

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the disassembled components of an Electronic Under Test (EUT) on a blue background. A black ruler with white markings is placed vertically on the left. The components include a white plastic housing, a green printed circuit board (PCB) with a circular antenna, a white circular antenna cover, a white circular antenna base, and a white rectangular antenna cable. The PCB is connected to the antenna base by a thin wire.
EUT Housing and Board View 2	 A close-up photograph of the antenna assembly from the EUT. A black ruler with white markings is placed vertically on the left. The antenna assembly consists of a white circular base, a copper-colored circular antenna, and a white circular antenna cover. A thin black wire is connected to the antenna base.

Solder Board-Component View 1	 This image shows the top view of a green printed circuit board (PCB) assembly. The board is populated with various electronic components, including integrated circuits, capacitors, and resistors. A black ruler is placed horizontally below the board, showing measurements in millimeters. The board is oriented vertically, with the ruler's scale running from 0 to 100 mm. The background is a light blue textured surface.
Solder Board-Component View 2	 This image shows the bottom view of the same green PCB assembly. A large, circular, silver-colored component, likely a heat sink or a large capacitor, is prominent in the center. A yellow ribbon cable is connected to the board. A black ruler is placed horizontally below the board, showing measurements in millimeters. The board is oriented vertically, with the ruler's scale running from 0 to 100 mm. The background is a light blue textured surface.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue textured surface. The component is rectangular with rounded corners and features a central circular area with concentric white lines. It is surrounded by various electronic components, including resistors and capacitors. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of a white circular component, possibly a solder mask or a small board, placed on a blue textured surface. The component has a central circular area with concentric white lines. A black wire is attached to the component, extending to the right. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
