Subject: Re: Re: [Urgent] An application of FCC approval for A3LSCHR631(Final)

Hello Steve,

The GPS function of this model is not capable of Tx.

S-GPS function is it can receive GPS signal during the voice call.

Best Regards,
Ducksu Kim.

Title: Re: [Urgent] An application of FCC approval for A3LSCHR631(Final)

Hi Mr. Kim,

Thanks for the revised operational description.

If simultaneous-GPS is available, please provide information about the Tx characteristic/power and operational description of it.

Page 10 says it is Receive, but I think Simultaneous-GPS spec says that simultaneous Tx with voice Tx is allowed. Please clarify that.

Best Regards,
Steve

Hello Anna Lee,

This is a revised operation description.

Please proceed the FCC approval with this revised operation description.

Best Regards,
Ducksu Kim.
