

Music Share

Introduction

Using the Music Share feature, you can share a Bluetooth speaker that is already connected to your tablet with another person. You can also listen to the same music on your Galaxy Buds and another person's Galaxy Buds.

This feature is available only on devices that support the Music Share feature.

Sharing a Bluetooth speaker

You can listen to music on your tablet and your friend's phone through your Bluetooth speaker.

- 1 Make sure that your tablet and your Bluetooth speaker are connected.
Refer to [Pairing with other Bluetooth devices](#) for how to connect.
- 2 On your tablet, open **Settings**, tap **Connections** → **Bluetooth** →  → **Advanced settings**, and then tap the **Music Share** switch to turn it on.
You can use additional features, such as setting who to share your device with, by tapping **Music Share**.
- 3 On your friend's phone, select your speaker from the list of the Bluetooth devices.
- 4 On your tablet, accept the connection request.
Your speaker will be shared.
When you play music through your friend's phone, the music playing through your tablet will be paused.

Listening to music together with Galaxy Buds

You can listen to music on your tablet together through your Buds and a friend's Buds. This feature is supported only on the Galaxy Buds series.

- 1 Make sure that your tablet, your friend's phone, and a pair of Buds are connected to each other.
Refer to [Pairing with other Bluetooth devices](#) for how to connect.
- 2 On your friend's phone, open **Settings**, tap **Connections** → **Bluetooth** → **⋮** → **Advanced settings**, and then tap the **Music Share** switch to turn it on.
You can use additional features, such as setting who to share your device with, by tapping **Music Share**.
- 3 On your tablet, open the notification panel and tap **Media output**.
- 4 Tap **Music Share** and select your friend's Buds from the detected devices list.
- 5 On your friend's phone, accept the connection request.
When you play music through your tablet, you can listen to it together through both Buds.

Smart View

(Mirroring on a TV screen)

View your tablet's displayed content on a large screen by connecting your tablet to a screen mirroring-enabled TV or monitor.

- 1 Open the notification panel, swipe downwards, and then tap  (**Smart View**).
 - 2 Select a device to mirror your tablet's screen.
-  When you play a video with Smart View, the resolution may vary depending on the TV model.

Samsung Flow

Connect your tablet to a phone or a computer and use them together doing things like checking notifications and sharing content.

Samsung Flow must be installed on both devices that you want to connect. If Samsung Flow is not installed, download it from **Galaxy Store** or **Play Store**. For computers, you can download it from the Microsoft Store.

 This feature is only available on some Samsung Android devices and computers running Windows 10 or higher.

Connecting to a phone

- 1 On your phone, open the Samsung Flow app.
- 2 On your tablet, open the **Samsung Flow** app and tap **Connect to phone**.
If your tablet is connected to a computer, tap  → **Connect to phone**.
- 3 Select your phone from the detected devices list.
If the connection method selection pop-up window appears, select the method you want.
- 4 Confirm the passkey on both devices.
The devices will be connected.

Connecting to a computer

- 1 On your tablet, open the **Samsung Flow** app and tap **Connect to computer**.
If your tablet is connected to a phone, tap  → **Connect to computer**.
- 2 On your computer, open the Samsung Flow app and tap **Start**.
- 3 Select your tablet from the detected devices list.
If the connection method selection pop-up window appears, select the method you want.
- 4 Confirm the passkey on both devices.
The devices will be connected.

Daily Board

Introduction

Use your tablet as a picture frame or bulletin board when it is charging with a USB cable or charging dock. You can enjoy a slide show with your favourite images and check information, such as the time, weather, or your calendar. You can also create a note and control music while using it.

Starting Daily Board

- 1 Charge the device with a USB cable or charging dock.
 -  To connect the device to a charging dock, slide the device into the charging dock to bring the device's connectors and charging dock's charging terminals into contact with each other.
- 2 Open the notification panel and tap **Tap here to start Daily Board**.
The Daily Board main screen will appear and you can check the clock, weather, or calendar.

Using Daily Board

Playing the slide show

You can use your device as a picture frame. Enjoy slide shows of your favourite images on Daily Board.

On the Daily Board main screen, swipe to the right to play a slide show.

 To add your favourite images to display to a slide show, open **Settings**, tap **Advanced features** → **Daily Board** → **Slideshow** →  next to **Albums**, and then select the album.

Making a note on Daily Board

You can use your device as a bulletin board to make a note on Daily Board.

1 Swipe to the left on the Daily board main screen and tap .

2 Select a pen and write or draw on the screen.

3 Tap **Done**.

The note you make will be pinned to Daily Board.

Controlling the music

You can control music playback on Daily Board.

Tap  and select an app to control playback.

Configuring settings for Daily Board

Configure various settings for Daily Board and make Daily board more personalized.

Open **Settings** and tap **Advanced features** → **Daily Board**.

- **Time, weather, and calendar:** Change the setting for Daily Board main screen.
- **Memo:** Turn the memo feature on Daily Board on or off.
- **SmartThings:** Set the device to show SmartThings devices and scenes on the Daily Board.
- **Slideshow:** Select the images to add to the slide show and change the settings for slide show, such as the image order, transition speed, and style. You can also set the clock or weather information shown on the slide show.
- **Music:** Turn the music controller feature on Daily Board on or off.
- **Charge battery or tap icon:** While charging, the Daily Board button () will be added to the navigation bar.
 - **Add Daily Board to Apps screen:** The Daily Board icon () will be added to the Apps screen.
 - **Auto start when connected to USB charger:** Daily Board will be start automatically when the device is charging with a USB cable.
- **Same as screen saver:** Use Daily Board as a screen saver.
- **Dark mode:** Apply Dark mode to the Daily Board. You can also set the schedule to apply Dark mode.
- **Turn off as scheduled:** Set the schedule to close Daily Board. When activating this feature, tap **Set time** to set the time to close Daily Board.
- **About Daily Board:** Check out the Daily Board version and legal information.
- **Contact us:** Ask questions or check frequently asked questions.

Closing Daily Board

To close Daily Board, tap the Home button or the Back button.

Link to Windows

(Using the device through a computer connection)

Access and use the mobile device's data, such as apps or pictures, on a Windows computer.

-  • It is recommended to use the latest version of Windows and the **Phone Link** app to fully use this feature.
- A Microsoft account is required to use this feature. When you create a Microsoft account, you can sign in to all Microsoft devices and services, such as Microsoft Office apps and Windows 10.

Connecting to a computer

- 1 On your mobile device, open **Settings** and tap **Connected devices** → **Link to Windows**.
- 2 Follow the on-screen instructions to complete the connection.

 Visit <https://aka.ms/setupltw> for details.

Accessing data and notifications from your mobile device on the computer

Open the **Phone Link** app on the computer and select a category you want.

-  Available features and menus may vary depending on the device's software version, app version, or model.

Samsung DeX

Use your mobile device's features in an interface environment similar to a computer.

Swipe downwards on the notification panel and tap  (**DeX**). Alternatively, open **Settings**, tap **Connected devices** → **Samsung DeX** → **Start DeX**.

To close the Samsung DeX, select  at the left bottom of the screen and select **Exit DeX**.

- When starting or ending Samsung DeX, running apps may be closed.
- Some apps or features may not be available when using Samsung DeX.

Using Samsung DeX with the Book Cover Keyboard

You can set the device to switch to Samsung DeX automatically when connecting the Book Cover Keyboard, which is sold separately.

Open **Settings**, tap **Connected devices** → **Samsung DeX**, and then tap the **Auto start when Book Cover Keyboard is connected** switch to turn it on.

Google apps

Google provides entertainment, social network, and business apps. You may require a Google Account to access some apps.

To check out more app information, access each app's help menu.

- **Chrome:** Search for information and browse webpages.
- **Gmail:** Send or receive emails through the Google Mail service.
- **Maps:** Find your location on the map, search the world map, and access location information for various places around you.
- **YT Music:** Enjoy various music and videos provided by YouTube Music. You can also access the music collections stored on your device and play them.
- **Google TV:** Purchase or rent videos, such as movies and TV programmes, from **Play Store**.
- **Drive:** Store your content on the cloud, access it from anywhere, and share it with others.
- **YouTube:** Watch or create videos and share them with others.
- **Photos:** Search for, manage, and edit all your pictures and videos from various sources in one place.
- **Google:** Search for items on the internet or your device.
- **Meet:** Make video calls or create or join video meetings.
- **Messages:** Send and receive messages on your device or computer, and share various content, such as images and videos.

