Internal Photographs

A photograph of a disassembled smartphone, likely an iPhone 12, laid out on a blue textured surface. The main logic board is the central component, featuring a large M1 chip, various smaller chips, and a large yellow battery. To the left of the logic board is the camera module, which includes three lenses and a flash. Below the logic board is the battery cover, a white plastic piece with a cutout for the camera. A ruler is placed vertically on the right side of the image for scale, showing measurements in centimeters from 1 to 20.

A photograph of a disassembled smartphone, likely an iPhone 12, showing the main logic board, camera module, and battery. The logic board is green and populated with various components, including the A14 Bionic chip, RAM, and storage. The camera module is visible on the left, featuring three lenses and a LiDAR scanner. The battery is a large, yellow, rectangular component. A ruler is placed vertically on the right side of the image for scale, showing measurements in centimeters. The background is a light blue surface.
