Dear Gregory Czumak,

1. We modified the SAR report.

Please see attached file.

2. GPRS class 12 is not available.

S/W of SGH-A411 doesn't support the GPRS class 12.

S/W is written for GPRS class 10.

Only the PAM support GPRS class 12.

Next time we will inform you available GPRS class in this case.

3. For RF Report_WCDMA, there is a typing error for FCC ID.

So we modified it.

Please see attached file.

Sincerely,

Chase Jang

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information

1. Please explain how the FCC 3G test procedure was followed. What settings were used for the EMC and SAR tests? I do not believe that Note 10 on pp.21/89 – 25/89 of the SAR report is correct. Please address.
2. The Operational Description lists GPRS Class 12. Is this mode available? If so, please provide body SAR data taken in this mode.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
