| <p><b>EUT Housing and<br/>Board View 1</b></p>      |  A photograph showing the internal components of an Electronic Under Test (EUT) housing. The green printed circuit board (PCB) is populated with various electronic components, including integrated circuits, capacitors, and resistors. The PCB is mounted within a black plastic housing. A silver metal shield is also visible, positioned next to the PCB. A black ruler with white markings is placed horizontally below the components for scale, showing measurements in millimeters and centimeters. |
| <p><b>Solder<br/>Board-Component<br/>View 1</b></p> |  A close-up photograph of a small electronic component, likely a microcontroller or sensor, soldered onto a green PCB. The component is rectangular and has several pins visible. A black ruler with white markings is placed horizontally below the component for scale, showing measurements in millimeters and centimeters.                                                                                                                                                                               |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <div>Solder<br/>Board-Component<br/>View 2</div> |  A photograph of a small, green printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue textured surface. The component is rectangular with rounded corners and features two circular solder pads on its top surface. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). |
| <div>Solder<br/>Board-Component<br/>View 3</div> |  A photograph of a larger, green printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue textured surface. The component is rectangular with rounded corners and features a USB port on its top edge. A black ruler with white markings is positioned horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).                |

| <p>Solder<br/>Board-Component<br/>View 8</p> |  A photograph showing a green circular printed circuit board (PCB) and a toroidal inductor. The PCB has several small components and a central circular feature. The toroidal inductor is made of copper wire wound around a core. Both components are placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler is oriented vertically and horizontally, providing a scale for the components. |
| <p>Solder<br/>Board-Component<br/>View 9</p> |  A photograph showing a small, circular component, likely a toroidal inductor, placed on a blue textured surface. The component has a dark, possibly black, outer ring and a lighter, possibly copper, inner core. It is positioned next to a black ruler with white markings in millimeters, which is oriented vertically and horizontally to provide a scale.                                                                            |

|                                                            |                                                                                                                                                                                                                                                                                                   |
