

QUICK START GUIDE

SM - W723

SAMSUNG

Printed in Korea
GH68-??? Rev.1.0
English (CA). 03/2016

Device layout

To turn on the device, press and hold the Power key for a few seconds.

- Before turning on your device for the first time, you must connect the device to a power supply.

To turn off the device, tap → **Power** → **Shut down**. Alternatively, press and hold the Power key until the lock screen appears, and then drag the lock screen downwards.

Accessing more information

Visit www.samsung.com/ca to view device information, the user manual, and more.

- The user manual may not be available depending on the web browser or service provider.

Charging the battery

Before using the device for the first time, you must charge the battery.

- The charger should remain close to the electric socket and easily accessible while charging.

Connecting the Keyboard Cover

- 1 Attach the device to the stand.
Ensure that the rear camera is correctly aligned with the camera hole in the stand.
- 2 Connect the keyboard dock port at the bottom of the device to the connector on the keyboard, and then set the device in position.

Switching mode

You can switch between PC mode and tablet mode.
On the taskbar, tap → **Tablet mode**.

Samsung Mobile Products and Recycling

Samsung cares for the environment and encourages its customers to recycle Samsung mobile devices and genuine Samsung accessories, and other unwanted electronics, in accordance with local regulations and through an approved recycler.

Proper disposal of your mobile device and its internal Lilon battery is not only important for safety, it benefits the environment. For safe disposal options of your device, contact your nearest service center.

Note: For safety,

- Do not handle the device if the battery is damaged or leaking
- Never dispose of the device in a fire because the battery may explode.

To view more information about device and battery disposal, tap → **Settings** → **Extras** → **Galaxy Settings** → **Legal information** → **Safety information**.

If your device is frozen and unresponsive, press and hold the Power key for more than 10 seconds until the device turns off. Then, press and hold the Power key again to restart it.

Safety information

Read all safety information before using the device to ensure safe and proper use.

Warning

The device and the Keyboard Cover contain magnets. The American Heart Association (US) and the Medicines and Healthcare Products Regulatory Agency (UK) both warn that magnets can affect the operation of implanted pacemakers, cardioverters, defibrillators, insulin pumps or other electro medical devices (collectively, "Medical Device") within the range of 15 cm (6 inches). If you are a user of any of these Medical Devices, DO NOT USE THIS DEVICE AND THE KEYBOARD COVER UNLESS YOU HAVE CONSULTED WITH YOUR PHYSICIAN.

Follow the warning information provided below to prevent incidents such as fire or explosion

- Do not expose the device to physical impact or damage.
- Use manufacturer-approved batteries, chargers, accessories, and supplies.
- Prevent the multipurpose jack from contacting conductive elements, such as metal or liquids.
- Do not touch the device with wet hands. Also, do not use the device in humid environments, such as rest rooms, or during water-based activities, such as swimming.
- If any part of the device is cracked or broken, stop using the device immediately and take it to a Samsung Service Centre.

Follow the warnings below to prevent injury to people or damage to the device

- Do not allow children or animals to chew or suck the device.
- Do not poke eyes, ears, or other body parts with the device or insert the device into the mouth.
- If the device has a camera flash or light, do not use it close to the eyes of people or animals.
- The device can be used in locations with an ambient temperature of 0°C to 35°C. You can store the device at an ambient temperature of -20°C to 50°C. Using or storing the device outside of the recommended temperature ranges may damage the device or reduce the battery's lifespan.
- Do not store your device near or in heaters, microwaves, cooking equipment, or high pressure containers.
- Keep your device dry.
- Do not use your device outdoor during a thunderstorm.
- Comply with all safety warnings and regulations regarding mobile device usage while operating a vehicle.

To prevent possible hearing damage when using a headset, do not listen to sound at high volume for long periods.

To view the full safety information, tap  → **Settings** → **Extras** → **Galaxy Settings** → **Legal information** → **Safety information**.

FCC Notice

Cautions

Any changes or modifications to your device not expressly approved in this document could void your warranty for this equipment, and void your authority to operate this equipment. Only use approved chargers. The use of any unauthorized accessories may be dangerous and void the warranty if said accessories cause damage or a defect to the device.

Although your device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.

Information to User

This equipment has been tested and found to comply with the limits of a Class B digital device. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation; if this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient/relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Part 15.19 Statements

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Exposure to Radio Frequency (RF) Signals

Your wireless device is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for radio frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. government. These FCC exposure limits are derived from the recommendations of two expert organizations, the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The exposure limit set by the FCC for wireless mobile devices employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless devices to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg). The FCC exposure limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements. SAR tests are conducted using recommended operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a new model device is available for sale to the public, it must be tested and certified to it does not exceed the exposure limit established by the FCC. Tests for each model are performed in positions and locations (e.g. near the body) as required by the FCC.

SAR information on this and other models can be viewed on-line at <http://www.fcc.gov/oet/ea/fccid/>. This site uses the FCC ID number A3LSMW723