Some apps may not be available depending on the carrier or model.

Settings

Introduction

Customize device settings.

On the Apps screen, tap **Settings**. Alternatively, open the notification panel and tap .

To search for settings by entering keywords, tap . You can also search for settings by selecting a tag under **Suggestions**.

Samsung account

Sign in to your Samsung account and manage it.

On the Settings screen, tap **Samsung account**.

Connections

Options

Change settings for various connections, such as the Wi-Fi feature and Bluetooth.

On the Settings screen, tap **Connections**.

- **Wi-Fi:** Turn on the Wi-Fi feature to connect to a Wi-Fi network and access the internet or other network devices. Refer to [Wi-Fi](#) for more information.
- **Bluetooth:** Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices. Refer to [Bluetooth](#) for more information.

- **Flight mode:** Set the device to turn off all wireless functions on your device. You can use only non-network services.

Follow the regulations provided by the airline and the instructions of aircraft personnel. In cases where it is allowed to use the device, always use it in flight mode.

- **SIM manager:** Activate your SIM or USIM cards and customize the SIM card settings. Refer to [SIM manager](#) for more information.

- **Mobile networks:** Configure your mobile network settings.

- **Data usage:** Keep track of your data usage amount and customize the settings for the limitation. Set the device to automatically disable the mobile data connection when the amount of mobile data you have used reaches your specified limit.

You can turn on the data saver feature to prevent some apps running in the background from sending or receiving data. Refer to [Data saver \(Mobile network enabled models\)](#) for more information.

You can also set apps to use only a Wi-Fi or mobile data, or both. Refer to [Allowed networks for apps \(Mobile network enabled models\)](#) for more information.

- **Mobile Hotspot and Tethering:** Use the tablet as a mobile hotspot to share the tablet's mobile data connection with other devices. For more information about Mobile Hotspot, refer to [Mobile Hotspot \(Mobile network enabled models\)](#).

You may incur additional charges when using this feature.

- **Tethering:** Use tethering to share the device's internet connection with other devices.

- **More connection settings:** Customize settings to control other features. Refer to [More connection settings](#) for more information.

Some features may not be available depending on the model.

Wi-Fi

Turn on the Wi-Fi feature to connect to a Wi-Fi network and access the internet or other network devices.

Connecting to a Wi-Fi network

1 On the Settings screen, tap **Connections** → **Wi-Fi** and tap the switch to turn it on.

2 Select a network from the Wi-Fi networks list.

Networks with a lock icon require a password.

-  • Once the device connects to a Wi-Fi network, the device will reconnect to that network each time it is available without requiring a password. To prevent the device from connecting to the network automatically, tap  next to the network and tap the **Auto reconnect** switch to turn it off. To delete the saved connection information for a network, tap  next to the network and tap **Forget**.
- If you cannot connect to a Wi-Fi network properly, restart your device's Wi-Fi feature or the wireless router.

Checking out the Wi-Fi network quality information

Check out the Wi-Fi network quality information, such as the speed and stability.

On the Settings screen, tap **Connections** → **Wi-Fi** and tap the switch to turn it on. The network quality information will appear under the Wi-Fi networks. If it does not appear, tap  → **Intelligent Wi-Fi** and tap the **Show network quality info** switch to turn it on.

-  The quality information may not appear depending on the Wi-Fi network.

Sharing Wi-Fi network passwords

If you make a request to a person who is connected to a secured Wi-Fi network to share its password, you can connect to the network without entering the password. This feature is available between devices that have each other's contacts and the screen of the other device must be turned on.

1 On the Settings screen, tap **Connections** → **Wi-Fi** and tap the switch to turn it on.

2 Select a network from the Wi-Fi networks list.

3 Tap **Request password**.

4 Accept the share request on the other device.

The Wi-Fi password is entered on your device and it is connected to the network.

Wi-Fi Direct

Wi-Fi Direct connects devices directly through a Wi-Fi network without requiring an access point.

- 1 On the Settings screen, tap **Connections** → **Wi-Fi** and tap the switch to turn it on.
- 2 Tap  → **Wi-Fi Direct**.
The detected devices are listed.
If the device you want to connect to is not in the list, turn on its Wi-Fi Direct feature.
- 3 Select a device to connect to.
The devices will be connected when the other device accepts the Wi-Fi Direct connection request.
To end the device connection, select the device to disconnect from the list.

Bluetooth

Use Bluetooth to exchange data or media files with other Bluetooth-enabled devices.

Precautions for using Bluetooth

- Samsung is not responsible for the loss, interception, or misuse of data sent or received through Bluetooth.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by the Bluetooth SIG, may be incompatible with your device.
- Do not use the Bluetooth feature for illegal purposes (for example, pirating copies of files or illegally tapping communications for commercial purposes). Samsung is not responsible for the repercussion of illegal use of the Bluetooth feature.

Pairing with other Bluetooth devices

- 1 On the Settings screen, tap **Connections** → **Bluetooth** and tap the switch to turn it on.
The detected devices will be listed.
 - 2 Select a device to pair with.
If the device you want to pair with is not on the list, set the device to enter Bluetooth pairing mode. Refer to the other device's user manuals.
-  Your tablet is visible to other devices while the Bluetooth settings screen is open.
- 3 Accept the Bluetooth connection request on your tablet to confirm.
The devices will be connected when the other device accepts the Bluetooth connection request.
To unpair the devices, tap  next to the device name to unpair and tap **Unpair**.

Sending and receiving data

Many apps support data transfer through Bluetooth. You can share data, such as contacts or media files, with other Bluetooth devices. The following actions are an example of sending an image to another device.

- 1 Open the **Gallery** app and select an image.
- 2 Tap  → **Bluetooth** and select a device to receive the image.
If the device you want to pair with is not in the list, turn on its visibility option.
- 3 Accept the Bluetooth connection request on the other device.

Data saver (Mobile network enabled models)

Reduce your data usage by preventing some apps running in the background from sending or receiving data.

On the Settings screen, tap **Connections** → **Data usage** → **Data saver** and tap the switch to turn it on.

When the data saver feature is turned on, the  icon will appear on the status bar.

 To select apps to use data without restriction, tap **Allowed to use data while Data saver is on** and select apps.

Allowed networks for apps (Mobile network enabled models)

Set apps to use only a Wi-Fi or mobile data, or both.

For example, you can set the device to use only mobile data for apps that you want to keep secure or streaming apps that can be disconnected. Even if you do not turn off the Wi-Fi feature, the apps will open using the mobile data.

On the Settings screen, tap **Connections** → **Data usage** → **Allowed networks for apps**. Tap an app you want from the apps list and select a network option.

 You may incur additional charges when using the mobile data.

Mobile Hotspot (Mobile network enabled models)

Use your tablet as a mobile hotspot to share your tablet's mobile data connection with other devices.

- 1 On the Settings screen, tap **Connections** → **Mobile Hotspot and Tethering** → **Mobile Hotspot**.
 - 2 Tap the switch to turn it on.
You can change the network name, password, and more.
The  icon appears on the status bar.
 - 3 On the other device's screen, search for and select your tablet from the Wi-Fi networks list.
Alternatively, tap **QR code** on the Mobile Hotspot screen and scan the QR code with the other device.
-  • If the mobile hotspot is not found, on your tablet, set **Band** to **2.4 GHz**, tap **Advanced**, and then tap the **Hidden network** switch to turn it off.
 - If you turn on the **Auto Hotspot** feature, you can share your tablet's mobile data connection with other devices signed in to your Samsung account.

More connection settings

Customize settings to control other connection features.

On the Settings screen, tap **Connections** → **More connection settings**.

- **Nearby device scanning:** Set the tablet to scan for nearby devices to connect to.
- **Printing:** Configure settings for printer plug-ins installed on the device. You can search for available printers or add one manually to print files. Refer to [Printing](#) for more information.
- **VPN:** Set up virtual private networks (VPNs) on your device to connect to a school or company's private network.
- **Private DNS:** Set the device to use the security enhanced private DNS.
- **Ethernet:** When you connect an Ethernet adapter, you can use a wired network and configure network settings.

Printing

Configure settings for printer plug-ins installed on the device. You can connect the device to a printer through Wi-Fi or Wi-Fi Direct, and print images or documents.

