SAMSUNG

STANDARD BATTERY

TYPE : 3.7V Li-ion

MODEL :

AB553446BE

CE

S/N: AA2A614NS/4-

MADE IN KOREA

- Do not use the battery if it is damaged or deformed.
- Do not use the battery if it is exposed to fire or high temperature.
- Do not use the battery if it is exposed to water or other liquids.
- Do not use the battery if it is exposed to strong magnetic fields.
- Do not use the battery if it is exposed to strong electric fields.
- Do not use the battery if it is exposed to strong vibration.
- Do not use the battery if it is exposed to strong shock.
- Do not use the battery if it is exposed to strong pressure.
- Do not use the battery if it is exposed to strong tension.
- Do not use the battery if it is exposed to strong bending.
- Do not use the battery if it is exposed to strong twisting.
- Do not use the battery if it is exposed to strong crushing.
- Do not use the battery if it is exposed to strong impact.
- Do not use the battery if it is exposed to strong puncture.
- Do not use the battery if it is exposed to strong penetration.
- Do not use the battery if it is exposed to strong abrasion.
- Do not use the battery if it is exposed to strong friction.
- Do not use the battery if it is exposed to strong rubbing.
- Do not use the battery if it is exposed to strong scraping.
- Do not use the battery if it is exposed to strong cutting.
- Do not use the battery if it is exposed to strong drilling.
- Do not use the battery if it is exposed to strong grinding.
- Do not use the battery if it is exposed to strong polishing.
- Do not use the battery if it is exposed to strong cleaning.
- Do not use the battery if it is exposed to strong maintenance.
- Do not use the battery if it is exposed to strong repair.
- Do not use the battery if it is exposed to strong replacement.
- Do not use the battery if it is exposed to strong disposal.
- Do not use the battery if it is exposed to strong recycling.
- Do not use the battery if it is exposed to strong reuse.
- Do not use the battery if it is exposed to strong repackaging.
- Do not use the battery if it is exposed to strong repurposing.
- Do not use the battery if it is exposed to strong repainting.
- Do not use the battery if it is exposed to strong relabeling.
- Do not use the battery if it is exposed to strong rebranding.
- Do not use the battery if it is exposed to strong reengineering.
- Do not use the battery if it is exposed to strong redesigning.
- Do not use the battery if it is exposed to strong restructuring.
- Do not use the battery if it is exposed to strong reorganizing.
- Do not use the battery if it is exposed to strong reconfiguring.
- Do not use the battery if it is exposed to strong reformatting.
- Do not use the battery if it is exposed to strong reinitializing.
- Do not use the battery if it is exposed to strong resetting.
- Do not use the battery if it is exposed to strong rebooting.
- Do not use the battery if it is exposed to strong restarting.
- Do not use the battery if it is exposed to strong reactivating.
- Do not use the battery if it is exposed to strong recharging.
- Do not use the battery if it is exposed to strong reprogramming.
- Do not use the battery if it is exposed to strong reconfiguring.
- Do not use the battery if it is exposed to strong reformatting.
- Do not use the battery if it is exposed to strong reinitializing.
- Do not use the battery if it is exposed to strong resetting.
- Do not use the battery if it is exposed to strong rebooting.
- Do not use the battery if it is exposed to strong restarting.
- Do not use the battery if it is exposed to strong reactivating.
- Do not use the battery if it is exposed to strong recharging.
- Do not use the battery if it is exposed to strong reprogramming.
