

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a wooden workbench holds a spectrum analyzer. A power line is connected from a wall outlet to a power supply unit on the floor, which is then connected to a device on a second wooden table to the right.
Radiation Emission View (Below 30MHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A small white table is positioned in the center of the chamber. In the foreground, a metal frame with a cylindrical component is placed on a wooden crate.

**Radiation Emission
View (30MHz to 1GHz)**
