

April 30, 2026

Samsung Electronics Co., Ltd.

19 Chapin Rd, Building D.

Pine Brook, NJ 07058 USA

LTE Attestations
FCC ID: A3LSMF976B

To Whom It May Concern:

We attest to the following regarding this equipment authorization:

- 1) MPR is permanently implemented for all channel bandwidths, modulations, and confirm the specific MPR targets and tolerances shown in the SAR Report. All deviations in the power measurements from the specific MPR targets shown in the SAR report are expected and within factory tolerances.
- 2) A-MPR was disabled for all SAR test samples for SAR testing purposes only.
- 3) LTE Rel. 17 implementation is limited. The uplink does not support other carrier aggregation nor enhanced SC-FDMA. Features such as CoMP, HetNet, Relay, SON, cross carrier scheduling, eICIC, enhanced downlink MIMO, MBMS, M2M/D2 are also not supported.
- 4) This device complies with FCC Part 27.75(a)(1) requirements: Mobile and portable stations that operate on any portion of frequencies in the paired 1755-1780 MHz and 2155-2180 MHz band must be capable of operating on all frequencies in the paired 1710-1780 MHz and 2110-2180 MHz band, using the same air interfaces that the equipment utilizes on any frequencies in the paired 1710-1780 MHz and 2110-2180 MHz band.
- 5) This device complies with FCC Part 27.75(a)(2) requirements. Mobile and Portable stations that operate on any portion of frequencies in the 600 MHz band must be capable of operating on all frequencies in the 600 MHz band using the same air interfaces that the equipment utilizes on any frequencies in the 600 MHz band.
- 6) This device complies with FCC Part 27.77 requirements: Mobile and portable station in the 1695-1710 MHz and 1755-1780 MHz bands may operate only when under the control of base station. Base stations that enable mobile or portable equipment to operate in the 1695-1710 MHz and 1755-1780 MHz band are subjected to prior coordination.
- 7) This device complies with FCC Part 27.75(a)(3) requirements. Mobile and portable stations that operate on any portion of frequencies in the 3700-3980 MHz band must be capable of operating on all frequencies in the 3700-3980 MHz band using the same air interfaces that the equipment utilizes on any frequencies in the 3700-3980 MHz band.
- 8) This device complies with FCC Part 27.75(a)(4) requirements. Mobile and portable stations that operate on any portion of frequencies in the 3450-3550 MHz band must be capable of operating on all frequencies in the 3450-3550 MHz band using the same air interfaces that the equipment utilizes on any frequencies in the 3450-3550 MHz band.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jenni Chun, General Manager
