RE: Nortel Networks, Inc.

FCC ID: AB6NT800SFRM Permissive Change

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide a separate exhibit containing the test configuration photographs from the Radiated testing (pages 24, 25, and 34).
- 2) The maximum power given in the test summary 42.21 dBm (16.6 W) is greater than ± 0.5 dB from that listed on the original grant (19.45 W/42.9 dBm and 20.9 W/43.2 dBm). Note that the FCC has instructed TCB's that permissive change applications are to be within ± 0.5 dB. The results also appear low since the maximum measured is less than the average power stated.
- 3) Sections 4.2.4/4.3.4 mentions measurements with 1, 2, and 3 carriers. However, this is only a single carrier system. Please explain.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
