Dear Gregory Czumak,

1. Please remeasure both the cellular and PCS bandedge plots, and the PCS PAR plot, using either an average detector (preferred), or with trace averaging, but not both, and submit the new plots.

==> Please find attached the RF report.

2. Please specify the modulation type and data rate employed by the WLAN during SAR testing.

==> Please find attached the SAR report.

3. Please specify if the BT and WLAN can transmit simultaneously. If they can, simultaneous SAR must be measured, and the application must be submitted to the FCC for review and approval.

==> We confirm that the BT and WLAN cannot transmit simultaneously.

Best Regards
Geoffrey

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Please remeasure both the cellular and PCS bandedge plots, and the PCS PAR plot, using either an average detector (preferred), or with trace averaging, but not both, and submit the new plots.
2. Please specify the modulation type and data rate employed by the WLAN during SAR testing.
3. Please specify if the BT and WLAN can transmit simultaneously. If they can, simultaneous SAR must be measured, and the application must be submitted to the FCC for review and approval.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
