6CD DUAL CLIENT STATEMENT
FCC ID: A3LSMF976B

To Whom It May Concern:

Samsung attests that the aforementioned device complies with the device protocol requirements and operational restrictions for this 6CD FCC equipment class.

- A. This device will only associate and connect with a low-power indoor Access Point, subordinate device, or standard Access Point and never directly link to any other client devices
- B. This device will always initiate transmission under the control of a low-power indoor AP, subordinate, or standard AP except for brief communications before joining a network. These quick messages will only occur if the client has detected an indoor AP, subordinate or standard access point operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- C. This device when associated and connected with a low-power indoor Access Point subordinate or standard Access Point device, will operate at a power lower as advertised by the indoor Access Point, subordinate, or standard Access Point
 - a. Lower or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates
 - b. Lower than 6 dB below the power of the standard access point advertised

We acknowledge the device restrictions for 6CD equipment operations are prohibited for control or of communications with unmanned aircraft systems, including drones.

Sincerely,

A handwritten signature in black ink, appearing to read "Jenni Chun", is written over a light gray horizontal line.
