

SAMSUNG ELECTRONICS AMERICA, INC.
American QA Lab
19 Chapin Rd. Building D
Pine Brook, NJ 07058

Date: **July. 14, 2017**

FCC ID: A3LSMJ330KOR

We attest that

HSDPA : WCDMA B2 / B5 Subtest 3, 4 mostly lower than the tune up power with MPR

DC-HSDPA : WCDMA B5 Subtest 3,4 mostly lower than the tune up power with MPR
WCDMA B2 Subset 3 mostly higher than the tune up power with MPR
WCDMA B2 Subset 4 mostly lower than the tune up power with MPR

HSUPA : WCDMA B2 / B5 Subset 1, 5 mostly lower than the tune up power with MPR

@ Developer's opinion.

It is expected by the manufacture that MPR for some HSPA subtests may be up to 2dB more than specified by 3GPP, "This each case's powers are satisfy 3GPP power spec. some subset power didn't meet MPR in lab test, but we want to progress with measured value."

Sincerely,

A handwritten signature in black ink, appearing to be "Chanho, Youn".
