Dennis,

Please let me confirm again.

We will take the following procedure for this project;

- 1) Firstly, Symbol's W-LAN Card is certified by FCC. (We hope this will be able to be certified in near future.)
- 2) Secondly, you will review Change in FCC ID under 2.933. (As soon as Symbol's W-LAN is certified, I will send the missing information.)
- 3) Finally, you will review Class II Permissive Change under 2.1043.

We believe that Matsushita can get the certification of their FCC ID:

ACJ9TGCF-P11 by taking the above steps.

Is this understanding right ? Please reply by YES or NO.

Best regards,

Kanako Sanda
