliged to have an environmental policy which must be adhered to in each country where the company implements its operational policy.

The energy requirements include a demand that the computer and/or display, after a certain period of inactivity, shall reduce its power consumption to a lower level in one or more stages. The length of time to reactivate the computer shall be reasonable for the user.

Below you will find a brief summary of the environmental requirements met by this product. The complete environmental criteria document may be ordered from:

TCO Development
SE-114 94 Stockholm, Sweden
Fax: +46 8 782 92 07
Email (Internet): development@tco.se

Current information regarding TCO'99 approved and labelled products may also be obtained via the Internet, using the address: <http://www.tco-info.com/>

Environmental requirements

Flame retardants

Flame retardants are present in printed circuit boards, cables, wires, casings and housings. Their purpose is to prevent, or at least to delay the spread of fire. Up to 30% of the plastic in a computer casing can consist of flame retardant substances. Most flame retardants contain bromine or chloride, and those flame retardants are chemically related to another group of environmental toxins, PCBs. Both the flame retardants containing bromine or chloride and the PCBs are suspected of giving rise to severe health effects, including reproductive damage in fish-eating birds and mammals, due to the bio-accumulative* processes. Flame retardants have been found in human blood and researchers fear that disturbances in foetus development may occur.

The relevant TCO'99 demand requires that plastic components weighing more than 25 grams must not contain flame retardants with organically bound bromine or chlorine. Flame retardants are allowed in the printed circuit boards since no substitutes are available.

Cadmium**

Cadmium is present in rechargeable batteries and in the colour-generating layers of certain computer displays. Cadmium damages the nervous system and is toxic in high doses. The relevant TCO'99 requirement states that batteries, the colour-generating layers of display screens and the electrical or electronics components must not contain any cadmium.

Mercury**

Mercury is sometimes found in batteries, relays and switches. It damages the nervous system and is toxic in high doses. The relevant TCO'99 requirement states that batteries may not contain any mercury. It also demands that mercury is not present in any of the electrical or electronics components associated with the labelled unit. There is however one exception. Mercury is, for the time being, permitted in the back light system of flat panel monitors as today there is no commercially available alternative. TCO aims on removing this exception when a Mercury free alternative is available.

CFCs (freons)

The relevant TCO'99 requirement states that neither CFCs nor HCFCs may be used during the manufacture and assembly of the product. CFCs (freons) are sometimes used for washing printed circuit boards. CFCs break down ozone and thereby damage the ozone layer in the stratosphere, causing increased reception on earth of ultraviolet light with e.g. increased risks of skin cancer (malignant melanoma) as a consequence.

Lead**

Lead can be found in picture tubes, display screens, solders and capacitors. Lead damages the nervous system and in higher doses, causes lead poisoning. The relevant TCO'99 requirement permits the inclusion of lead since no replacement has yet been developed.

● **TCO'03-Ecological requirements for personal computers (TCO'03 applied model only)**

Congratulations!

The display you have just purchased carries the TCO'03 Displays label. This means that your display is designed, manufactured and tested according to some of the strictest quality and environmental requirements in the world. This makes for a high performance product, designed with the user in focus that also minimizes the impact on our natural environment.

Some of the features of the TCO'03 Display requirements:

Ergonomics

Good visual ergonomics and image quality in order to improve the working environment for the user and to reduce sight and strain problems. Important parameters are luminance, contrast, resolution, reflectance, colour rendition and image stability.

Energy

Energy-saving mode after a certain time – beneficial both for the user and the environment
Electrical safety

Emissions

- Electromagnetic fields
- Noise emissions

Ecology

- The product must be prepared for recycling and the manufacturer must have a certified environmental management system such as EMAS or ISO 14 000
- Restrictions on
 - o chlorinated and brominated flame retardants and polymers
 - o heavy metals such as cadmium, mercury and lead.

The requirements included in this label have been developed by TCO Development in cooperation with scientists, experts, users as well as manufacturers all over the world. Since the end of the 1980s TCO has been involved in influencing the development of IT equipment in a more user-friendly direction. Our labelling system started with displays in 1992 and is now requested by users and IT-manufacturers all over the world.

• Medical Requirement (Medical applied model only)

Classifications:

In accordance with UL 2601-1/IEC 60601-1, the product is classified as Continuous duty Class I equipment, which is not protected against ingress of liquids. The product is not suitable for use in the presence of a flammable anaesthetic mixture with air or with oxygen or nitrous oxide.

EMC

This equipment has been tested and found to comply with the limits for medical devices to the IEC 601-1-2:1994. These limits are designed to provide reasonable protection against harmful interference in a typical medical installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to other devices in the vicinity. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to other devices, which can be determined by turning the equipment off and on, the

user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving device.
- Increase the separation between the equipment.
- Connect the equipment into an outlet on a circuit different from that to which the other device(s) are connected.
- Consult the manufacturer or field service technician for help.

Video In / RS 232 / Video Out

Accessories equipment connected to the analog and digital interfaces must be certified to the respective IEC standards (i.e. IEC 950 for data processing equipment and IEC 601-1 for medical equipment.) Furthermore all configurations shall comply with the system standard IEC 601-1-1. Everybody who connects additional equipment to the signal input part or signal output part configures a medical system, and is therefore, responsible that the system complies with the requirements of the system standard IEC 601-1-1. If in doubt, consult the technical services department or your local representative.

Transport and Storage Limitations:

Temperature Range of -40°C to +70°C

Relative Humidity of 10 -95%, non-condensing

* Bio-accumulative is defined as substances which accumulate within living organisms.

** Lead, Cadmium and Mercury are heavy metals which are Bio-accumulative.
