Re: FCC ID: ACJ9TGCF-27GSM
Applicant: Matsushita Electric Industrial Co., Ltd.
Correspondence Ref No: Email dated 01/25/01 from Kwok Chan
731 Confirmation Number: EA99423 / FCC Part 24E / Licensed Portable Transmitter

Attn.: Kwok Chan,

This is in response to your email correspondence dated 01/25/01 regarding the subject matter.

Reference you item 2 - would the following end-product label and user manual wording be acceptable, if not, please advise the exact wording that would be required to enable grant to be issued:

Label marking located on bottom of computer:

- Caution – To comply with FCC RF exposure safety requirements during wireless mode of operation, keep minimum 1 cm and 20 cm spacing between any person's body and computer mounted antenna and external vehicle-mounted antenna, respectively.

User information located in GSM Module User Manual:

- Caution – To comply with FCC RF exposure safety requirements during wireless mode of operation, keep minimum 1 cm and 20 cm (approximately ½ inch and 8 inch) spacing between any person's body and computer mounted antenna and external vehicle-mounted antenna, respectively.
- Optional external vehicle-mounted antenna must not exceed 3 dBi gain and must be installed by professional to assure proper installation and compliance with FCC recommended RF safety requirements.

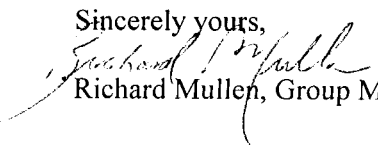

Reference your item 3 - the existing User Manual is already provided with much safety and FCC related user information and we are seriously concerned if we continue to add additional non-pertinent information to user manual it may make the overall user information of no value. In particular, it does not seem reasonable to advise user not to use computer's PCMCIA slot with any third-party Wireless LAN Card or similar wireless transmitter as we have no control over this matter and consumer will use this slot for whatever purpose he wants. However, if you insist, would the following type wording safety your concern:

- This computer's PCMCIA slot has not been RF safety tested with third-party Wireless LAN Card or other wireless transmitter.

Reference your item 4 - Panasonic Notebook Computer CF-27 Series will use Wavecom Inc.'s GSM Module, Model Wismo2C-G900/1900. Wavecom does not have any certification or FCC ID for this product and that is why Matsushita has filed for Certification under FCC ID: ACJ9TGCF-27GSM.

Should you have any questions or comments, please contact the undersigned. Thank you for your attention in this matter.

Sincerely yours,

Richard Mullen, Group Manager
