GYEONGGI-DO, KOREA 443-742

Date: **December 29, 2011**

PCTEST Lab.
6660-B Dobbin Road
Columbia, MD 21045

Attestation letter for FCC ID: A3LGTN8010 & A3LGTN8013

GT-N8000 and GT-N8013 have only cosmetic changes like below.

1. SPK grill getting longer.(bottom side going down)
2. Back Side : Battery cover - rear parting line going up.
3. IrLED deleted on the N8000(3G) - located center of top side.
N8013(WiFi_USA) ; same as old sample.

These changes do not affect antenna and proximity sensor.

So, we assure that any additional EMC or SAR test don't have to be tested according to below.

1. That the proximity sensor and coverage have not changed.
2. That the proximity sensor with respect to the antennas have not changed.
3. Antenna distances to the edges of the tablet have not changed.

Thanks.
