

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or noise meter) sits on a wooden table. A red cable runs from the equipment to a power supply unit on the floor. The power supply unit is connected to a wall outlet. On the right, another wooden table holds a small black device, possibly a test item or a reference source. The background is a plain wall with a power strip.
Radiation Emission View (Below 30MHz)	 A photograph showing a radiation emission test setup. A white test item is placed on a stand in the center of a room. The room is lined with white, square-shaped electromagnetic shielding tiles. A metal frame structure is visible in the foreground, and a yellow and black striped caution tape is on the floor. The floor is made of large, light-colored tiles.
