

FCC RF EXPOSURE INFORMATION

WARNING! Read this information before using your phone

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.

Body-worn Operation

In order to comply with FCC RF Exposure requirements always wear the watch on your wrist when the unit is transmitting and be sure that the band is adjusted tight on the wrist so that it will not slide down onto the forearm. With the exception of the wrist and hand always maintain a 1.2cm spacing between the watch and other parts of the body.
