Columbia, MD 21046

To Whom It May Concern,

This is a request to hold the internal photos and user manual for FCC ID: **A3LRFD01F-26A** under long term confidentiality. The transmitter is a Base Station where access is controlled and only available to trained personnel. Please note that the internal photos are being asked to be confidential under the FCC guidelines that this is a non-consumer device (Base Station) and is inaccessible to the general public due to the location of the device and it is only serviceable by the licensee or his designated technicians. The user manual is being requested to be confidential under the FCC guidelines that the manual is very technical and is not provided to the general public. The user manual contains proprietary information required for trained installers to commission the base station. The user manual will be used by the licensee or his designated technicians only.

Having the subject information easily available to competitors would negate the advantage we have achieved by developing this product.

As a condition of sale Samsung(Grantee) requires an agreement with the buyer that internal photos and user's manuals are proprietary material and held confidential. Samsung (Grantee) acknowledges that the requested internal photos and user's manual(s) were filled as non-confidential in the original application and understands that internal photos and user's manual(s) were public records from the date of grant (grant date per FCC ID) to a date that the requested documents are made confidential. Samsung understands that the FCC has no obligation to remove internal photos and user's manual(s) being provided publicly by any third-party organizations not affiliated with the FCC that obtained the information during the period that it was publicly available on the FCC Web Site.

Sincerely,

HWAN-YOUL KIM / Principal Research Engineer
SAMSUNG Electronics Co.,Ltd.
