Subject: Request for FCC Certification / Confidentiality Request

Dear Sirs;

herewith we request the FCC certification of our METT HHU according to FCC Rules CFR 47 Part 15.209 (Radiated emission limits, general requirement) and as a Class B device. Please find the report and paperwork provided by Phoenix Test Lab.

Confidentiality Request

We are requesting the confidential treatment of the documents listed below according to CFR 47 § 0.459. Guarding this technical information against competitors is financially essential for our business. The documents are:

- Block Diagram of the Device
- All Circuit Diagrams of the Device
- Technical/Operational Description of the Device.

Additional Information (FCC Information to the User)

The User Manual contains on page 2 the FCC required "Information to the User" statements, but we are not planning to provide the User Manual in printed form with the delivery of the device. The User Manual will be downloadable from a specific WebSite. In order to fulfil the FCC requirements here, we are providing a one page document (see "Radio Interference Requirements" attached to the report) including the required statements with every shipment.

Sincerely,

A handwritten signature in cursive script that reads 'Bernd Volkwein'.

Bernd Volkwein
