

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 This photograph shows the internal components of the EUT housing. On the left, a green printed circuit board (PCB) is visible, featuring various electronic components and a yellow component. To its right is a black plastic housing with a circular opening. A black ruler with white markings is placed horizontally below the components, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 1	 This photograph shows a close-up of a green printed circuit board (PCB) component. The board has a complex pattern of copper traces and a central component. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, likely a wireless charging coil, placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the component, showing measurements from 10 to 60 mm. The component itself is irregularly shaped with various electronic components like capacitors and resistors soldered onto it.
Antenna View	 A photograph showing two views of a device. On the left is the internal view of a black oval-shaped device, revealing a green PCB and a circular antenna structure. A red rectangular box highlights the antenna area, with a red line pointing to a label 'Wireless Charger Antenna' in a red-bordered box. On the right is the external view of the same device, showing a black plastic housing with a circular vent. A black ruler with white markings is positioned vertically to the left of the devices, showing measurements from 10 to 100 mm.
