Attestation Letter

Attn: OET Dept.

Product/ Model Number: Wireless One Connect Receiver / WCHA31M

1. This device will only associate with a low power indoor AP for WIFI 7 operations. Hotspot Mode, ad-hoc and any other P2P service is disabled for WIFI 7 operations. This device will not connect directly to another client device using WIFI 7 frequencies.
2. This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
3. The transmissions will be lower or equal to the power advertised by the indoor low-power access point and never above the maximum output power allowed by the FCC grant for equipment class 6ID.
4. Contention-based protocol as demonstrated in the test report is permanently embedded in the module and is not host-dependent.
5. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.

Sincerely,.

Minhyung Cho / Staff Engineer
Samsung Electronics Co., Ltd.