Some printers may not be compatible with the device.

Adding printer plug-ins

Add printer plug-ins for printers you want to connect the device to.

- 1 On the Settings screen, tap **Connections** → **More connection settings** → **Printing** → **Download plugin**.
- 2 Select a printer plug-in and install it.
- 3 Select the installed printer plug-in.
The device will automatically search for printers that are connected to the same Wi-Fi network as your device.
- 4 Select a printer to add.

To add printers manually, tap **⋮** → **Add printer**.

Printing content

While accessing content, such as images or documents, access the options list, tap **Print** → **▼** → **All printers...**, and then select a printer.

Printing methods may vary depending on the content type.

Connected devices

Change settings for device connections.

On the Settings screen, tap **Connected devices**.

- **Quick Share:** Change the Quick Share settings. Refer to [Quick Share](#) for more information.
- **Auto switch Buds:** Set the Galaxy Buds to switch from another device to your tablet when you make or answer a call, play media, and more. You can use this feature only when you signed in to the same Samsung account on the other device and you are wearing your Galaxy Buds.
- **Call & text on other devices:** Connect your tablet and phone to use calling and messaging features on the tablet with your phone number. You must register and sign in to the same Samsung account on the tablet and phone. Some calling and messaging features may not be available.
- **Continue apps on other devices:** Use your tablet's apps on other devices signed in to your Samsung account.
- **Link to Windows:** Access and use the mobile device's data, such as apps or pictures, on a Windows computer. Refer to [Link to Windows](#) for more information.
- **Multi control:** Use a mouse and keyboard connected to a Samsung computer that supports this feature on your tablet.
- **Second screen:** Connect your tablet and computer to use the tablet as an additional display for the computer. Your computer must be running Windows 10 or higher.
- **Samsung DeX:** Use your mobile device's features in an interface environment similar to a computer. Refer to [Samsung DeX](#) for more information.
- **Smart View:** View your tablet's displayed content on a large screen by connecting your tablet to a screen mirroring-enabled TV or monitor. Refer to [Smart View](#) for more information.
- **SmartThings:** Control and manage smart appliances and Internet of Things (IoT) products. Refer to [SmartThings](#) for more information.
- **Android Auto:** Connect your device to a vehicle and control some of your device's features on the vehicle's display.

Some features may not be available depending on the model.

Modes and Routines

Introduction

Select a mode based on your current activity or location, or add your repeated usage patterns as routines and use your device more conveniently.

On the Settings screen, tap **Modes and Routines**.

Using modes

Adding modes

- 1 On the Settings screen, tap **Modes and Routines** → **Modes**.
- 2 Select a mode you want or tap **Add mode** to add your own modes.

Running modes

Modes will run automatically when their conditions are detected. You can also run them manually by tapping the button whenever you want.

To run modes manually, select the mode you want and tap **Turn on**.

To turn off a running mode, tap the mode and tap **Turn off**.

Using routines

Adding routines

- 1 On the Settings screen, tap **Modes and Routines** → **Routines**.
- 2 Tap  and select a routine you want or tap **+** to add your own routines.
If you want to set the routine's running condition to manual, tap **Start manually**. This option will appear only when there are no running conditions set. When a pop-up window appears, tap **Add**. You can add the routine to the Home screen as a widget and access it directly.

Running routines

Auto routines will run automatically when their conditions are detected. For routines which you set the running condition as **Start manually**, you can run them manually by tapping the button whenever you want.

To run routines manually, tap  next to the routine you want to run. Alternatively, tap the routine's widget on the Home screen.

To stop running routines, tap the routine under **Running** and tap **Stop**.

Sound

Options

Change settings for various sounds on the device.

On the Settings screen, tap **Sound**.

- **Sound / Mute:** Set the device to use sound mode or silent mode.
- **Temporary mute:** Set the device to use silent mode for a certain period.
- **Ringtone:** Change the call ringtone.
- **Notification sound:** Change the notification sound.
- **System sound:** Change the sound to use for certain actions, such as charging the device.
- **Volume:** Adjust the device's volume level.
- **Sound quality and effects:** Set the device's sound quality and effects. Refer to [Sound quality and effects](#) for more information.
- **Separate app sound:** Set the device to play media sound from a specific app separately on another audio device. Refer to [Separate app sound](#) for more information.

Some features may not be available depending on the model.

Sound quality and effects

Set the device's sound quality and effects.

On the Settings screen, tap **Sound** → **Sound quality and effects**.

- **Dolby Atmos**: Select a surround sound mode optimized for various types of audio, such as movies, music, and voice. With Dolby Atmos, you can experience moving audio sounds that flow all around you.
- **Dolby Atmos for gaming**: Experience the Dolby Atmos sound optimized for games while playing games.
- **Equalizer**: Select an option for a specific music genre and enjoy optimized sound.
- **UHQ upscaler**: Enhance the sound resolution of music and videos when using wired headphones.
- **Adapt sound**: Set the best sound for you.

Depending on the model, you must connect headphones to use some features.

Separate app sound

Set the device to play media sound from a specific app on a connected Bluetooth speaker or headset.

For example, you can listen to the Navigation app through your device's speaker while listening to playback from the Music app through a vehicle's Bluetooth speaker.

- 1 On the Settings screen, tap **Sound** → **Separate app sound** and tap the switch to turn it on.
- 2 Select an app to play media sounds separately and tap the Back button.
- 3 Select a device for playing the selected app's media sound.

Notifications

Change the notification settings.

On the Settings screen, tap **Notifications**.

- **App notifications:** Select the apps you want to receive notifications from.
- **Lock screen notifications:** Set how to show notifications on the locked screen.
- **Notification pop-up style:** Select a notification pop-up style and change the settings.
- **Do not disturb:** Set the device to mute all sounds except for allowed exceptions.
- **Advanced settings:** Configure advanced settings for notifications.

Display

Options

Change the display and the Home screen settings.

On the Settings screen, tap **Display**.

- **Light / Dark:** Turn Dark mode on or off.
- **Dark mode settings:** Reduce eye strain by applying the dark theme when using the device at night or in a dark place. You can set a schedule for applying Dark mode.
 The dark theme may not be applied in some apps.
- **Brightness:** Adjust the brightness of the display.
- **Adaptive brightness:** Set the device to keep track of your brightness adjustments and apply them automatically in similar lighting conditions.
- **Motion smoothness:** Change the refresh rate of the screen. When a high refresh rate is set, the screen will scroll more smoothly. Refer to [Motion smoothness](#) for more information.
- **Eye comfort shield:** Reduce eye strain by limiting the amount of blue light emitted by the screen. You can set a schedule for applying this feature.

- **Screen mode:** Change the screen mode to adjust the display's colour and contrast. **Vivid** mode may not be compatible with third-party apps.
- **Font size and style:** Change the font size and style.
- **Screen zoom:** Make the items on the screen larger or smaller.
- **Screen timeout:** Set the length of time the device waits before turning off the display when it is idle.
- **Edge panels:** Change the settings for the Edge panel.
- **Taskbar:** Change the settings for the taskbar. Refer to [Taskbar](#) for more information.
- **Navigation bar:** Change the navigation bar settings. Refer to [Navigation bar \(soft buttons\)](#) for more information.
- **Touch sensitivity:** Increase the touch sensitivity of the screen for use with screen protectors.
- **Screen saver:** Set the device to launch a screensaver when the device is charging.

Some features may not be available depending on the model.

Motion smoothness

The refresh rate is the number of times the screen is refreshed every second. Use a high refresh rate to prevent the screen from flickering when switching between screens. The screen will scroll more smoothly. When you select a standard refresh rate, you can use the battery longer.

- 1 On the Settings screen, tap **Display → Motion smoothness**.
- 2 Select a refresh rate.
 - **Adaptive:** Get smoother animations and scrolling by automatically adjusting your screen refresh rate into a higher one.
 - **Standard:** Use a standard refresh rate in normal situations to conserve battery power.

Wallpaper and style

Change the wallpaper settings for the Home screen and the locked screen.

On the Settings screen, tap **Wallpaper and style**.

Home screen

Configure settings for the Home screen, such as the screen layout.

On the Settings screen, tap **Home screen**.

Lock screen

Options

Change the settings for the locked screen.

On the Settings screen, tap **Lock screen**.

