

CHROMECAST ULTRA USER MANUAL

MODEL NC2-6A5-D

WHAT YOU'LL FIND IN YOUR CHROMECAST ULTRA BOX:

1. **Chromecast:** Your Chromecast plugs into any HDMI port on your TV, and uses your existing Wi-Fi or Ethernet network to stream video from the internet to your TV. A Chromecast is controlled from devices on the same Wi-Fi network, such as mobile devices, tablets, or computers, and is powered using the USB cable (#2). Your Chromecast also has a port into which you can attach an Ethernet cable. If you are not satisfied with the performance of your Chromecast when relying on Wi-Fi, you can plug your Chromecast directly into an available Ethernet port to improve performance.

2. **USB power cable:** The USB cable provides power to your Chromecast. One end plugs into your Chromecast, and the other end plugs into either a USB port on your TV, or the power supply (#3). Optionally, a USB port on your TV may be used as a power supply **DO NOT PLUG THE USB CABLE INTO A PORT LABELED “SERVICE”; IT MUST BE LABELED “USB” OR**

DISPLAY THIS SYMBOL:

3. **Power supply:** Used with the USB power cable (#2) to power your Chromecast (#1)

MORE HELP WITH SETTING UP CHROMECAST CAN BE FOUND [HERE](#).

WARNINGS TO USERS

- Chromecast may get hot to the touch; this is normal. Unplug Chromecast's power source and let it cool before removing it from your television.
- You should only use only the cables and plugs provided with your device to plug Chromecast into a power source. Using other cables or plugs may damage Chromecast and/or your television. If you must use a different power supply than the one provided with your device, use a UL Listed power supply marked “LPS” or “Class 2”, with output rated 5Vdc, 1A.
- Do not expose Chromecast or the power supply to water or extreme conditions (moisture, heat, cold, dust), as Chromecast or the power supply may malfunction or cease to work when exposed to such elements.
- Do not attempt to disassemble or repair Chromecast yourself. Doing so voids the limited warranty and could harm you, your television, and/or Chromecast.
- Chromecast is an entertainment device; it is not designed, manufactured or intended for use in hazardous environments requiring fail-safe performance in which the failure of Chromecast could lead directly to death, personal injury, or severe physical or environmental damage.
- Caution: Risk of electric shock. Take care when handling the power supply to avoid electric shock.
- If you wish to plug your Chromecast into a wall socket or Ethernet connection, you will need to install your Chromecast near a wall socket or Ethernet connection that is easily accessible.
-

Pacemaker Notice

The device contains radios that emit electromagnetic fields. These electromagnetic fields may interfere with pacemakers or other medical devices. If you wear a pacemaker, maintain at least 20 cm (8 inches) of separation between your pacemaker and your device. If you suspect your device is interfering with your

pacemaker or any other medical device, stop using it and consult your physician for information specific to your medical device.

Do not carry the device in the front pocket of your shirt or coat.

For information about other active medical implants, please contact the producer or a doctor to ensure that your product's magnetic field will not interfere with the implant.

Device with Magnet

Avoid placing any media that contains magnets or is sensitive to magnetism, such as credit cards, bank cards, audio/video, tapes, or magnetic memory devices, near this product.

Media containing information sensitive to magnets should be kept at least 5 cm (2 inches) away from the product. For example, if you carry your wallet or billfold containing magnetic cards next to this product, information stored on those cards could be destroyed.

Similarly, magnet-sensitive devices, such as a mechanical watch or measuring device, can be damaged if they come too close to this product.

REGULATORY INFORMATION

Radio Frequency (RF) Exposure Information

To satisfy RF exposure requirements, a separation distance of at least 20 cm should be maintained between the antenna of this device and persons during device operation. Operations at closer than this distance are not recommended.

NOTE ON INTERFERENCE IN A RESIDENTIAL INSTALLATION

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Chromecast generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If Chromecast does cause harmful interference to radio or television reception, which can be determined by plugging in, then unplugging, Chromecast, the user is encouraged to try to correct the

interference by reorienting or relocating the receiving antenna and/or consulting the dealer or an experienced radio/TV technician for help.

Chromecast complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) the device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate Chromecast or warranty.

Model: NC2-6A5-D

FCC ID: A4RNC2-6A5-D – your Chromecast's FCC ID is printed on its back

The antenna used for this transmitter must not be co-located in conjunction with any other antenna or transmitter.

Canada, Industry Canada (IC) Notices

CAN ICES-3 (B)/NMB-3(B).

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Under Industry Canada regulations, the radio transmitter(s) in this device may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

The device for operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;

The radiated output power of this device is below the Industry Canada (IC) radio frequency exposure limits. This device has been evaluated for and shown compliant with the IC Radio Frequency (RF) Exposure

limits. The device should be used in such a manner such that the potential for human contact during normal operation is minimized.

This device has been certified for use in Canada. Status of the listing in the Industry Canada's REL (Radio Equipment List) can be found at the following web address:

<http://www.ic.gc.ca/app/sitt/reltel/srch/nwRdSrch.do>

Additional Canadian information on RF exposure also can be found at the following web address:

<http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf08792.html>

Chromecast was designed by Google Inc. of 1600 Amphitheatre Parkway, Mountain View, California 94043 and assembled in China.
