

Package contents

- Device
- USB cable
- Ejection pin
- Quick start guide

- The items supplied with the device and their images may vary by region.
- If you use a screen protector, make sure it supports the use of the ultrasonic fingerprint sensor.
- The included USB cable supports up to 3A charging.

QUICK START GUIDE

Inserting a nano-SIM card (sold separately)

► Single SIM card tray:

► Dual SIM card tray:

Insert the ejection pin into the tray's hole to remove the tray.
Support for single SIM and dual SIM models may vary by region.
Place the SIM or USIM card on the tray with the gold-colored contacts facing upwards and gently press the SIM or USIM card into the tray to secure it.

Safety information

Read all safety information before using the device to ensure safe and proper use. You can access more safety information through the device's settings menu.

Follow the warnings below to prevent incidents, such as fires or explosions, injuries, or damage to the device

- Your device contains magnets. Keep it away from credit cards, implanted medical devices, and other devices that may be affected by magnets. In the case of medical devices, keep your device more than 15 cm apart. Stop using your device if you suspect any interference with your medical device and consult your physician or your medical device manufacturer.

- Do not expose the device to physical impact or damage.
- Use only Samsung-approved batteries, chargers, and cables specifically designed for your device.
- Prevent the multipurpose jack and battery terminals from coming into contact with foreign materials such as metal, liquids, or dust.
- If any part of the device, such as the glass or acrylic body, is broken, smokes, or emits a burning odor, stop using the device immediately. Use the device again only after it has been repaired at a Samsung Service Center or an authorized service center.
- Do not turn on or use the device when the battery compartment is exposed.
- Do not disassemble or reuse the battery.
- The device can be used in locations with an ambient temperature of 0 °C to 35 °C. You can store the device at an ambient temperature of -20 °C to 50 °C. Using or storing the device outside of the recommended temperature ranges may damage the device or reduce the battery's lifespan.

To prevent possible hearing damage when using a headset, do not listen to sound at high volume for long periods.

Your device supports water- and dust-resistance (tested under IP68 conditions). Follow these tips carefully to maintain the water- and dust-resistant performance of the device.

- Do not expose the device to swimming pool water or sea water.
- Do not expose the device to water moving with force. A sudden rise in the water pressure may exceed the guaranteed level of water resistance.
- If the device is exposed to water, wipe it with a soft and clean cloth, and then dry it thoroughly.
- If the device is exposed to other liquids, such as soapy water, oil, perfume, sunscreen, hand cleaner, or chemical products such as cosmetics, clean the device with fresh water that does not flow, wipe it with a soft and clean cloth, and then dry it thoroughly before use to maintain the water resistance.
- If the device has been immersed in water or the microphone or speaker is wet, sound may not be heard clearly during a call.
- Your device is water- and dust-resistant and meets the following international standards. IP68 water resistance rating certification: According to the requirements of the IEC 60529 standard, it was tested in 1.5 m fresh water for 30 minutes without moving. Despite this classification, it is still possible for your device to be damaged in certain situations.

If your device is frozen and unresponsive, press and hold the Side key and the Volume Down key simultaneously for more than 7 seconds to restart it.

It is recommended not to use fixed graphics on part or all of the touch screen for extended periods. Doing so may result in afterimages (screen burn-in) or ghosting.

Federal Communication Commission (FCC) Certification information

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

If your device required FCC approval, you can find the FCC certification by opening Settings → About phone → Status or Status information.

Specific Absorption Rate (SAR) certification information

Your mobile is designed not to exceed the limits for exposure to radio waves recommended by international guidelines.

For SAR values specific to your model, visit www.samsung.com/sar and search for your region and device with the model number.
