Enclosures

20-421 Owner's Manual

Your PRO-2015 scanner can receive all of these frequencies:

- 29-54 MHz
- 108-136.9875 MHz
- 137-174 MHz
- 380-512 MHz

FCC NOTICE

Your scanner might cause TV or radio interference even when it is operating properly. To determine whether your scanner is causing the interference, turn off your scanner. If the interference goes away, your scanner is causing it. Try to eliminate the interference by:

- Moving your scanner away from the TV or radio.
- Connecting your scanner to an outlet that is on a different electrical circuit from the TV or radio.
- Contacting your local RadioShack store for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions; (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

SCANNING LEGALLY

Your scanner covers frequencies used by many different groups including police and fire departments, ambulance services, government agencies, private companies, amateur radio services, military operations, pager services, and wireline (telephone and telegraph) service providers. It is legal to listen to almost every transmission your scanner can receive. However, there are some transmissions you should never intentionally listen to. These include:

- Telephone conversations (either cellular, cordless, or other private means of telephone signal transmission)
- Pager transmissions
- Any scrambled or encrypted transmissions

According to the Electronic Communications Privacy Act (ECPA), you are subject to fines and possible imprisonment for intentionally listening to, using, or divulging the contents of such a transmission unless you have the consent of a party to the communication (unless such activity is otherwise illegal). RadioShack encourages responsible, legal scanner use.

FCC ID LABEL Location (FCC ID: AAO2000421)

The §15.19(a)(3) statement is indicated in the user's instruction manual.
