Suwon-City, Gyeonggi-do, 16677, Korea

FCC ID:A3LSMC7100

Date: 2017.08.01

To Whom it may Concern

We attest that

@ Test Case: HSUPA Average power check
Maximum Power conditions:

HSUPA : WCDMA B5 /B2 Subset 1/5 mostly Lower than the tune up power with MPR

Reduced Power conditions:

HSUPA : WCDMA B5 /B2 Subset 1/5 mostly Lower than the tune up power with MPR

It is expected by manufacture that MPR for some HSPA subtests may be up to 2dB more than specified by 3GPP, but also as low as 0dB according to the chipset implementation in this model

@ Developer's opinion.

"This each case's powers are satisfy 3GPP power spec. some subset power didn't meet MPR in lab test, but we want to progress with measured value."

Sincerely,
