Hello Steve,

1. Schematics appear to have WLAN circuitry. Please confirm if this will not be available for this application.
=> **The WLAN is not available.**
2. Please confirm what Multislot class is available for PCS GSM mode. How many Tx slots can transmit? SAR Testing appears to be done with only 1 Tx slot.
=> **SCH-W590 doesn't support GPRS,EDGE and only supports GSM.**

Best Regards
Geoffrey

Title : RE: An application of FCC approval A3LSCHW590(SPH-W5900) (final) (1 of 2)

Hello Mr. Jang,

- We had some questions about SCH-W590:
- <?xml:namespace prefix = o ns = "urn:schemas-microsoft-com:office:office" />
1. Schematics appear to have WLAN circuitry. Please confirm if this will not be available for this application.
 2. Please confirm what Multislot class is available for PCS GSM mode. How many Tx slots can transmit? SAR Testing appears to be done with only 1 Tx slot.

Thanks,
Steve
