Dear Chris,

I attached revised C2PC cover letter, Radiated Test report and test setup photo. Also I attached internal photo, please change old one. Thankyou.

Best Regards,
sung-kyu Cho

Dear Sung-kyu Cho,

You are listed as the Technical Contact for the above referenced TCB application. The following item(s) need(s) to be resolved before the review can be continued:

The antenna specification for the new antenna does not document the antenna gain in dBi. The antenna design appears significantly different, and thus the provisions of FCC 15.203 and 15.204 must be addressed (antennas of same type and lower gain do not need re-testing, but antennas of higher gain or of different type need additional testing). Please note that C2PC cover letter indicates the new antenna has higher gain (the original application used a 3.5dBi gain antenna).

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