- **Screen lock type:** Change the screen lock method.
- **Smart Lock:** Set the device to unlock itself when trusted locations or devices are detected. Refer to [Smart Lock](#) for more information.
- **Secure lock settings:** Change screen lock settings for the selected lock method.
- **Lock screen:** Change the settings of the items displayed on the locked screen and the wallpaper for the locked screen.
- **Widgets:** Change the settings of the items displayed when you tap the clock on the locked screen.
- **Touch and hold to edit:** Set the device to display the editing options when you touch and hold the locked screen.
- **Roaming clock:** Change the clock to show both the local and home time zones on the locked screen when roaming.
- **About Lock screen:** Check out the Lock screen version and legal information.

- Some features may not be available depending on the carrier or model.
- The available options may vary depending on the screen lock method selected.

Smart Lock

You can set the device to unlock itself and remain unlocked when trusted locations or devices are detected.

For example, if you have set your home as a trusted location, when you get home your device will detect the location and automatically unlock itself.

On the Settings screen, tap **Lock screen** → **Smart Lock** and follow the on-screen instructions to complete the setup.

- This feature will be available to use after you set a screen lock method.
- When you turn on the device or do not use it for four hours, you must unlock the screen using the pattern, PIN, or password you set.

Security and privacy

Options

Check the device's security and privacy status and change the settings.

On the Settings screen, tap **Security and privacy**.

- **Lock screen:** Change the settings for the locked screen.
- **Accounts:** Change the settings for your accounts.
- **Find My Mobile:** Turn the Find My Mobile feature on or off. Access smarthingsfind.samsung.com to track and control your lost or stolen tablet. You can also check the location of the wearable devices connected to this tablet.
- **App security:** Scan apps and keep your device safe from malicious software.
- **Updates:** Check the version of your device's software and check for updates.
- **Privacy:** Change the settings for privacy.
- **Biometrics:** Change the settings for biometric data. Refer to [Face recognition](#) and [Fingerprint recognition](#) for more information.
- **Samsung Pass:** Verify your identity through your biometric data. Refer to [Samsung Pass](#) for more information.

- **Secure Folder:** Create a secure folder to protect your private content and apps from others. Refer to [Secure Folder](#) for more information.
- **Secure Wi-Fi:** Set the device to protect your data while using unsecured Wi-Fi networks. Refer to [Secure Wi-Fi](#) for more information.
- **Install unknown apps:** Set the device to allow the installation of apps from unknown sources.
- **Other security settings:** Configure additional security settings.

Some features may not be available depending on the carrier or model.

Face recognition

You can set the device to unlock the screen by recognizing your face.

- If you use your face as a screen lock method, your face cannot be used to unlock the screen for the first time after turning on the device. To use the device, you must unlock the screen using the pattern, PIN, or password you set when registering the face. Be careful not to forget your pattern, PIN, or password.
- If you change the screen lock method to **Swipe** or **None**, which are not secure, all of your biometric data will be deleted.

⚠ Precautions for using face recognition

Before using the face recognition to unlock your device, keep the following precautions in mind.

- Your device could be unlocked by someone or something that looks like your image.
- Face recognition is less secure than Pattern, PIN, or Password.

For better face recognition

Consider the following when using face recognition:

- Consider the conditions when registering, such as wearing glasses, hat, mask, beard, or heavy makeup
- Ensure that you are in a well-lit area and that the camera lens is clean when registering
- Ensure your image is not blurry for better match results

Registering your face

For better face registration, register your face indoors and out of direct sunlight.

- 1 On the Settings screen, tap **Security and privacy** → **Biometrics** → **Face recognition**.
- 2 Read the on-screen instructions and tap **Continue**.
- 3 Set a screen lock method.
- 4 Position your face inside the frame on the screen.
The camera will scan your face.

- If unlocking the screen with your face is not working properly, tap **Remove face data** to remove your registered face and register your face again.
- To enhance the face recognition, tap **Add alternative appearance to enhance recognition** and add an alternate appearance.

Unlocking the screen with your face

You can unlock the screen with your face instead of using a pattern, PIN, or password.

- 1 On the Settings screen, tap **Security and privacy** → **Biometrics** → **Face recognition**.
- 2 Unlock the screen using the preset screen lock method.
- 3 Tap the **Face unlock** switch to turn it on.
- 4 On the locked screen, look at the screen.
When your face is recognized, you can unlock the screen without using any additional screen lock method. If your face is not recognized, use the preset screen lock method.

Deleting the registered face data

You can delete face data that you have registered.

- 1 On the Settings screen, tap **Security and privacy** → **Biometrics** → **Face recognition**.
- 2 Unlock the screen using the preset screen lock method.
- 3 Tap **Remove face data** → **Remove**.
Once the registered face is deleted, all the related features will also be turned off.

Fingerprint recognition

In order for fingerprint recognition to function, your fingerprint information needs to be registered and stored in your device.

- This feature may not be available depending on the carrier or model.
- Fingerprint recognition uses the unique characteristics of each fingerprint to enhance the security of your device. The likelihood of the fingerprint sensor confusing two different fingerprints is very low. However, in rare cases where separate fingerprints are very similar the sensor may recognize them as identical.
- If you use your fingerprint as a screen lock method, your fingerprint cannot be used to unlock the screen for the first time after turning on the device. To use the device, you must unlock the screen using the pattern, PIN, or password you set when registering the fingerprint. Be careful not to forget your pattern, PIN, or password.
- If your fingerprint is not recognized, unlock the device using the pattern, PIN, or password you set when registering the fingerprint, and then re-register your fingerprints. If your pattern, PIN, or password is forgotten, you will not be able to use the device if you do not reset it. Samsung is not responsible for any data loss or inconvenience caused by forgotten unlock codes.
- If you change the screen lock method to **Swipe** or **None**, which are not secure, all of your biometric data will be deleted.

For better fingerprint recognition

When you scan your fingerprints on the device, be aware of the following conditions that may affect the feature's performance:

- The device may not recognize fingerprints that are affected by wrinkles or scars.
- The device may not recognize fingerprints from small or thin fingers.
- To improve recognition performance, register the fingerprints of the fingers used most often to perform tasks on the device.
- The Side button has a built-in fingerprint recognition sensor. Ensure that the fingerprint recognition sensor is not scratched or damaged by metal objects, such as coins, keys, and necklaces.
- Covering the fingerprint recognition sensor with accessories, such as stickers, may decrease the fingerprint recognition rate.
- Ensure that the fingerprint recognition sensor and your fingers are clean and dry.
- If you bend your finger or use a fingertip, the device may not recognize your fingerprints. Make sure to cover the entire fingerprint recognition sensor with your finger.
- In dry environments, static electricity can build up in the device. Avoid using this feature in dry environments or before using the feature, discharge static electricity by touching a metal object.

Registering fingerprints

On the Settings screen, tap **Security and privacy** → **Biometrics** → **Fingerprints** and follow the on-screen instructions to register your fingerprint. After registering, you can check whether your fingerprint is registered and its name by tapping **Check added fingerprints**.

Unlocking the screen with your fingerprints

You can unlock the screen with your fingerprint instead of using a pattern, PIN, or password.

- 1 On the Settings screen, tap **Security and privacy** → **Biometrics** → **Fingerprints**.
- 2 Unlock the screen using the preset screen lock method.
- 3 Tap the **Fingerprint unlock** switch to turn it on.
- 4 On the locked screen, place your finger on the fingerprint recognition sensor and scan your fingerprint.

Deleting registered fingerprints

You can delete registered fingerprints.

- 1 On the Settings screen, tap **Security and privacy** → **Biometrics** → **Fingerprints**.
- 2 Unlock the screen using the preset screen lock method.
- 3 Select a fingerprint to delete and tap **Remove**.

Samsung Pass

Register your biometric data to Samsung Pass and verify your identity when using services that require your login or personal information.

- The website sign-in feature is only available for websites that you access through the **Samsung Internet** app. Some websites may not support this feature.
- Registered biometric data is only saved to your device and is not synced with other devices or servers.

Registering Samsung Pass

Before using Samsung Pass, register your biometric data to Samsung Pass.

On the Settings screen, tap **Security and privacy** → **Samsung Pass**. Follow the on-screen instructions to complete the setup.

Verifying the Samsung account password

You can use your registered biometric data to verify your identity instead of entering your Samsung account password when, for example, you purchase content from **Galaxy Store**.

