RE: Request for Confidential Treatment for FCC ID 4AY-6415 Equipment Authorization

Dear FCC's Laboratory Division:

Cymbidium LLC and its affiliates (collectively referred to in this letter as "Cymbidium") with to secure protection of certain documents we submit with Cymbidium's equipment authorization for FCC ID 4AY-6415.

Confidential Protection for 180 Days

We kindly ask that the FCC keep the following documents confidential for 180 days from the day Cymbidium submits this equipment authorization, as allowed under the FCC's Public Notice of June 15, 2004 (DA 04-1705) and under the marketing regulations under 47 CFR Section 2.803 and 47 CFR Section 2.1204:

Test set-up photos
Internal product photos
External product photos
User manual

We only share this information with others under signed NDAs. If disclosed before Cymbidium gets this product announced or shipped, it would damage Cymbidium's ability to compete with others because it would give access to information that is not otherwise publicly available.

Confidential Protection On Indefinite Basis

Certain documents are never made public because they contain extremely sensitive information about Cymbidium's product development requirements and many learnings and very granular details about how best to design and make a product like this one. Disclosure of this information would give third parties an unfair commercial advantage over Cymbidium and cause significant harm to Cymbidium's business.

Documents we ask to be kept confidential on an indefinite basis include:

Schematics
Block diagram
Operational manual/description

If there are any concerns with this request, please contact me to discuss.

Sincerely,

Grant Barber
President
Cymbidium LLC
