Hello K.Y.

Review of this application is complete. There is one question.

1. The phone appears to have a USB interface for connection to a PC. The label does not show the FCC logo indicating that a DoC has been done for compliance with Part 15B. If not using DoC and showing the FCC logo, then a composite JBP PC-Peripheral filing must be made together with this application. Please provide some additional information on this issue.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender. Revised documentation should not be emailed, but instead should be submitted through "Add Attachment" function at the UL-CCS website. Please have your Assessment Number and FCC ID/IC Certification number handy. You may use the following link: <https://cert.ccsemc.com/filing/>

Best regards,

Tim Dwyer

Hello Tim,

Sorry for delayed response. The below is an answer from Samsung.

The USB port in the phone is just used for Charging function not for USB data communication purpose.

Thanks and Best Regards,

K.Y