On the Samsung Pass main screen, tap **⋮** → **Settings** → **Account and syncing**, and then tap the **Verify with Samsung Pass** switch to turn it on.

Using Samsung Pass to sign in to websites

You can use Samsung Pass to sign in to websites that support ID and password autofill.

- 1 On the sign-in page of the website, enter your ID and password, and then tap the website's sign-in button.
- 2 When a pop-up window asking whether you want to save the sign-in information appears, tick **Sign in with Samsung Pass** and tap **Remember**.

Using Samsung Pass to sign in to apps

You can use Samsung Pass to sign in to apps that support ID and password autofill.

- 1 On the sign-in page of the app, enter your ID and password, and then tap the app's sign-in button.
- 2 When a pop-up window asking whether you want to save the sign-in information appears, tap **Save**.

Managing sign-in information

Check out the list of websites and apps you have set to use Samsung Pass and manage your sign-in information.

- 1 On the Samsung Pass main screen, tap **Apps/websites** and select a website or app from the list.
- 2 Tap **Edit** and modify your ID, password, and the website's or app's name.
To delete your sign-in information, tap **Delete**.

Using Samsung Pass with websites and apps

When using websites or apps that support Samsung Pass, you can sign in with Samsung Pass.

To check out the list of websites and apps that support Samsung Pass, on the Samsung Pass main screen, tap  → **Settings** → **Partners**. If there are no websites or apps that support Samsung Pass, **Partners** will not appear.

- Available websites and apps may vary depending on the service provider or model.
- Samsung is not responsible for any loss or inconvenience caused by signing in to websites or apps through Samsung Pass.

Entering your personal information automatically

You can use Samsung Pass to enter your personal information, such as your address or payment card information, on apps that support autofill.

1 On the Samsung Pass main screen, select an option under **Private info**.

2 Enter the information and tap **Save**.

You can now use the biometric data you registered to Samsung Pass when entering the personal information automatically on supported apps.

Deleting your Samsung Pass data

You can delete your biometric data, sign-in information, and app data registered to Samsung Pass.

On the Samsung Pass main screen, tap  → **Settings** → **Devices using Samsung Pass** →  → **Leave Samsung Pass**.

- Your Samsung account will remain active.
- The Samsung Pass data on other devices signed in to your Samsung account will also be deleted.

Secure Folder

Secure Folder protects your private content and apps, such as pictures and contacts, from being accessed by others. You can keep your private content and apps secure even when the device is unlocked.

- ❗ Secure Folder is a separate, secured storage area. The data in Secure Folder cannot be transferred to other devices through unapproved sharing methods, such as USB or Wi-Fi Direct. Attempting to customize the operating system or modifying software will cause Secure Folder to be automatically locked and inaccessible. Before saving data in Secure Folder, make sure to back up a copy of the data in another secure location.

Setting up Secure Folder

- 1 Open **Settings** and tap **Security and privacy** → **Secure Folder**.
 - 2 Follow the on-screen instructions to complete the setup.
When a pop-up window asking whether you want to reset the Secure Folder lock type with your Samsung account appears, tap **Turn on**. If you have forgotten the lock type, you can reset it using your Samsung account. If you do not turn on this feature, you cannot reset the lock type when you have forgotten it.
When the setup is complete, the Secure Folder screen will appear and the Secure Folder app icon (🔒) will be added to the Apps screen.
- 📝 • When the **Secure Folder** app is locked, you must unlock it using your preset lock method.
 - To change the name or icon of Secure Folder, tap ⋮ → **Customize**.

Setting an auto lock condition for Secure Folder

- 1 Open the **Secure Folder** app and tap ⋮ → **Settings** → **Auto lock Secure Folder**.
 - 2 Select a lock option.
- 📝 To manually lock your Secure Folder, tap ⋮ → **Lock and exit**.

Moving content to Secure Folder

Move content, such as pictures and videos, to Secure Folder. The following actions are an example of moving an image from the default storage to Secure Folder.

- 1 Open the **Secure Folder** app and tap  → **Add files**.
- 2 Tap **Images**, tick images to move, and then tap **Done**.
- 3 Tap **Move**.
The selected items will be deleted from the original folder and moved to Secure Folder. To copy items, tap **Copy**.

The method for moving content may vary depending on the content type.

Moving content from Secure Folder

Move content from Secure Folder to the corresponding app in the default storage. The following actions are an example of moving an image from Secure Folder to the default storage.

- 1 Open the **Secure Folder** app and tap **Gallery**.
- 2 Select an image and tap  → **Move out of Secure Folder**.
The selected items will be moved to **Gallery** in the default storage.

Adding apps

Add an app to use in Secure Folder.

- 1 Open the **Secure Folder** app and tap **+**.
- 2 Tick one or more apps installed on the device and tap **Add**.

Removing apps from Secure Folder

Touch and hold an app to delete, and tap **Uninstall**.

Adding accounts

Add your Samsung and Google accounts, or other accounts, to sync with the apps in Secure Folder.

- 1 Open the **Secure Folder** app and tap  → **Settings** → **Manage accounts** → **Add account**.
- 2 Select an account service.
- 3 Follow the on-screen instructions to complete the account setup.

Hiding Secure Folder

You can hide the Secure Folder shortcut from the Apps screen.

Open the **Secure Folder** app, tap  → **Settings**, and then tap the **Add Secure Folder to Apps screen** switch to turn it off.

Alternatively, open the notification panel, swipe downwards, and then tap  (**Secure Folder**) to turn off the feature. If you cannot find  (**Secure Folder**) on the quick settings panel, tap  and drag the button over to add it.

If you want to show the Secure Folder again, open **Settings**, tap **Security and privacy** → **Secure Folder**, and then tap the **Add Secure Folder to Apps screen** switch to turn it on.

Uninstalling Secure Folder

You can uninstall Secure Folder, including the content and apps in it.

Open the **Secure Folder** app and tap  → **Settings** → **More settings** → **Uninstall**.

To back up content before uninstalling Secure Folder, tick **Move media files out of Secure Folder** and tap **Uninstall**. To access data backed up from Secure Folder, open the **My Files** app and tap **Internal storage** → **Download** → **Secure Folder**.

Notes saved in **Samsung Notes** will not be backed up.

Secure Wi-Fi

Secure Wi-Fi is a service that secures your Wi-Fi network connection. It encrypts data using Wi-Fi networks and disables tracking apps and websites so that you can use Wi-Fi networks safely. For example, when using an unsecure Wi-Fi network in public places, such as cafes or airports, Secure Wi-Fi is automatically turned on so that no one can hack your login information or monitor your activity in apps and websites.

On the Settings screen, tap **Security and privacy** → **Secure Wi-Fi** and follow the on-screen instructions to complete the setup.

When Secure Wi-Fi is turned on, the  icon will appear on the status bar.

- Using this feature may result in a slower Wi-Fi network speed.
- This feature may not be available depending on the Wi-Fi network, carrier, or model.

Selecting apps to protect using Secure Wi-Fi

Select apps to protect using Secure Wi-Fi so that you can safely protect data, such as your password or your activity in apps, from being accessed by others.

On the Settings screen, tap **Security and privacy** → **Secure Wi-Fi** →  → **Settings** → **Protected apps** and tap the switches next to the apps you want to protect using Secure Wi-Fi.

Some apps may not support this feature.

Purchasing protection plan

You are provided with a free protection plan for Wi-Fi networks every month. You can also purchase paid protection plans and have unlimited bandwidth protection for a limited time.

1 On the Settings screen, tap **Security and privacy** → **Secure Wi-Fi**.

2 Tap **Protection plan** → **Upgrade** and select the plan you want.

For certain protection plans, you can transfer the protection plan to another device signed in to your Samsung account.

3 Follow the on-screen instructions to complete the purchase.

Location

Change settings for location information permissions.

On the Settings screen, tap **Location**.

- **App permissions:** Check the list of apps that have permission to access the device's location and edit the permission settings.
- **Location services:** Set the device to use the Wi-Fi or Bluetooth feature to increase the accuracy of your location information, even when the features are turned off. You can also check the location services your device is using.
- **Recent access:** Check which apps request your current location information.

Safety and emergency

Manage your medical information and emergency contacts. You can also change settings for emergency features, such as wireless emergency alerts.

