Re: FCC ID: ACJ96NKX-TR325
Applicant: Matsushita Electric Industrial Co., Ltd.
Correspondence Ref No: 17760
731 Confirmation Number: EA99026
Type Product: FCC Part 95 / Family Radio Service Face Held Radio

Attn.: Joe Dichoso,

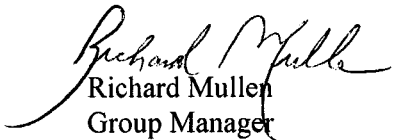

This is in response to your correspondence dated January 19, 2001.

We were disappointed to hear your response "you get what you test" as this does not take into consideration normal and typical deviations with measurement uncertainty and production lot variations. Frankly speaking, it may not be possible to provide the exact same output power measurement performed on the exact same sample if it were tested on different days. If we follow your advise that even a 1.5 dB reduction in output power would require a new application, we would be obligated to file a new application ever day during the length of our production run.

Anyway, please dismiss this Class II Change Application and amend our Original Application grant back to its original declaration that this product is authorized for effective radiated output power of 0.398 watts.

Thank you for your attention and understanding in this matter.

Sincerely yours,

Richard Mullen
Group Manager
