Re: Class II Permissive Change Application for Panasonic Single Modular Model WL25A
under FCC ID: ACJ9TGWL25A / Certified under FCC Parts 15C, 15E
For Installation within Panasonic Personal Computer Model CF-FC(mk2)

We, Panasonic Corporation of North America performed SAR test to mount the module WL25A into the portable host (Panasonic Personal Computer Model CF-FC(mk2)). The radiated emission testing was not additionally performed due to the following reasons:

- The original FCC testing of the module WL25A was performed when the antenna was connected to the module in an open environment. Under this application, the WL25A itself and its antennas are installed inside the host PC enclosure. The physical restraints introduced by the host PC enclosure should have resulted in equal or lower level of radiated emission.
- The original FCC testing of the module WL25A was performed with antennas of higher gain. Both MAIN antenna (Type: PIFA) and AUX antenna (Type: PIFA) are the same type as the original ones but have lower gain across level of radiated emission.

Thank you for your attention in this matter.

Sincerely,

Ben Botros
Manager – Regulatory and Compliance
Panasonic Corporation of North America