On the Settings screen, tap **Safety and emergency**.

- **Medical info:** Enter your medical information.
- **Emergency contacts:** Add your emergency contacts.
- **Emergency SOS:** Set the device to make an emergency call to the preset number when you press the Side button five times.
- **Emergency sharing:** Set the device to send information, such as your location or your device's lower battery notifications, to your emergency contacts for a certain period of time.
- **Emergency Location Service:** Turn on the Emergency Location Service (ELS) feature.
- **Wireless emergency alerts:** Change the settings for wireless emergency alerts.
- **Earthquake alerts:** Turn on the earthquake alert feature.

Some features may not be available depending on the region or the model.

Accounts and backup

Options

Sync, back up, or restore your device's data using Samsung Cloud. You can also sign in to accounts, such as your Samsung account or Google Account, or transfer data to or from other devices through Smart Switch.

On the Settings screen, tap **Accounts and backup**.

- **Manage accounts:** Add your Samsung and Google accounts, or other accounts, to sync with.
- **Users:** Set up additional user accounts for other users to use the device with personalized settings, such as email accounts, wallpaper preferences, and more. Refer to [Users](#) for more information.
- **Samsung Cloud:** Back up your data and settings, and restore the previous device's data and settings even when you do not have it. Refer to [Samsung Cloud](#) for more information.
- **Google Drive:** Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information. You must sign in to your Google Account to back up data.
- **Smart Switch:** Open Smart Switch and transfer data from your previous device. Refer to [Transferring data from your previous device \(Smart Switch\)](#) for more information.

Regularly back up your data to a safe location, such as Samsung Cloud or a computer, so that you can restore it if the data is damaged or lost because of an unintended factory data reset.

Users

Set up additional user accounts for other users to use the device with personalized settings, such as email accounts, wallpaper preferences, and more.

Following types of user accounts are available:

- **Administrator:** The administrator account is created only when setting up the device for the first time, and only one can be created. This account has full control of the device including user account management. You can add or delete user accounts only when using this account.
- **Guest:** A guest account can access the device, but information and data used during a guest session is temporarily stored. Each time you use this account, you are asked whether to continue the previous guest session or reset it.
- **User:** A user account can access its own apps and content, and customize the device settings that affect all accounts.
- **User (restricted profile):** A restricted account can only access the apps and content allowed by the administrator account, and cannot use the services that require logging in.

Adding users

- 1 On the Settings screen, tap **Accounts and backup** → **Users**.
- 2 Tap **Add user** / **Add user or profile** and follow the on-screen instructions to set up a user account.

Adding restricted profiles

- 1 On the Settings screen, tap **Accounts and backup** → **Users**.
- 2 Tap **Add user or profile** → **User (Restricted profile)** and follow the on-screen instructions to set up a user account.

Switching users

Tap the user account icon at the top of the locked screen and select an account to switch to.

Locked screen

Managing users

When using the administrator account, you can delete accounts or change account settings.

On the Settings screen, tap **Accounts and backup → Users**.

To delete a user account, tap the user account you want to delete and tap **Delete user**.

To change account settings, tap user account and change the settings.

Samsung Cloud

Back up your device's data to Samsung Cloud and restore it later.

Backing up data

You can back up your device's data to Samsung Cloud.

- 1 On the Settings screen, tap **Accounts and backup** and tap **Back up data** under **Samsung Cloud**.
 - 2 Tap the switches next to the items you want to back up and tap **Back up now**.
 - 3 Tap **Done**.
-  • Some data will not be backed up. To check which data will be backed up, on the Settings screen, tap **Accounts and backup** and tap **Back up data** under **Samsung Cloud**.
 - To check the backup data for other devices in your Samsung Cloud, on the Settings screen, tap **Accounts and backup** → **Restore data**, and then select a device you want.

Restoring data

You can restore your backup data from Samsung Cloud to your device.

- 1 On the Settings screen, tap **Accounts and backup**.
- 2 Tap **Restore data** and select a device you want.
- 3 Tick items you want to restore and tap **Restore**.

Google

Configure settings for some features provided by Google.

On the Settings screen, tap **Google**.

Advanced features

Options

Turn on advanced features and change the settings that control them.

On the Settings screen, tap **Advanced features**.

- **Labs:** Use new features of the device.
- **S Pen:** Change the settings for using the S Pen. Refer to [S Pen](#) for more information.
- **Side button:** Select an app or feature to launch using the Side button. Refer to [Setting the Side button](#) for more information.
- **Multi window:** Set how to launch Multi window. You can also configure settings for Multi window. Refer to [Multi window](#) for more information.
- **Motions and gestures:** Turn on the motion feature and configure settings. Refer to [Motions and gestures](#) for more information.
- **Bixby:** Bixby is a user interface that helps you use your device more conveniently. Refer to [Bixby](#) for more information.
- **Smart suggestions:** Set the device to analyze key information in the selected text or received message, such as events and addresses, and suggest that they be added as events to the calendar or to use related apps. You can also get suggestions for useful actions or text to enter based on your app usage history.
 Collected information is stored and used only in this device to protect your personal information.
- **Screenshots and screen recorder:** Change the settings for screenshots and screen recorder.
- **Show contacts when sharing content:** Set the device to display the people you contacted on the sharing options panel so that you can share content directly.

- **Daily Board:** Set the device to show a slideshow with selected features while charging. Refer to [Daily Board](#) for more information.
 - **Accessories:** Change the accessory settings.
 - **Video call effects:** Set to use the feature that changes the background or block background noise during video calls. Refer to [Video call effects](#) for more information.
 -  • This feature is only available in some apps.
 - Some features may not be available depending on the model.
 - **Dual Messenger:** Install a second copy of a messenger app and use two separate accounts for the same app. Refer to [Dual Messenger](#) for more information.
-  Some features may not be available depending on the carrier or model.

Motions and gestures

Turn on the motion feature and configure settings.

On the Settings screen, tap **Advanced features** → **Motions and gestures**.

- **Double tap to turn on screen:** Set the device to turn on the screen by double tapping anywhere on the screen while the screen is turned off.
- **Double tap to turn off screen:** Set the device to turn off the screen by double tapping an empty area on the Home screen or the locked screen.
- **Keep screen on while viewing:** Set the device to prevent the display from turning off while you are looking at it.
- **Cover screen to mute:** Set the device to mute certain sounds by using motions or gestures.
- **Palm swipe to capture:** Set the device to capture a screenshot when you swipe your hand to the left or right across the screen. You can check the captured images in **Gallery**. It is not possible to capture a screenshot while using some apps and features.

 Excessive shaking or an impact to the device may cause an unintended input for some features using sensors.

Video call effects

You can use features that change the background or block background noise during video calls.

On the Settings screen, tap **Advanced features** → **Video call effects** and tap the switch to turn it on. The  icon will be added on the video calling app's screen.

Using video call effects

On the video calling app's screen, tap .

- **Reset all:** Reset the settings.
 - **Background:** Change or blur the background during video calls.
 - **Face:** Apply beauty effects to the face.
 - **Colour tone:** Adjust the screen's colour tone and brightness.
 - **Auto framing:** Turn the auto framing feature on or off. When you turn on this feature, the device changes the shooting angle and zoom automatically by recognizing and tracking people during video calls.
 - **Mic mode:** Block background noise to make the sound clearer.
 - **Standard:** Remove noise so that it sounds like a normal voice call.
 - **Voice focus:** Focus on the sound coming from the direction of the front camera.
 - **All sound:** Transmit all the sounds around you, such as the sound of music.
 - : Select or add background colours or images to use during video calls.
-  • Some features may not be available depending on the model.
- Some features are available only when using the front camera.

Dual Messenger

Install a second copy of a messenger app and use two separate accounts for the same app.

- 1 On the Settings screen, tap **Advanced features** → **Dual Messenger**.
Supported apps will appear.
- 2 Tap the switch of an app to install the second app.
The second app will be installed. The second app's icon will be displayed with .

-  • The Dual Messenger feature may not be available depending on the app.
- Some features of the app may be limited for the second app.

Uninstalling a second app

- 1 On the Settings screen, tap **Advanced features** → **Dual Messenger**.
- 2 Tap the switch of the app you want to uninstall and tap **Uninstall**.
All data related to the second app will be deleted.

-  If you uninstall the first app, the second app will also be deleted.

