

SENTROL

SENTROL is a powerful, long-lasting, and effective insecticide for the control of a wide range of household and commercial pests. It is available in a variety of formulations, including dusts, liquids, and baits, to suit different pest control needs. SENTROL is known for its safety to humans and pets when used as directed, making it a popular choice for residential and commercial pest management.

The active ingredient in SENTROL is deltamethrin, a synthetic pyrethroid that mimics the natural compounds found in chrysanthemum flowers. This makes it highly effective against a broad spectrum of insects, including cockroaches, ants, flies, mosquitoes, and beetles. SENTROL works by disrupting the nervous system of the pests, leading to paralysis and death.

SENTROL is designed for easy application and long-term protection. Its dust formulations can be applied to cracks, crevices, and other hiding places where pests are likely to be found. Liquid formulations can be used for spot treatments or as a general surface spray. Baits are particularly effective for controlling cockroaches and ants, as they are ingested by the pests and then spread to other individuals in the colony.

For optimal results, it is important to follow the instructions on the product label and to use SENTROL in conjunction with other pest control measures, such as maintaining good hygiene and sealing entry points. SENTROL is a reliable and effective solution for a wide range of pest problems, providing peace of mind and a healthier environment.
