Dear Gregory

Regarding to your requests for subject application, I reply you against on each items as follow;

1. Radiated emission measurements were performed up to 1 GHz. The block diagram shows an internal frequency of 166 MHz. Section 15.33(b)(1) states that radiated emissions must therefore be measured up to 2 GHz. Please submit radiated emission data between 1 GHz and 2 GHz.

**(ANS) According to your comments, we have been re-tested the radiated emissions between 1GHz and 2GHz.**

**Please refer to attached revised testreport, then you can confirm that.**

2. Is there a ferrite core on the video cable used to connect the EUT to the pc? The photo is unclear (too dark to tell) and the test report does not indicate a ferrite. Please address.

**(ANS) There were not any ferrite core on the cable basically.**

**It might you did confused caused by unclear photos I think.**

3. FYI: the test report should always indicate if a ferrite is present on any of the I/O cables used during testing.

**(ANS) There will be not necessary to indicate in the test report since no ferrite corein there.**

I hope these response will be helpful to you can finish final review for this FCC application, then send me Grant ASAP if it's no additional problems.

Sincerely...

---

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

RT Questions:

1. Radiated emission measurements were performed up to 1 GHz. The block diagram shows an internal frequency of 166 MHz. Section 15.33(b)(1) states that radiated emissions must therefore be measured up to 2 GHz. Please submit radiated emission data between 1 GHz and 2 GHz.
2. Is there a ferrite core on the video cable used to connect the EUT to the pc? The photo is unclear (too dark to tell) and the test report does not indicate a ferrite. Please address.
3. FYI: the test report should always indicate if a ferrite is present on any of the I/O cables used during testing.