Digital Wellbeing and parental controls

Check the history of your device usage and use features to prevent your device from interfering with your life. You can also set up parental controls for your children and manage their digital use.

On the Settings screen, tap **Digital Wellbeing and parental controls**.

- **Screen time goal:** Set goals for how much you use your device a day.
- **App timers:** Limit the daily usage time for each app by setting a timer. When you reach the limit, the app will be turned off and you cannot use it.
- **Driving monitor:** Turn on the driving monitor to monitor the amount of the time you use your device while driving.
- **Volume monitor:** Turn on the volume monitor to protect your hearing.
- **Parental controls:** Manage your children's digital use.

Battery and device care

Introduction

The device care feature provides an overview of the status of your device's battery, storage, memory, and system security. You can also optimize the device.

Optimizing your device

On the Settings screen, tap **Battery and device care** → **Optimize now**.

The quick optimization feature improves device performance through the following actions.

- Closing apps running in the background.
- Managing abnormal battery usage.
- Scanning for crashed apps and malware.

Battery

Check the remaining battery power and time to use the device. For devices with low battery levels, conserve battery power by turning on power saving features.

On the Settings screen, tap **Battery and device care** → **Battery**.

- **Power saving:** Turn on power saving mode to extend the battery's usage time.
- **Background usage limits:** Limit battery usage for apps that you do not use often.
- **More battery settings:** Configure advanced settings for the battery.

- The usage time left shows the time remaining before the battery power runs out. Usage time left may vary depending on your device settings and operating conditions.
- You might not receive notifications from some apps that use power saving mode.

Storage

Check the status of the used and available storage.

On the Settings screen, tap **Battery and device care** → **Storage**. To delete files or uninstall apps that you do not use anymore, select a category. Then, touch and hold, or select, an item and tap **Delete** or **Uninstall**.

- The actual available capacity of the internal storage is less than the specified capacity because the operating system and default apps occupy part of the storage. The available capacity may change when you update the device.
- You can check the available capacity of the internal storage in the Specification section for your device on the Samsung website.

Memory

On the Settings screen, tap **Battery and device care** → **Memory**.

To speed up your device by stopping apps running in the background, tick apps from the apps list, and tap **Clean now**.

Auto optimization

You can set the device to perform auto optimization when your device is not in use.

On the Settings screen, tap **Battery and device care** → **Auto optimization** and tap the **Restart when needed** switch to turn it on.

Software update

Update your device's software through the firmware over-the-air (FOTA) service. You can also schedule software updates.

On the Settings screen, tap **Battery and device care** → **Software update**.

Diagnostics

Test your device using Samsung Members.

On the Settings screen, tap **Battery and device care** → **Diagnostics** → **Tablet diagnostics**. Select an item to test or tap **Test all** to test all items.

Maintenance mode

Turn on maintenance mode to protect your privacy while someone else is using your device, such as when you send it for repairs.

On the Settings screen, tap **Battery and device care** → **Maintenance mode** → **Turn on**.

Apps

Manage the device's apps and change their settings. You can check the apps' usage information, change their notification or permission settings, or uninstall or disable unnecessary apps.

On the Settings screen, tap **Apps**.

General management

Customize your device's system settings or reset the device.

On the Settings screen, tap **General management**.

- **Language:** Select device languages. Refer to [Adding device languages](#) for more information.
- **App languages:** Select the language you want to use for each app.
- **Text-to-speech output:** Change the settings for text-to-speech features used when TalkBack is turned on, such as languages, speed, and more.
- **Voice input:** Download language packs to use the voice input feature offline.
- **Date and time:** Access and alter the settings to control how the device displays the time and date.

If the battery becomes fully discharged, the time and date are reset.

- **Samsung Keyboard settings:** Change the settings for the Samsung Keyboard.
- **Keyboard list and default:** Select a keyboard to use by default and change the keyboard settings.
- **Physical keyboard:** Change the settings for an external keyboard.
- **Mouse and trackpad:** Change the settings for an external mouse or trackpad.
- **Passwords and autofill:** Select an autofill service to use.
- **Reset:** Reset your device's settings or perform a factory data reset.
- **Contact us:** Ask questions or check the frequently asked questions.

Adding device languages

You can add languages to use on your device.

- 1 On the Settings screen, tap **General management** → **Language** → **Add language**.
To check out all the languages that can be added, tap **⋮** → **All languages**.
- 2 Select a language to add.

- 3 To set the selected language as the default language, tap **Set as default**. To keep the current language setting, tap **Keep current**.

The selected language will be added to your languages list. If you changed the default language, the selected language will be added to the top of the list.

To change the default language from your languages list, select the language you want and tap **Apply**. If an app does not support the default language, the next supported language in the list will be used.

Accessibility

Configure various settings to improve accessibility to the device.

On the Settings screen, tap **Accessibility**.

- **Recommended for you:** Check the accessibility features you are currently using and check other recommended features.
- **TalkBack:** Turn on TalkBack, which provides voice feedback. To check help information to learn how to use this feature, tap **Settings** → **Tutorial and help**.
- **Spoken assistance:** Use the voice assistant features.
- **Visibility enhancements:** Customize the settings to improve accessibility for visually impaired users.
- **Hearing enhancements:** Customize the settings to improve accessibility for users with hearing impairment.
- **Interaction and dexterity:** Customize the settings to improve accessibility for users who have reduced dexterity.
- **Advanced settings:** Configure settings for Direct access and notification features.
- **Installed apps:** Check out accessibility services installed on the device.
- **About Accessibility:** Check the Accessibility information.
- **Contact us:** Ask questions or check frequently asked questions.

Software update

Update your device's software through the firmware over-the-air (FOTA) service. You can also schedule software updates.

On the Settings screen, tap **Software update**.

- **Download and install:** Check for and install updates manually.
- **Auto download over Wi-Fi:** Set the device to download updates automatically when connected to a Wi-Fi network.
- **Last update:** Check out information about the last software update.

 If emergency software updates are released for your device's security and to block new types of security threats, they will be installed automatically without your agreement.

Security updates information

Security updates are provided to strengthen the security of your device and protect your personal information. For security updates for your model, visit security.samsungmobile.com.

 The website supports only some languages.

Tips and User Manual

Access useful tips, new features, the online user manual and remote support.

About tablet

Access your device's information.

On the Settings screen, tap **About tablet**.

To change your device's name, tap **Edit**.

- **Status information:** Check out various device information, such as the Wi-Fi MAC address and serial number.
- **Legal information:** Access legal information related to the device, such as safety information and the open source licence.
- **Software information:** Access the device's software information, such as its operating system version and firmware version.
- **Battery information:** Check out the device's battery status and information.

Troubleshooting

Before contacting a Samsung Service Centre or an authorized service centre, please attempt the following solutions. Some situations may not apply to your device.

You can also use Samsung Members to solve any problems you encounter while using your device.

When you turn on your device or while you are using the device, it prompts you to enter one of the following codes:

- Password: When the device lock feature is turned on, you must enter the password you set for the device.
- PIN: When using the device for the first time or when the PIN requirement is turned on, you must enter the PIN supplied with the SIM or USIM card. You can turn off this feature by using the Lock SIM card menu.
- PUK: Your SIM or USIM card is blocked, usually as a result of entering your PIN incorrectly several times. You must enter the PUK supplied by your carrier.
- PIN2: When you access a menu requiring the PIN2, you must enter the PIN2 supplied with the SIM or USIM card. For more information, contact your carrier.

Your device displays network or service error messages

- When you are in areas with weak signals or poor reception, you may lose reception. Move to another area and try again. While moving, error messages may appear repeatedly.
- You cannot access some options without a subscription. For more information, contact your carrier.

Your device does not turn on

When the battery is completely discharged, your device will not turn on. Fully charge the battery before turning on the device.

The touch screen responds slowly or improperly

- If you attach a screen protector or optional accessories to the touch screen, the touch screen may not function properly.
- If you are wearing gloves, if your hands are not clean while touching the touch screen, or if you tap the screen with sharp objects or your fingertips, the touch screen may malfunction.
- The touch screen may malfunction in humid conditions or when exposed to water.
- Restart your device to clear any temporary software problems.
- Ensure that your device software is updated to the latest version.
- If the touch screen is scratched or damaged, visit a Samsung Service Centre or an authorized service centre.

Your device freezes or encounters a fatal problem

Try the following solutions. If the problem is still not resolved, contact a Samsung Service Centre or an authorized service centre.

Restarting the device

If your device freezes or hangs, you may need to close apps or turn off the device and turn it on again.

Forcing restart

If your device is frozen and unresponsive, press and hold the Side button and the Volume Down button simultaneously for more than 7 seconds to restart it.

Resetting the device

If these methods do not solve your problem, perform a factory data reset.

Open **Settings** and tap **General management** → **Reset** → **Factory data reset** → **Reset** → **Delete all**. Before performing the factory data reset, remember to make backup copies of all important data stored in the device.

Calls are not connected

- Ensure that you have accessed the right cellular network.
- Ensure that you have not set call barring for the phone number you are dialing.
- Ensure that you have not set call barring for the incoming phone number.

Others cannot hear you speaking on a call

- Ensure that you are not covering the built-in microphone.
- Ensure that the microphone is close to your mouth.
- If you are using headphones, ensure that they are properly connected.

Sound echoes during a call

Adjust the volume by pressing the Volume button or move to another area.

A cellular network or the internet is often disconnected or audio quality is poor

- Ensure that you are not blocking the device's internal antenna.
- When you are in areas with weak signals or poor reception, you may lose reception. You may have connectivity problems because of issues with the carrier's base station. Move to another area and try again.
- When using the device while moving, wireless network services may be disabled because of issues with the carrier's network.

The battery does not charge properly (For Samsung-approved chargers)

- Ensure that the charger is connected properly.
- Visit a Samsung Service Centre or an authorized service centre and have the battery replaced.

The battery depletes faster than when first purchased

- When you expose the device or the battery to very cold or very hot temperatures, the useful charge may be reduced.
- Battery consumption will increase when you use certain features or apps, such as GPS, games, or the internet.
- The battery is consumable and the useful charge will get shorter over time.

Error messages appear when opening the camera

Your device must have sufficient available storage and battery power to operate the camera app. If you receive error messages when opening the camera, try the following:

- Charge the battery.
- Free some storage by transferring files to a computer or deleting files from your device.
- Restart the device. If you are still having trouble with the camera app after trying these tips, contact a Samsung Service Centre or an authorized service centre.

Picture quality is poorer than the preview

- The quality of your pictures may vary, depending on the surroundings and the photography techniques you use.
- If you take pictures in dark areas, at night, or indoors, image noise may occur or images may be out of focus.

Error messages appear when opening multimedia files

If you receive error messages or multimedia files do not play when you open them on your device, try the following:

- Free some storage by transferring files to a computer or deleting files from your device.
- Ensure that the music file is not Digital Rights Management (DRM)-protected. If the file is DRM-protected, ensure that you have the appropriate licence or key to play the file.
- Ensure that the file formats are supported by the device. If a file format is not supported, such as DivX or AC3, install an app that supports it. To check the file formats that your device supports, visit the Samsung website.

- Your device supports pictures and videos captured with the device. Pictures and videos captured by other devices may not work properly.
- Your device supports multimedia files that are authorized by your carrier or providers of additional services. Some content circulated on the internet, such as ringtones, videos, or wallpapers, may not work properly.

Bluetooth is not working well

If another Bluetooth device is not located or there are connection problems or performance malfunctions, try the following:

- Ensure that the device you wish to connect with is ready to be scanned or connected to.
- Ensure that your tablet and the other Bluetooth device are within the maximum Bluetooth range (10 m).
- On your tablet, open **Settings**, tap **Connections**, and then tap the **Bluetooth** switch to turn it on again.
- On your tablet, open **Settings**, tap **General management** → **Reset** → **Reset network settings** → **Reset settings** → **Reset** to reset network settings. You may lose registered information when performing the reset.

If these tips do not solve the problem, contact a Samsung Service Centre or an authorized service centre.

The screen brightness adjustment bar does not appear on the notification panel

Open the notification panel by dragging the status bar downwards, and then drag the notification panel downwards. Tap  → **Quick panel layout** → **Brightness control** → **Show always**.

A connection is not established when you connect the device to a computer

- Ensure that the USB cable you are using is compatible with your device.
- Ensure that you have the proper driver installed and updated on your computer.

Your device cannot find your current location

GPS signals may be obstructed in some locations, such as indoors. Set the device to use Wi-Fi or a mobile network to find your current location in these situations.

Data stored in the device has been lost

Always make backup copies of all important data stored in the device. Otherwise, you cannot restore data if it is damaged or lost. Samsung is not responsible for the loss of data stored in the device.

A small gap appears around the outside of the device case

- This gap is a necessary manufacturing feature and some minor rocking or vibration of parts may occur.
- Over time, friction between parts may cause this gap to expand slightly.

There is not enough space in the device's storage

Delete unnecessary data, such as cache, using the device care feature or manually delete unused apps or files to free up storage space.

The Home button does not appear

The navigation bar containing the Home button may disappear while using certain apps or features. To access the navigation bar, drag upwards from the bottom of the screen.

Removing the battery

- **To remove the battery, contact an authorized service centre.**
- For your safety, you **must not attempt to remove** the battery. If the battery is not properly removed, it may lead to damage to the battery and device, cause personal injury, and result in the device being unsafe.
- Samsung does not accept liability for any damage or loss (whether in contract or tort, including negligence) which may arise from failure to precisely follow these warnings and instructions, other than death or personal injury caused by Samsung's negligence.

Health and Safety

Please read this important safety information before you use the device. It contains general safety information for devices and may include content that does not apply to your device. Follow the warning and caution information to prevent injury to yourself or others and to prevent damage to your device.

The term 'device' refers to the product and its battery, charger, the items supplied with the product, and any Samsung-approved accessories used with the product.

Warning: Failure to comply with safety warnings and regulations can cause serious injury or death.

Do not use damaged power cords or plugs, or loose electrical sockets

Unsecured connections can cause electric shock or fire.

Do not touch the device, power cords, plugs, or the electric socket with wet hands or other wet body parts

Doing so may cause electric shock.

Do not pull the power cord excessively when disconnecting it

Doing so may cause electric shock or fire.

Do not bend or damage the power cord

Doing so may cause electric shock or fire.

Do not use the device with wet hands while the device is charging

Doing so may cause electric shock.

Do not directly connect together the charger's positive and negative terminals

Doing so may cause fire or serious injury.

Do not use your device outdoor during a thunderstorm

Doing so may result in electric shock or device malfunction.

Use manufacturer-approved batteries, chargers, accessories, and supplies

- Using generic batteries or chargers may shorten the life of your device or cause the device to malfunction. They may also cause a fire or cause the battery to explode.
- Only use a Samsung-approved battery and charger specifically designed for your device. An incompatible battery or charger can cause serious injuries or damage to your device.
- Samsung cannot be responsible for the user's safety when using accessories or supplies that are not approved by Samsung.

Do not carry your device in your back pockets or on your waist

- The device may be damaged, explode, or result in a fire if too much pressure is applied to it.
- You may be injured if you are bumped or fall.

Do not drop or cause an impact to the charger or the device

Handle and dispose of the device and charger with care

- Never dispose of the battery or device in a fire. Never place the battery or device on or in heating devices, such as microwave ovens, stoves, or radiators. The device may explode when overheated. Follow all local regulations when disposing of used battery or device.
- Never crush or puncture the device.
- Avoid exposing the device to high external pressure, which can lead to an internal short circuit and overheating.

Protect the device, battery and charger from damage

- Avoid exposing your device and battery to very cold or very hot temperatures.
- Extreme temperatures can damage the device and reduce the charging capacity and life of your device and battery.
- Do not directly connect together the battery's positive and negative terminals and prevent them from coming into contact with metal objects. Doing so may cause the battery to malfunction.
- Never use a damaged charger or battery.

Do not store your device near or in heaters, microwaves, hot cooking equipment, or high pressure containers

- The battery may leak.
- Your device may overheat and cause a fire.

Do not use or store your device in areas with high concentrations of dust or airborne materials

Dust or foreign materials can cause your device to malfunction and may result in fire or electric shock.

Prevent the multipurpose jack and the small end of the charger from contact with conductive materials, such as liquids, dust, metal powders, and pencil leads. Do not touch the multipurpose jack with sharp tools or cause an impact to the multipurpose jack

Conductive materials may cause a short circuit or corrosion of the terminals, which may result in an explosion or fire.
